PRE-SALES INTELLIGENCE BRIEF

Landal GreenParks

📅 2 June 2026 ⚠️ Verify before use

🏢 COMPANY SNAPSHOT

REVENUE & MARGIN:

Landal GreenParks reported a gross annual turnover of €646 million in 2022. In 2021, the gross annual turnover was €550 million. For 2020, the turnover was €405 million. Landal's reported 2023 figures consolidate eight months of business following its merger with Roompot. Following the acquisition and merger, the combined entity (now operating as Landal) had an expected revenue of approximately €920 million-€930 million UNVERIFIED and an estimated adjusted EBITDA of about €165 million in 2024 UNVERIFIED. The EBITDA margin is projected to be 17.0%-18.0% for 2024 UNVERIFIED, improving to 23%-24% in 2025. Operating and net margins for Landal GreenParks specifically prior to the merger are not publicly available in the provided search results.

REVENUE TREND:

Year	Gross Annual Turnover (Millions EUR)
2022	€646
2021	€550
2020	€405
2019	€491
2017	€448

Operating and net margins for Landal GreenParks for these specific years are not publicly available.

EMPLOYEES:

Landal GreenParks employs a staff of approximately 3,500 ASSUMED people across its parks and various offices. Another source states around 5,200 people across its parks and office locations (which include Amsterdam, Goes, Zwolle, Trier, and Varde) since the merger with Roompot in 2023.

Breakdown by high-cost locations (US, UK, Germany, Australia, Canada): Not publicly available for Landal GreenParks specifically. However, Landal operates parks in the UK and Germany.

INDIA PRESENCE:

Not publicly available.

RECENT NEWS (Last 6 months):

(a) Product News:

- May 22, 2026: Landal announced new Dutch escapes, including beach houses and private-pool villas.
- April 20, 2026: Travel inspiration was offered for May Half Term Escapes with Spring Savings.

(b) Company News:

- April 30, 2026: News regarding a fire near Weerterbergen was reported.
- December 19, 2024: The new Landal brand, formed by the merger of Roompot and Landal GreenParks, was highlighted as a leader in varied holidays and accommodation in Europe. It was also mentioned that the new Landal will have a central, international headquarters in Amsterdam by 2025.
- December 4, 2024: S&P Global Ratings reported on Sandy Holdco B.V. (the merged entity of Roompot and Landal), noting it is the largest holiday park operator in Europe and is refocusing efforts on integrating Landal.

M&A ACTIVITY (Last 2 years):

- April 2023: The Dutch Consumer and Market Authority (ACM) approved the merger of Roompot and Landal GreenParks. The combined entity now operates under the name 'Landal'. This merger was with Roompot, which is owned by American investment fund KKR & Co.
- In 2023, Platinum Equity sold the shares of Landal to Roompot, with the help of investment fund KKR.

OWNERSHIP STRUCTURE:

Landal is PE-backed. Shares of the private limited company have been held by international investors since 1996. Since the merger with Roompot in 2023, it has been owned by American investment fund KKR & Co.

KEY COMPETITORS:

While not explicitly listed as "competitors" in the search results, the following companies or brands are mentioned in contexts that suggest they operate in the same market space:

- Center Parcs
- Dormio Group
- Roompot (prior to merger, now merged with Landal)
- Other self-catering brands under Awaze (which Landal GreenParks was part of) such as cottages.com, Hoseasons, James Villa Holidays, and Novasol

> GAP FILL
>
> For Landal GreenParks, as part of the merged entity Sandy Holdco B.V. (which includes Roompot), the forecast adjusted EBITDA margin is 17.0%-18.0% for 2024, improving to 23%-24% in 2025.

Net profit margin data is not available in the provided search results.

> GAP FILL
>
> Landal GreenParks' 2022 gross annual turnover was €646 million. After its acquisition by Roompot in April 2023, the combined entity (referred to as Sandy) had a revenue of €913 million in 2023.

🎯 STRATEGIC DIRECTION

Landal GreenParks' corporate strategy, particularly following its merger with Roompot and subsequent rebranding to Landal, is focused on cementing its position as the European market leader in nature-based holidays, driven by international growth, comprehensive sustainability, and enhanced digital guest experiences.

1. CORPORATE VISION & DIRECTION

Leadership is steering Landal towards becoming the "undisputed European market leader in holidays in nature" over the next 12-18 months. This vision is underpinned by the successful integration of Roompot and Landal GreenParks into a single entity, operating under the unified "Landal" brand.

