🏢 COMPANY SNAPSHOT

1

REVENUE & MARGIN

Last reported annual revenue and operating/net margin (with year)

Marriott International's last reported annual revenue was $26.19 billion for the fiscal year 2025.

For the fiscal year 2025, the operating margin was 15.81%, derived from an operating profit of $4.14 billion.

The net margin for fiscal year 2025 was 9.93%, based on a net income of $2.60 billion.

2

REVENUE TREND

Revenue and margin for last 3-5 years (table format)

Year	Annual Revenue (in billions USD)	Operating Margin	Net Margin
2025	$26.19	15.81%	9.93%
2024	$25.10	15.01% (Calculated from $3.767B Operating Income / $25.10B Revenue)	9.46% (Calculated from $2.375B Net Income / $25.10B Revenue)
2023	$23.71	16.29% (Calculated from $3.864B Operating Income / $23.71B Revenue)	13.00% (Calculated from $3.083B Net Income / $23.71B Revenue)
2022	$20.77	Not publicly available for reported income and margin.	Not publicly available for reported income and margin.
2021	$13.86	Not publicly available for reported income and margin.	Not publicly available for reported income and margin.

3

EMPLOYEES

Total global headcount. Break down by high-cost locations (US, UK, Germany, Australia, Canada) if available.

Total global headcount: 414,000 as of December 31, 2025.

Breakdown by high-cost locations (US, UK, Germany, Australia, Canada): Not publicly available.

4

INDIA PRESENCE

India GCC, delivery center, or R&D center? If yes, headcount and location.

Marriott International is expanding its operational presence in India through its collaboration with The Fern Hotels & Resorts. As of May 21, 2026, 75 hotels have been signed and 50 are already open, adding over 3,556 rooms under the "Series by Marriott" brand across 43 Indian cities since its November 2025 debut.

Specific information regarding an India Global Capability Center (GCC), delivery center, or R&D center with associated headcount and location is not publicly available.

5

RECENT NEWS

Last 6 months. Split: (a) Product News (b) Company News.

(Last 6 months: Approximately December 2025 - May 2026)

(a) Product News

- Marriott and The Fern Hotels & Resorts announced 75 signings and 50 openings for Series by Marriott in India, expanding the midscale and upscale lodging segments. (May 21, 2026)

- Marriott International and the Leali family announced a joint venture to add the luxury wellness brand Lefay to Marriott's portfolio, marking Marriott's first brand exclusively dedicated to luxury wellness. Lefay has two operating resorts and three pipeline properties.

(b) Company News

- Marriott International Executive Vice President and Chief Financial Officer, Jennifer Mason, is scheduled to speak at the Morgan Stanley Travel & Leisure Conference on June 1, 2026. (May 18, 2026)
- Marriott International declared an increase in its quarterly cash dividend to $0.73 per share, payable on June 30, 2026. (May 8, 2026)
- Marriott International reported its first quarter 2026 results, including reported diluted EPS of $2.43 and adjusted diluted EPS of $2.72. The company also reported first quarter net income of $648 million and adjusted net income of $726 million, with worldwide RevPAR increasing by 4.2% and adjusted EBITDA reaching $1,398 million. (May 6, 2026)
- Portman Hospitality Fund I, LP announced the acquisition of the Westin Peachtree Plaza in downtown Atlanta from Marriott. The hotel will remain in Marriott's portfolio under a long-term management agreement. (May 28, 2026)
- Marriott International reported its fourth quarter and full-year 2025 results. For the full year 2025, adjusted EBITDA totaled $5.38 billion, an 8% increase, and net rooms grew over 4.3% from year-end 2024. (February 10, 2026)

6 M&A ACTIVITY

Acquisitions, mergers, divestitures or investment rounds in last 2 years.

(Last 2 years: Approximately June 2024 - May 2026)

- Acquisitions/Joint Ventures: Marriott International and the Leali family announced a joint venture to incorporate the luxury wellness brand Lefay into Marriott's portfolio.
- Divestitures: Portman Hospitality Fund I, LP acquired the Westin Peachtree Plaza in Atlanta from Marriott. (May 28, 2026)
- Investment Rounds: Not publicly available for specific investment rounds in the last two years. Marriott has previously invested in companies such as Groups360 and PlacePass.

7 OWNERSHIP STRUCTURE

Public (ticker+exchange), Private, PE-backed, or Family-owned.

Marriott International is a publicly traded company.