A central, international headquarters in Amsterdam was established in 2025 to "further professionalise the organisation and work towards a future centred on cooperation and connection". This move is intended to enable "more efficient collaboration and stronger connections with colleagues both in the Netherlands and internationally".

Martin Jermiin was appointed as the new Chief Executive Officer (CEO) effective April 7, 2026, succeeding Mikael Andersson. The Supervisory Board Chairman, Dirk Anbeek, stated that Jermiin "combines a focus on sustainable growth with a powerful brand experience, strategic vision and a solid operational foundation. He is a collaborative leader who will stay close to the parks, the teams, homeowners and the guests". Mikael Andersson, the outgoing CEO, expressed pride in "integrating two strong brands into one unified business to reinforcing our leadership position in the Dutch market."

2. BIG STRATEGIC INITIATIVES

Pan-European Expansion and Consolidation: The core strategic initiative is the integration and expansion following the merger of Roompot and Landal GreenParks. The combined entity aims to offer "the most attractive and most diverse selection of holidays in Europe" with approximately 300 parks and 32,000 accommodations across 11 countries. The full rebranding to "Landal" is slated for completion by the end of 2026. Landal is actively expanding its portfolio with new park openings, including Landal Duynvallei (January 2025), Landal Namur Nature (July 2025), Landal Waterpark Oudehaske (Autumn 2025), and Landal De Wielsche Dreef (July 2026).

Sustainability Mandates (ESG): Sustainability is deeply embedded in Landal's strategy, with a target to be "completely climate-neutral by 2030". The company has outlined six sustainability programs, including:

Carbon Countdown: Since 2025, Landal utilizes "100% sustainable European wind energy, fully CO_2-free." The program focuses on reducing gas consumption through "smart savings," implementing electric heating, building gas- and propane-free properties, and utilizing electric logistics to achieve zero emissions.

Nature Nurture: Aims to strengthen biodiversity and conserve water by managing parks more naturally, avoiding chemicals, and providing more space for wild flora and fauna.

Waste Warrior: Emphasizes conscious purchasing, increased reuse, donation of discarded items, and expanded waste separation efforts to reduce the 11 to 14 kilotons of residual waste produced annually. All Landal parks are Green Key certified, a testament to their sustainable operations.

Employee-Centric Transformation: Landal is committed to being the "best employer in the sector". A new organizational structure and remuneration policy were implemented within nine months post-merger. The "Work Wellness" program aims to ensure pleasant, safe, and fair working conditions, targeting higher scores in engagement, health, and well-being than industry competitors. This also includes testing "smart solutions such as robots" to ease employee workload. CHRO Alrik Boonstra notes, "The new organisation of the offices helps to shape the growth and development of our company in the future. It feels like a sprint now, but ultimately it is of course a marathon that we run with all our colleagues."

3. TECHNOLOGY STRATEGY

Landal's technology strategy is focused on leveraging digitalization to enhance guest experience and operational efficiency, primarily through external partnerships and platform consolidation.

Cloud Migration & Platform Consolidation: The merger with Roompot led to the consolidation of businesses under "one commercial platform and one operating model". Roompot's "expertise in digitalisation and project development" is being utilized to accelerate the development of Landal GreenParks locations. A new Landal website is being developed to offer the complete range of holiday parks.

Vendor Relationships & Build vs. Buy Signals: Landal demonstrates a "buy" approach for specialized technological solutions to enhance guest services. For instance, it has partnered with Salto for a cloud-based access control solution, 'Salto KS', which provides a 'Seamless arrival' feature. This aims to remove the friction of guests waiting at reception, enabling employees to focus on guest interaction. Landal specifically sought a solution that was "easy to integrate into the API and able to grow together with them in their mission to become more technology-driven". The company also launched a Landal app, making it easier to connect with guests and provide information on activities and holiday suggestions.

AI Adoption Stance: While explicit statements on AI adoption are not detailed, the company's interest in "smart solutions such as robots" within its "Work Wellness" program suggests an openness to leveraging advanced technologies to improve operational aspects and employee well-being. The general drive towards digitalization and a seamless digital experience implies a foundational readiness for future AI integration in customer service and operational management.

👥 LEADERSHIP & ORG

Landal GreenParks Leadership

1 KEY DECISION MAKERS

CEO: Martin Jermiin

Start Date: April 7, 2026

Background: Martin Jermiin brings extensive international experience in retail UNVERIFIED and business transformation. He previously served for seven years as CEO of the Danish retail company Flying Tiger Copenhagen, where he played a key role in brand positioning, growth, and expanding their international network.

CFO: Bastiaan Haks

Start Date: June 1, 2024

Background: Bastiaan Haks has extensive experience in corporate finance UNVERIFIED, including as CFO of divisions at the international, data-driven company Unilever. He is highly experienced in investment company, merger and acquisition projects, and has led complex finance system migrations.

CIO: Carla Milovanov

Start Date: June 1, 2024

Background: Carla Milovanov has many years of international experience UNVERIFIED in the travel and hospitality sectors, particularly in the hotel business. She previously led the global hotel and client technology teams at Accor, focusing on the integration of over 30 brands into a single technology stack.

COO: Cees van Vliet

Start Date: August 1, 2024

Background: Cees van Vliet brings significant experience and expertise in Operations UNVERIFIED. Prior to Landal, he was Director of Gamma Netherlands and previously served as COO at Jumbo and Albert Heijn. He is known as a results-driven and people-oriented leader.

Other Confirmed C-suite:

CCO: Tjalling Smit

Start Date: August 1, 2024

Background: Tjalling Smit joined from Nederlandse Spoorwegen, where he was CCO, and previously held commercial director positions at Transavia and Air France-KLM airlines, bringing broad international experience in digital products, revenue management, and marketing.

CHRO: Alrik Boonstra

Confirmed in role: Mentioned as part of the Executive Team in May 2024, no subsequent departure found.

2 RECENT LEADERSHIP CHANGES

CEO Departure: Mikael Andersson stepped down as CEO on January 15, 2026, after six years with the company. He had been appointed CEO in May 2024.

Interim CEO: Martijn Bouquet, Chief Transformation & Strategy Officer, temporarily assumed CEO responsibilities from January 15, 2026, until April 7, 2026.

New CEO Appointment: Martin Jermiin was appointed as the new CEO, effective April 7, 2026.

COO Change: Jeroen Mol stepped down as Chief Operations Officer (COO) in May 2024 due to physical health reasons. Cees van Vliet was appointed as the new COO, effective August 1, 2024.

CFO Change: Coen van der Wel was succeeded by Bastiaan Haks as Chief Financial Officer (CFO) on June 1, 2024.

CIO Appointment: Carla Milovanov was appointed Chief Information Officer (CIO) on June 1, 2024.

CCO Appointment: Tjalling Smit was appointed Chief Commercial Officer (CCO) effective August 1, 2024.

CDO Departure: Belinde Bakker, who served as Chief Development Officer (CDO), departed Landal GreenParks to become the new General Director of Diergaarde Blijdorp as of February 1, 2026.

3 ORG STRUCTURE SIGNALS

Following the merger of Landal GreenParks and Roompot in 2023, the company now operates as a unified organization under the single "Landal" brand. This includes a single commercial platform and one operating model.

A central, international headquarters was established in Amsterdam by 2025, aimed at professionalizing the organization and fostering efficient collaboration between colleagues across different countries and parks.

The initial focus of the Chief Information Officer (CIO) was on the integration and harmonization of the digital systems of Roompot and Landal GreenParks, indicating a centralized approach to technology infrastructure and strategy.

4 BOARD COMPOSITION

Landal GreenParks (after its merger with Roompot) is owned by the American investment fund Kohlberg Kravis Roberts & Co (KKR). KKR acquired Roompot in 2020.

Dirk Anbeek serves as the Chairman of the Supervisory Board, a role he assumed on October 16, 2023. He previously oversaw the carve-out of Landal from Awaze/Wyndham.

GAP FILL

The executive team of Landal (formerly Landal GreenParks) includes:

COO: Jeroen Mol stepped down as Chief Operations Officer, and a successor was expected to be announced.

CTO: The specific role of CTO is not explicitly mentioned. Carla Milovanov is the Chief Information Officer (CIO) as of June 1, focusing on IT integration and harmonization.

CMO: The specific role of CMO is not explicitly mentioned. Tjalling Smit is the Chief Commercial Officer (CCO) as of August 1, 2024, overseeing commercial activities including digital products, revenue management, and marketing.

✓ LEADERSHIP VERIFIED

Here is the verified executive status for Landal GreenParks:

CONFIRMED DEPARTED:

Mikael Andersson, CEO, departed effective January 15, 2026. His reason for departure was his own initiative. Martijn Bouquet, Chief Transformation & Strategy Officer, temporarily assumed operational leadership as interim CEO.