- Ticker & Exchange: MAR on NASDAQ.
- The ownership is predominantly held by institutional investors, accounting for approximately 65% of the company's shares as of July 2025, with top shareholders including Vanguard Group Inc. and BlackRock, Inc.
- Members of the Marriott family are also significant insider shareholders.

8 KEY COMPETITORS

Top 3-5 direct competitors.

- Hilton Worldwide
- Hyatt Hotels Corporation
- InterContinental Hotels Group (IHG)
- Accor
- Wyndham Hotels & Resorts

[GAP FILL] Marriott's revenue operating margin was:

- 2021: 8.52%
- 2022: 14.99%

- 2023: 14.25%

🎯 STRATEGIC DIRECTION

Marriott International's corporate strategy for the next 12-18 months is characterized by an aggressive global expansion, a deep commitment to digital transformation and AI integration, and a focus on operational efficiencies and sustainability.

1. CORPORATE VISION & DIRECTION

Marriott's leadership is steering the company towards continued global growth, enhancing its loyalty ecosystem, and adapting to evolving traveler preferences. CEO Anthony Capuano emphasizes a strategy to "ensure that we have the right product offer everywhere they need to travel for every trip purpose".

- Growth Outlook: Marriott anticipates net rooms growth of 5.5% to 6% for the full year 2024, and a compound annual growth rate of 5% to 5.5% from year-end 2022 to year-end 2025. The company reported a record 123,000 gross room openings in 2024, with over 577,000 rooms in its development pipeline at year-end.
- Financial Performance: For the full year 2024, adjusted EBITDA is expected to increase between 7% and 9%, reaching approximately $5 billion to $5.1 billion. Adjusted EPS for 2024 is projected to be between $9.31 and $9.65. Gross fee revenues are forecasted to rise 7% to 9%, to $5.2 billion to $5.3 billion, driven by strong credit card and residential branding fee growth.
- Loyalty and Experiences: Capuano states that Marriott aims "to be at the center of how people dream, plan, and ultimately experience travel," through strengthening digital engagement, personalization, and strategic partnerships. The Marriott Bonvoy program surpassed 210 million members globally by mid-2024, with a focus on experiential luxury and aspirational value. Partnerships with Starbucks, Uber, the NFL, and the Mercedes Formula One racing team are expected to yield dividends in 2025.
- Consumer Bifurcation: Capuano has noted a "noticeable bifurcation of the American consumer," with younger consumers prioritizing travel and experiences. Marriott is responding by developing offerings for both luxury travelers and those with "more modest income households".

2. BIG STRATEGIC INITIATIVES

Marriott is pursuing several strategic initiatives focused on expansion across diverse segments, aggressive sustainability targets, and cost optimization.

- Global Expansion: Marriott plans to add between 230,000 and 270,000 net rooms between year-end 2022 and 2025, expanding its global portfolio to nearly 1.8 million rooms. This growth spans luxury, midscale, and extended-stay segments.
- Luxury Segment: Marriott has the industry's largest luxury hotel portfolio and pipeline, with 225 luxury hotels in the pipeline through 2025. In 2024, 19% of signed deals in the Asia-Pacific region were luxury projects. The Ritz-Carlton Yacht Collection is also expanding, with a second superyacht launched in 2024 and a third anticipated in summer 2025.
- Midscale & Extended Stay: The company is significantly expanding its presence in the affordable midscale segment. This includes the acquisition of the City Express brand in 2023, which increased its footprint in the Caribbean & Latin America region by approximately 45%. City Express by Marriott is anticipated to expand into the U.S. and Canada, as well as several countries in Latin America. StudioRes, an extended-stay midscale brand in the U.S. and Canada, had its first groundbreaking in January 2024 and anticipates its first opening later in 2024.
- Nontraditional Offerings: Marriott is bolstering its nontraditional offerings, including the acquisition of the Postcard Cabins brand (formerly Getaway Outposts) and an agreement with Trailborn to expand outdoor-focused lodging options. In August 2024, Marriott also signed a long-term licensing agreement with Sonder Holdings, adding over 9,000 rooms to its portfolio.
- Sustainability (Serve 360): Marriott's "Serve 360: Doing Good in Every Direction" platform guides its 2025 Sustainability and Social Impact Goals.
- Environmental Targets (by 2025): Reduce carbon intensity by 30%, water intensity by 15%, and waste to landfill by 45% (with a 50% cut in food waste). The company aims to achieve 30% renewable electricity across its portfolio.
- Responsible Operations: Marriott is committed to having 100% of properties certified to a recognized green building standard, with 650 hotels pursuing LEED or equivalent certification by 2025. Initiatives include transitioning to residential-sized bath amenities to prevent 500 million small bottles from landfills annually.
- Social Impact: Goals include training all on-property associates in human rights and human trafficking awareness by 2025, reaching a milestone of one million associates trained in December 2022. The company aims to achieve gender parity in global leadership and increase the representation of people of color to 25% in U.S. executive roles.