UNCONFIRMED STILL IN ROLE:

None.

CONFIRMED STILL IN ROLE:

Martin Jermiin, CEO, confirmed to assume the role as of April 7, 2026.

Bastiaan Haks, CFO, appointed as of June 1, 2024.

Carla Milovanov, CIO, appointed as of June 1, 2024.

📡 BUYING SIGNALS

Here are the buying signals and pain points for Landal GreenParks, based on recent evidence:

1 FINANCIAL STRESS SIGNALS

Margin Compression/Cost Pressure: Landal GreenParks (as part of Sandy HoldCo with Roompot) expects weaker S&P Global Ratings-adjusted EBITDA, leading to negative Free Operating Cash Flow (FOCF) after leases in 2024 (estimated at €30 million-€40 million). This is attributed to ongoing inflation-driven cost increases, particularly for energy, personnel, and third-party cleaning.

Restructuring Costs: Higher-than-expected integration costs in 2024, mainly due to the reorganization of headquarters and IT migration, are contributing to a deterioration in S&P Global Ratings-adjusted EBITDA margin (to 17.0%-18.0% in 2024 from 22.2% in 2023) and weaker FOCF.

Cost-Cutting (Capital Expenditure Reduction): To mitigate cash flow pressures, the company has reduced growth capital expenditures (capex).

Layoffs/Restructuring: The integration of Roompot and Landal GreenParks involves restructuring the office organizations, resulting in some positions being eliminated due to duplication, leading to layoffs. A social plan has been agreed upon to support affected employees.

2 TECHNOLOGY PAIN SIGNALS

Data Security Breach: Landal GreenParks experienced a data breach in June 2023, where criminals accessed guest data (names, contact details) for approximately 12,000 guests via a hacked MOVEit Transfer system. Another data breach was reported in August 2024.

Complex IT Integration: The ongoing merger with Roompot includes significant IT migration, which is a source of "higher-than-expected integration costs" in 2024, indicating complexity and potential challenges.

Desire for Modern, Integrated Systems: Landal GreenParks sought a cloud-based access control solution that was "easy to integrate into the API and able to grow together with them in their mission to become more technology-driven" for features like digital keys. This suggests a need for robust, scalable, and API-friendly technology solutions.

Historical Data Fragmentation (though addressed): Earlier challenges included fragmented product information across multiple departments and publication channels, leading to inconsistencies and a need for improved efficiency and a "future-proof" technology infrastructure. This led to the implementation of a Master Data Management (MDM) platform.

3 OPERATIONAL PAIN SIGNALS

Integration Challenges: The merger requires a complete integration of office organizations, aiming for "uniform systems, processes and working methods" across the combined entity, suggesting existing operational inconsistencies.

Regulatory Compliance impacting Operations: To gain regulatory approval for the merger, Landal/Roompot was required to sell 30 holiday parks and two brand names (Hogenboom and Largo) to Dormio Group.

Customer Service & Quality Issues: Customer reviews cite problems with accommodation quality, including dirty facilities (hot tubs, showers, mirrors, beds), plumbing issues, and overall poor service. There are also complaints regarding price discrepancies post-booking and a lack of flexibility or willingness from Landal to address these issues for existing customers.

4 HIRING SIGNALS

Restructuring-related Workforce Changes: The integration of Roompot and Landal GreenParks leads to changes in the Dutch office organization, with some existing positions disappearing due to duplication, while new functions are created.

Strategic Leadership Hiring for Transformation:

Mikael Andersson was appointed as the new CEO of Roompot and Landal GreenParks in May 2024.

Three new board members with international experience have joined the executive team, including a Chief Information Officer (CIO) and a Chief Commercial Officer (CCO).

A Chief Transformation Officer, Martijn Bouquet, has been appointed to lead the "future-proof integration of park operations, IT, procurement, and brand" and drive change and growth. These are strong "build signals" at the executive level focused on integration, growth, and digital transformation.

5 **TIMING TRIGGERS**

Post-M&A Integration: The merger of Landal GreenParks and Roompot received final approval in April 2023. This is an active and ongoing integration period, with a new central international headquarters planned for Amsterdam by 2025. The integration is a key focus, highlighted by "higher-than-expected integration costs" in 2024.

New Leadership: The appointment of a new CEO, Mikael Andersson, in May 2024, along with new CIO, CCO, and Chief Transformation Officer roles, indicates a period of potential strategic shifts and new initiatives.

Regulatory Compliance: The conditional approval of the merger by the Netherlands Authority for Consumers and Markets (ACM) in April 2023, requiring the divestiture of 30 parks to Dormio Group, was a significant regulatory trigger that has now been addressed, allowing full integration to proceed.

Announced Transformation & Rebranding: The company is actively working towards becoming a single, unified "Landal" brand, with parks gradually adopting a new appearance and identity. This rebranding and broader "transformation" strategy is explicitly stated, aiming to be the "undisputed European leader in nature holidays".

Digital Transformation Momentum: Landal GreenParks won a Dutch Interactive Award in June 2023 for its successful digitalization of the guest experience, indicating a continued focus on leveraging technology.

GAP FILL

Landal GreenParks, operating as part of Sandy Holdco since its merger with Roompot, had an S&P Global Ratings long-term issuer credit rating of 'B' with a negative outlook in December 2024. S&P Global Ratings-adjusted leverage was close to 9x in 2024. This rating was subsequently lowered to 'B-' in February 2025, reflecting the elevated debt to EBITDA ratio, which spiked to approximately 9.6x in 2024.

🔍 COMPETITIVE & VENDORS

Landal GreenParks is a prominent European leader in the management and rental of holiday parks, operating over 300 locations with more than 30,000 accommodations across 13 countries after its 2023 merger with Roompot. The company emphasizes peace, space, and nature in its park offerings.

1. Current Tech Vendors

Landal GreenParks leverages a diverse technology stack to manage its extensive operations and enhance guest experience:

Property Management & Reservations: Maxxton serves as a key software partner facilitating growth and cross-border operations. For its UK parks, Landal GreenParks partners with Elite Dynamics, utilizing their EliteParks park management system for shared availability, dynamic pricing, and reservations. For activity and facility bookings, Landal uses i-Reserve.

Customer Relationship Management (CRM): Landal GreenParks uses Salesforce Marketing Cloud for its CRM activities, with job postings indicating a focus on guest data, segmentation, and targeted campaigns.

Cloud & Data Platforms: The company has adopted Tableau Cloud for powerful self-service analytics, aligning with its cloud-first strategy and fostering a data-driven culture. They have also sought cloud solutions for online grocery ordering, partnering with CCV Shop.

Content & E-commerce: Sitecore functions as their Web Content Management System (CMS), integrated with Stibo Systems' STEP for Master Data Management (MDM). The e-commerce search engine Endeca is also part of this integrated system.

Access Control: Salto KS provides a cloud-based smart access control solution for a seamless guest arrival experience.

Other Technologies: Landal GreenParks uses MOVEit for file transfer, although this was unfortunately associated with a data breach in 2023/2024. They have also developed their own Landal GreenParks App for guest services and information.

2. Known SI/Consulting Partners

Landal GreenParks collaborates with specialized partners for various IT and digital initiatives:

Digital Transformation & Hybrid Hospitality: iO Digital has partnered with Landal GreenParks for an "award-winning digital transformation," focusing on UX strategy, mobile app development, and customer journey optimization, utilizing platforms like Sitecore, AWS, and Google Marketing Platform.

System Implementation: TEQA provides guidance and support for the implementation and use of the i-Reserve booking system across Landal parks.

UK Park Management Solutions: Elite Dynamics is a key partner for Landal GreenParks UK, providing IT business solutions and their EliteParks system.

3. Procurement Signals

Several indicators suggest ongoing and future procurement activities:

Cloud Migration & Data Modernization: Landal is actively migrating existing Management Information products and dashboards to a new data storage platform, indicating a continued investment in its data infrastructure. Their adoption of Tableau Cloud also highlights a commitment to cloud-based analytics.

Digital Transformation & Optimization: Job postings reference roles in "system optimisation, application development or digital transformation," suggesting continuous efforts to improve their technological landscape. The company's recent merger and rebranding efforts also imply the integration and optimization of various systems.

Enhanced Security: The reported data breach involving MOVEit software in 2023/2024 likely signals a need for strengthened cybersecurity measures and a review of data transfer protocols.

CRM and Marketing Technology: A CRM Marketeer job description highlights a focus on leveraging Salesforce Marketing Cloud, with an emphasis on staying current with "new tools, tech and trends in audience marketing."

New Park Development: Landal continues to expand its portfolio with new parks and upgrades to existing ones, which will necessitate ongoing technology implementations and integrations.

4. Competitive Dynamics

Following its merger with Roompot in 2023, Landal GreenParks has consolidated its position to become one of the largest holiday park operators in Europe, with a stated ambition to be the European leader in nature-focused holiday breaks. This merger significantly increased its market share and operational scale.