- Cost Transformation & Efficiency: Marriott announced plans to enhance effectiveness and efficiency across the company, expecting to yield $80 million to $90 million in annual general and administrative (G&A) cost reductions starting in 2025. CFO and Executive Vice President of Development Leeny Oberg stated these efforts would also deliver cost savings to hotel owners and franchisees.

3. TECHNOLOGY STRATEGY

Marriott is undertaking a significant multi-year digital transformation with a strong emphasis on cloud-native platforms and the strategic adoption of AI.

- Cloud Migration & Platform Consolidation: Marriott is accelerating one of the most ambitious technology overhauls in its history, committing $1.1 billion in investment spending in 2026, with over one-third directed towards digital and technology transformation. The company is moving core platforms to cloud-native environments and is currently beta-launching next-generation central reservations, property management, and loyalty platforms at six properties, with a phased rollout planned over the next 18 months. This replatforming is designed around unified guest data, API-first integrations, and real-time analytics. Marriott leverages AWS for its cloud infrastructure and utilizes the Snowflake data platform to become a data-driven organization.
- AI Adoption Stance: Marriott's AI strategy is ambitious yet cautious, with a focus on embedding reusable AI capabilities into a cloud-native architecture. Global CIO Naveen Manga described the development of an "agentic mesh"—a shared orchestration layer in its horizontal AI architecture that enables once-developed AI capabilities to be reused across multiple functions.
- Prioritized Use Cases: Marriott is prioritizing approximately 10 high-value AI use cases in 2025. This includes embedding generative AI into customer-facing tools, such as its AWS-backed Travel Assistant, and developing AI-powered virtual concierges like RENAI at Renaissance Hotels. Other applications include generative AI for SEO content generation, contact-center coaching, and trial trip-planning tools for Bonvoy members. Marriott is also piloting Microsoft 365 Copilot across thousands of associates for tasks like meeting summaries and transcriptions.
- Ethical AI & Governance: Marriott is reinforcing its security and privacy posture by aligning AI deployments with strict governance and ethical standards, emphasizing trust, accountability, prioritization, and human-centered innovation.
- Vendor Relationships & Build vs. Buy: Marriott partners with key technology providers to support its transformation. It has selected Agilysys as its property management solution provider for its luxury, premium, and select-service properties in the U.S. and Canada. The company also signed a Master Service Agreement with Shiji to expand the deployment of Infrasys Cloud POS and selected SevenRooms as its preferred restaurant technology partner. For human capital management, Marriott chose Oracle Fusion Cloud Human Capital Management (HCM) to manage its global workforce, collaborating with Accenture on the transformation strategy and implementation.

👥 LEADERSHIP & ORG

1 KEY DECISION MAKERS

- CEO: Anthony "Tony" Capuano
- Tenure: Appointed Chief Executive Officer in February 2021. He joined Marriott in 1995.
- Background: Prior to becoming CEO, Capuano served as Group President, Global Development, Design and Operations Services, where he was responsible for leading global development and design efforts and overseeing the company's global operations discipline. He holds a bachelor's degree in Hotel Administration from Cornell University.
- CFO: Kathleen "Leeny" K. Oberg (retiring March 31, 2026) / Jen Mason (appointed effective April 1, 2026)
- Leeny Oberg Tenure: Appointed Executive Vice President and Chief Financial Officer effective January 1, 2016. In February 2023, she was also designated Executive Vice President, Development. She will retire on March 31, 2026.
- Leeny Oberg Background: Oberg joined Marriott in 1999 in Investor Relations. She previously served as CFO for The Ritz-Carlton Hotel Company (2013-2015) and held various financial leadership positions within Marriott and other organizations like Sodexo, Sallie Mae, Goldman Sachs, and Chase Manhattan Bank.
- Jen Mason Tenure: Will assume the role of Executive Vice President and Chief Financial Officer effective April 1, 2026, succeeding Leeny Oberg. Mason joined Marriott in 1992.
- Jen Mason Background: Currently serves as Global Officer, Treasurer and Risk Management, overseeing global capital market activities, hotel financing, financial strategy, capital allocation, financial risk management, and global capital transactions.
- CTO/CDO: Drew Pinto (EVP, Chief Revenue & Technology Officer) & Naveen Manga (Global Chief Technology Officer)
- Drew Pinto Tenure: Appointed Executive Vice President and Chief Revenue & Technology Officer in February 2023. He has spent approximately 18-22 years at Marriott in leadership roles.
- Drew Pinto Background: Leads IT, digital, sales, revenue management, and distribution channels. His portfolio encompasses channels representing over $35 billion in revenue. He previously worked at Accenture and the U.S. Department of Justice.
- Naveen Manga Tenure: Global Chief Technology Officer since August 2021.
- Naveen Manga Background: Responsible for global technology strategy, innovation, and transformation to support growth and drive long-term business value. He has over 20 years of business technology leadership experience, including 10 years at Hilton prior to Marriott.
- COO: Marriott International operates with a decentralized operational structure, featuring continent or regional Presidents and Chief Operating Officers rather than a single global COO.
- Satya Anand: Effective March 28, 2026, will become Group President, U.S., Canada and Caribbean and Latin America (CALA). He is a 37-year Marriott veteran, having held various leadership roles across operations, finance, and design, including President of the Europe, Middle East and Africa (EMEA) region.
- Neal Jones: Effective March 28, 2026, will assume the role of President, EMEA. Previously, he was Chief Operating Officer for Europe and Africa.
- Federico "Fede" Greppi: Effective March 28, 2026, will step into the role of President, CALA. He was previously Chief Operating Officer for CALA.

2 RECENT LEADERSHIP CHANGES

(Timing Signals)

- Leeny Oberg's Retirement and Successor Appointments: Leeny Oberg, CFO and EVP, Development, announced her retirement effective March 31, 2026. Jen Mason will succeed her as EVP and CFO, and Shawn Hill will become Chief Development Officer, both effective in 2026. This signals a significant transition in the company's financial and development leadership.
- Continent Leadership Realignment (Effective March 28, 2026):

- Retirements: Liam Brown (Group President, U.S. and Canada) and Brian King (President, Enterprise Transformation & Caribbean and Latin America) will step down from their roles at the end of March 2026 and retire from the company at the end of June 2026. This indicates a generational shift in key regional leadership.
- New Appointments:
- Satya Anand moved from President, EMEA, to Group President, U.S., Canada and CALA, unifying these regions under a single leadership structure.
- Neal Jones promoted to President, EMEA.
- Federico "Fede" Greppi promoted to President, CALA.

These changes, effective in Q1 2026, represent a strategic realignment to streamline operations and enhance collaboration across global regions, indicating an opportune time for engagement.

3 ORG STRUCTURE SIGNALS

- Technology is centralized globally. The existence of a Global Chief Technology Officer (Naveen Manga) responsible for global technology strategy and transformation, alongside an Executive Vice President and Chief Revenue & Technology Officer (Drew Pinto) who leads IT, digital, sales, revenue management, and distribution channels, strongly suggests a centralized technology structure. This approach aims to align technology objectives with business growth and enhance guest experiences globally. Marriott has also mentioned an "imminent technology transformation," implying a unified, overarching strategy rather than fragmented regional or business unit control.

4 BOARD COMPOSITION

- Key Board Members:
- David S. Marriott: Chairman of the Board.
- Anthony G. Capuano: President and Chief Executive Officer.
- Other notable independent directors include Isabella D. (Bella) Goren, Frederick A. “Fritz” Henderson, Lauren R. Hobart, Debra L. (Debi) Lee, Aylwin B. Lewis, Margaret M. (Meg) McCarthy, Grant F. Reid, Horacio D. Rozanski, Susan C. Schwab, and Sean C. Tresvant. Deborah Marriott Harrison also serves as Global Cultural Ambassador Emeritus.
- PE Representation: There is no explicit information indicating private equity representation on the Board of Directors in the search results.
- Notable Strategic Investors:
- Institutional Investors: Collectively, institutional investors hold the largest portion of Marriott International stock, ranging from approximately 59% to 65% of shares.
- Top Institutional Shareholders: The leading institutional investors include Vanguard Group Inc., BlackRock, Inc., State Street Corp., Wellington Management Group LLP, Fidelity Investments (FMR), Geode Capital Management, LLC, Morgan Stanley, Massachusetts Financial Services CO, JPMorgan Chase & CO., and Invesco Ltd.
- Marriott Family: Members of the Marriott family, such as John Willard Marriott Jr. and Richard E. Marriott, are significant insider shareholders, holding substantial stakes in the company.

[GAP FILL] Jen Mason will assume the role of Executive Vice President and Chief Financial Officer at Marriott International effective March 31, 2026.

She joined Marriott in 1992 and currently serves as Global Officer, Treasurer and Risk Management. Her previous roles at Marriott include CFO for the U.S. & Canada division (2016-2022), Senior Vice President of IT Business Partnership & Planning, and Senior Vice President, Sales & Marketing Planning Support. Earlier in her career at Marriott, she held positions in Internal Audit, Corporate Financial Planning & Analysis, Lodging Finance, and Business Development.

[GAP FILL] Marriott International's Global Chief Technology Officer (CTO) for 2024 and 2025 is Naveen Manga. He has held this position since August 2021. As Global CTO, Manga is responsible for shaping technology strategy, driving transformation, and fostering sustainable innovation for the company. Drew Pinto also serves as Marriott International's Executive Vice President and Chief Revenue and Technology Officer.

📡 BUYING SIGNALS

📡 BUYING SIGNALS

Here are identified buying signals and pain points for Marriott:

1 FINANCIAL STRESS SIGNALS

- Cost-cutting: Marriott announced plans to cut $80-90 million in costs starting in 2025, primarily from general and administrative expenses, with intentions to deliver additional savings to hotel owners and franchisees. This initiative followed Marriott missing profit estimates and lowering its earnings guidance for Q3 2024. Marriott also expects average fees per room to grow in 2024 and 2025 despite a push into midscale, driven by strong momentum in the luxury tier and growth in incentive management fees.
- Layoffs: Marriott initiated layoffs of a portion of its customer engagement center workforce in October 2025. This came roughly a year after a company-wide restructuring that resulted in more than 800 corporate employee layoffs in late 2024/early 2025. Marriott Vacations Worldwide also laid off 136 employees from its Lakeland office in August 2025.
- Restructuring: Marriott underwent a company-wide restructuring in late 2024/early 2025, which included corporate layoffs. Further leadership restructuring, unifying regions and appointing new presidents, was announced in January 2026, effective March 28, 2026.
- Net Debt: Adjustments to Marriott's financial model, specifically modifications to net debt calculations, could indicate potential constraints on the company's financial flexibility.

2 TECHNOLOGY PAIN SIGNALS

- Legacy System Mentions & Tech Debt: Marriott is undertaking a significant, multi-year technology overhaul, investing over $1.1 billion in 2026, with more than one-third dedicated to replatforming its three core systems: property management system, central reservations infrastructure, and loyalty platform. These systems have been referred to as "old" and "ancient," limiting capabilities. The entire hotel industry, including Marriott, is reportedly grappling with old technology and fragmented ecosystems, particularly with property management systems. Marriott's past data breaches are cited as an example of unexamined technical debt becoming "forgotten operational debt".

3 OPERATIONAL PAIN SIGNALS

- Supply Chain Issues: Marriott maintains a formal complaints procedure related to the German Supply Chain Duty of Care Act (LkSG) for human rights or environmental risks in its supply chain, indicating proactive management of potential vulnerabilities. Marriott's Global Procurement organization is crucial for achieving sustainability targets in its supply chain. Procurement professionals face challenges in ensuring timely delivery, managing supplier relationships, and handling fluctuating conditions. An older initiative involved streamlining its supply chain after the Starwood merger to reduce costs.
- Compliance Challenges: Marriott reached a $52 million settlement with the FTC in October 2024 for failing to implement reasonable data security, which led to three data breaches between 2014 and 2020 impacting over 344 million customers. The FTC's consent order, finalized in December 2024, mandates a comprehensive information security program and regular third-party assessments for 20 years. In June 2024, Marriott also agreed with the U.S. Attorney's Office to address barriers in reserving accessible rooms, indicating ADA compliance issues.
- Scaling Problems: While Marriott experienced significant global growth in 2025, adding over 700 properties and nearly 100,000 rooms, and has a substantial development pipeline, the complexity of rolling out new core systems across its extensive portfolio (over 8,500 properties, largely franchised) presents a significant coordination challenge.

4 HIRING SIGNALS

- Cost Pressure/Restructuring: The layoffs of over 800 corporate employees in late 2024/early 2025 and a portion of its customer engagement center workforce in October 2025 indicate cost pressure and a restructuring effort towards greater efficiency. Some reports suggest these layoffs are partly due to a shift towards AI-driven solutions.

Marriott plans to add "several hundred new positions" as part of its restructuring, with many impacted employees expected to transition into these new roles, suggesting a reshaping of the workforce rather than a broad freeze.

5 **TIMING TRIGGERS**

- New Leadership: Marriott announced a significant leadership restructuring in January 2026, with two long-time leaders retiring and three new presidents appointed to oversee key global regions, effective March 28, 2026. This includes consolidating the U.S., Canada, and Caribbean & Latin America regions under a single leadership structure.
- Post-M&A Integration: Marriott completed the acquisition of the citizenM brand in July 2025, with its portfolio integrated into Marriott's platforms in Q4 2025. The ongoing ramifications of the 2016 Starwood acquisition continue to include addressing past data breaches and associated compliance mandates.
- Regulatory Deadline: The FTC's consent order, finalized in December 2024, mandates a comprehensive information security program and ongoing third-party assessments for Marriott for 20 years. A June 2024 agreement with the U.S. Attorney's Office also set new requirements for ADA compliance regarding accessible room reservations.
- Announced Transformation: Marriott is engaged in an "ambitious technology overhaul" and "worldwide technology transformation," with $1.1 billion in investment spending in 2026, focusing on replatforming its core systems and leveraging AI. This multi-year effort is aimed at modernizing its technology infrastructure and is an ongoing strategic initiative.
- World Cup RevPAR Tailwind: Marriott anticipates a 30 to 35 basis points lift in global Revenue Per Available Room (RevPAR) due to the World Cup.

[GAP FILL] Marriott will lay off 136 employees in Lakeland, FL, effective October 7, 2025, as part of Marriott Vacations Worldwide's new operating model. Additionally, a "very small subset" of Marriott's Customer Engagement Center workforce will be impacted by organizational changes in October 2025. This includes around 45 jobs eliminated in Wichita and Omaha as of October 2, 2025, with more layoffs expected across global customer engagement centers.

🔍 COMPETITIVE & VENDORS

Marriott International maintains a complex and evolving technological landscape, driven by ongoing digital transformation and a focus on enhancing guest and associate experiences.

1. Current Tech Vendors

Marriott leverages a diverse range of technology vendors for its core operations:

- ERP: Marriott has a long-standing partnership with Oracle, which encompasses financial and recruiting functions. Accenture was involved in implementing Marriott's Oracle-based accounting platform.
- CRM: Salesforce is a key CRM vendor for Marriott, powering its global customer recognition platform. This includes implementations like Empower Guest Experiences (GXP) and Empower Account Relationship Management (ARM), used by over 100,000 associates across various teams. Marriott also utilizes Salesforce Datorama for marketing intelligence.
- HCM: Oracle Fusion Cloud Human Capital Management (HCM) is implemented across Marriott's global operations, providing a secure foundation for HR data, talent management, and analytics.
- Cloud: Marriott employs a multi-cloud architecture, utilizing both Oracle Cloud Infrastructure (OCI) and Microsoft Azure. Historically, the Marriott Data Platform moved to Amazon Web Services (AWS), and IBM Cloud was used for rapid analytics and supporting the Marriott Bonvoy platform. The company is actively developing a cloud-native infrastructure as part of its digital transformation.
- Data Platforms: Snowflake serves as a data warehouse to simplify Marriott's tech stack, improve data ingestion, and enable faster analytics. Oracle Analytics Cloud is used to create insightful dashboards from HCM data. The Marriott Data Platform, initially on AWS, utilized technologies like Spark and Terraform.
- Other Key Technologies: Marriott has selected Oracle Hospitality OPERA Cloud property management system (PMS) and Sales and Event Management as its hospitality cloud platform. NICE CXone is the chosen customer experience platform for Marriott's global contact centers. The company is also in the process of replatforming its central reservation system, property management system, and loyalty platform, with beta launches initiated in several hotels. Furthermore, Marriott is heavily investing in AI and generative AI technologies to enhance operations and customer experience.

2. Known SI/Consulting Partners

Marriott collaborates with several prominent system integrators and consulting partners:

- Accenture: A long-term and strategic partner, Accenture has provided a range of services to Marriott, including management consulting, IT projects (like the marriott.com website), and implementing Marriott's Oracle-based accounting platform. Accenture was a key partner in the technology enablement and implementation of Oracle Cloud HCM. The firms also collaborated on a significant F&A BPO services agreement, leading to the formation of Accenture Hospitality Services (AHS). More recently, Accenture and Marriott in India launched a skill development program for youth in the hospitality sector.
- Oracle Customer Success Services: Works in partnership with Accenture to provide ongoing support and strategic guidance to maximize the value from Marriott's Oracle Cloud HCM system.
- NiCE: Partnered with Marriott for the implementation of the CXone customer experience platform across its global contact centers.

3. Procurement Signals

Marriott's procurement activities indicate a strong focus on technological advancement and operational efficiency:

- Public RFPs: Marriott utilizes Request for Proposals (RFPs) for sourcing various services, particularly for meetings and events. The company has adopted an AI-powered RFP process to streamline content development, improve customer service, and enhance intelligence. Marriott sales representatives are noted for their prompt responses to event RFPs.
- Job Postings: Recent job postings signal ongoing investment and evaluation in key technology areas. These include roles such as "Senior Software Engineer – Data and Analytics Technology," "Senior Software Engineering - Data Platforms – Clean Room Technologies," "FLEX Customer 360, Senior Data Engineer," "Senior Manager, Category Management – IT," and "Vice President, AI Technology." These positions highlight Marriott's commitment to developing and managing advanced data, cloud, and AI platforms. Marriott is investing over $1 billion annually in next-generation hospitality technology stacks, underscoring significant procurement in these areas.

4. Competitive Dynamics

Marriott International holds a leading position in the global hospitality sector but faces strong competition:

- Top 2-3 Competitors: Marriott's primary competitors include Hilton Worldwide, InterContinental Hotels Group (IHG), and Hyatt Hotels Corporation. Other significant rivals include Accor, Wyndham Hotels & Resorts, and Choice Hotels International. The rise of alternative accommodation platforms like Airbnb also presents a competitive challenge.
- Gaining or Losing Market Share: Marriott International is recognized as the world's largest hotel company by room count, operating approximately 9,500 properties with over 1.7 million rooms as of early 2025. The company experienced a net room growth of 6.8% in 2024, adding over 123,000 gross rooms. In the US Hotels & Motels industry, Marriott commands an estimated 6.1% of total industry revenue and is considered an "All Star" due to strong market share, profit, and revenue growth. Marriott's revenue is ranked first among its top ten competitors. While Marriott maintains a dominant position, its revenue decreased by 1.3% over the last four quarters (Q2 2025 - Q1 2026). Competitors like Hilton employ similar asset-light strategies and strong loyalty programs, intensifying the battle for market share. IHG is also a formidable competitor with a highly asset-light model and strong presence in Europe and China. Marriott is actively investing over a billion dollars annually in digital transformation, cloud-native platforms, and AI to sustain and grow its competitive advantage.

[GAP FILL] Marriott International selected Oracle Hospitality OPERA Cloud Property Management System (PMS) as its hospitality cloud platform for luxury, premium, select-service, and midscale properties in 2024. This system is built on Oracle Cloud Infrastructure (OCI) and aims to streamline hotel operations, enhance guest-facing services, and centralize data across Marriott's global footprint. Marriott is also migrating from its older Opera V5 system to the Oracle Opera Cloud PMS.

⚡ SALES PLAY

1. RECOMMENDED PITCH ANGLE

Lead with a Technology Transformation Enablement play, specifically focused on accelerating the multi-year core system replatform while managing technical debt and operational risk.

Marriott is in the middle of an ambitious $1.1B technology overhaul targeting property management, central reservations, and loyalty platforms described internally as "old" and "ancient." The beta launch at six properties signals the critical rollout phase across 8,500+ properties over the next 18 months. With past data breaches costing them $52M in FTC settlements and mandating 20 years of third-party security assessments, Marriott needs partners who can de-risk their transformation, accelerate cloud-native migration, and ensure the replatformed systems don't inherit legacy technical debt. The timing is perfect: new CFO Jen Mason takes over April 1, 2026, new regional presidents assume roles March 28, 2026, and Drew Pinto's revenue and technology organization is prioritizing approximately 10 high-value AI use cases for 2025 that depend on this modern infrastructure foundation.

2. CONVERSATION OPENER QUESTIONS

Q1: With the beta launch of your next-generation property management, central reservations, and loyalty platforms now underway at six properties, what are the top two or three integration or data migration challenges you're encountering as you plan the phased rollout to the remaining 8,500+ properties over the next 18 months?

Q2: Naveen mentioned building an "agentic mesh" horizontal AI architecture to enable AI capabilities to be reused across functions. As you embed generative AI into customer-facing tools like the Travel Assistant and RENAI virtual concierge, how are you ensuring the underlying replatformed systems can support real-time orchestration and API-first integrations at scale?

Q3: Given the FTC consent order requiring a comprehensive information security program and third-party assessments for 20 years following the data breaches, how is your team balancing the velocity of the cloud-native transformation with the heightened security and compliance governance requirements?

Q4: You've consolidated U.S., Canada, and Caribbean & Latin America under Satya Anand's leadership effective March 28, 2026. How is this regional realignment influencing technology standardization priorities, especially as you roll out Oracle OPERA Cloud PMS and scale the Salesforce GXP platform across different franchise ownership models?

Q5: With over one-third of your $1.1B 2026 investment budget directed to digital and technology transformation, and $80-90M in annual G&A cost reductions starting in 2025, where are you seeing the biggest ROI tension between modernization spend and near-term efficiency targets?

3. LANDMINES TO AVOID

Avoid mentioning the Starwood acquisition as a current integration challenge. That merger happened in 2016, and while legacy issues like data breaches persist, framing it as an active M&A integration will signal you're working from outdated research. The citizenM acquisition completed in July 2025 is recent but was already integrated into platforms in Q4 2025.

Do not suggest replacing Oracle or Salesforce. Marriott has deep, strategic partnerships with both vendors, including Oracle Fusion Cloud HCM globally, Oracle OPERA Cloud PMS for properties, and Salesforce powering GXP and ARM for 100,000+ associates. Positioning your solution as a replacement rather than an accelerator or complementary layer will immediately disqualify you.

Do not lead with labor cost reduction or workforce replacement themes tied to AI. Marriott just went through two rounds of layoffs in late 2024 and October 2025, cutting over 800 corporate employees and customer engagement center staff, partly attributed to AI-driven automation. Leadership is sensitive to workforce impact, especially with ongoing FTC scrutiny and sustainability commitments around human rights training for associates.

Avoid generic hospitality industry talking points. Marriott knows it is the largest hotel company by room count and understands its competitive positioning against Hilton, IHG, Hyatt, and Accor. Do not waste time educating them on their own market dynamics or basic trends like bleisure travel or loyalty program importance.

4. SUGGESTED NEXT STEP

Request a 45-minute technical discovery workshop with representation from Drew Pinto's Revenue and Technology organization and Naveen Manga's Global CTO team, specifically focused on reviewing the architecture roadmap for the core system replatform and identifying high-risk integration points or data governance gaps that could impact the 18-month rollout timeline. Position this as a no-obligation audit of transformation acceleration opportunities, with a specific output: a prioritized list of three technical bottlenecks your solution could address before the rollout scales beyond the initial beta properties.

5. BEST ENTRY POINT

The best entry point is Drew Pinto, Executive Vice President and Chief Revenue & Technology Officer.

Pinto owns IT, digital, sales, revenue management, and distribution channels representing over $35 billion in revenue, and his organization is directly accountable for the successful rollout of the replatformed property management, central reservations, and loyalty systems. He is also responsible for embedding the approximately 10 prioritized AI use cases into revenue-generating operations in 2025, making him the executive whose success metrics are most directly tied to accelerating the technology transformation. With 18-22 years at Marriott and a background at Accenture, he understands both the strategic consulting value and the operational execution risk of large-scale enterprise system implementations. His appointment as Chief Revenue & Technology Officer in February 2023 consolidated revenue and technology leadership, signaling that transformation decisions are not happening in an IT silo but are directly connected to business performance. Given the upcoming leadership transitions with the new CFO Jen Mason taking over April 1, 2026, Pinto is the stable executive sponsor who can champion a new partner relationship through organizational change. Naveen Manga as Global CTO would be the secondary contact for technical validation, but Pinto controls the budget, owns the business case, and has the enterprise-wide mandate to de-risk the transformation.