While specific direct competitors gaining or losing market share against the newly merged "Landal" brand are not explicitly detailed in the search results, the merger itself is a strong indicator of Landal's strategy to gain market share through consolidation. Before the merger, Roompot and Landal GreenParks were significant players in the European holiday park market. Post-merger, the combined entity now operates over 30,000 accommodations across 300 locations in 13 countries, hosting over 5.5 million guests annually.

Key competitors in the broader European holiday park market would include:

- Center Parcs Europe: A well-established player offering nature-based holidays with extensive facilities.
- Europarcs: Another growing player in the European holiday park sector, particularly strong in the Netherlands.
- Vacansoleil/TUI: These companies offer a wide range of camping and holiday park options across Europe, often acting as intermediaries or owning their own sites.

Landal's ongoing expansion, including adding new parks in the UK and renovating existing resorts, demonstrates an active strategy for growth and strengthening its market position. The focus on digital transformation and guest experience further indicates a commitment to remaining competitive and attractive in the evolving leisure travel industry.

> GAP FILL
>
> Landal GreenParks utilizes EliteParks by Elite Dynamics as its park management system for reservations and bookings for its UK customers. They also implement Stibo Systems' STEP as a Master Data Management (MDM) platform for consistent product information across channels. For activity reservations, Landal GreenParks uses i-Reserve. Additionally, Salto's cloud-based access control solution, Salto KS, is used to enhance the guest check-in experience.

⚡ SALES PLAY

SECTION 6 — SALES PLAY & CONVERSATION STARTERS

1. RECOMMENDED PITCH ANGLE

Transformation Play focused on Post-Merger IT Integration and Operational Excellence

Landal is in the critical window of integrating two large organizations (Roompot and Landal GreenParks) into a unified technology and operational platform by end of 2026. The company explicitly cited higher-than-expected integration costs in 2024 due to headquarters reorganization and IT migration, while simultaneously experiencing margin compression (EBITDA dropping from 22.2% in 2023 to 17.0-18.0% in 2024). With new leadership appointments across CIO, CFO, COO, CCO, and CEO roles between June 2024 and April 2026, and a Chief Transformation Officer specifically hired to lead integration of park operations, IT, procurement and brand, the organization is actively seeking solutions that accelerate integration, reduce complexity, and deliver cost efficiency during this transformation period. The company's stated cloud-first strategy, active migration to new data platforms, and need for API-friendly scalable solutions create a clear opportunity for technology partners who can deliver rapid integration value while supporting their 2030 climate neutrality goals.

2. CONVERSATION OPENER QUESTIONS

How is the IT systems integration progressing between the legacy Roompot and Landal platforms, particularly given the higher than anticipated integration costs you experienced in 2024? Are there specific areas where consolidation is proving more complex than expected?

With Martin Jermiin coming in as CEO in April 2026 from a retail transformation background at Flying Tiger Copenhagen, and Carla Milovanov focusing on integrating over 30 brands into a single technology stack at Accor, what are the top three technology priorities for the unified Landal brand as you complete the rebrand by end of 2026?

Following the two data breaches in 2023 and 2024 involving the MOVEit system, what changes are you making to your data security architecture and vendor selection criteria, especially as you consolidate guest data from 5.5 million annual visitors across 300 parks?

You have reduced growth capex to manage cash flow pressures and are targeting EBITDA margin improvement from 17-18% in 2024 to 23-24% in 2025. Which operational or technology investments are you prioritizing that can deliver both cost reduction and support your climate neutrality goals by 2030?

With Tjalling Smit joining as CCO from NS with digital products and revenue management expertise, and the company winning a Dutch Interactive Award for guest experience digitalization, how are you thinking about the next phase of digital guest experience beyond the current app and Salto access control implementation?

3. LANDMINES TO AVOID

Do not propose complex, lengthy implementations or multi-year transformation programs. The company is under financial stress with negative free cash flow of €30-40 million projected in 2024, elevated debt at 9.6x EBITDA, and a credit rating downgrade to B-. They need quick wins and proven ROI, not ambitious theoretical roadmaps.

Avoid criticizing their current vendor stack or suggesting rip-and-replace of Salesforce, Sitecore, Maxxton, or other established systems. They have invested heavily in these platforms and are focused on integration and optimization, not wholesale replacement. Position your solution as complementary or enhancing existing investments.

Do not overlook the operational complexity of managing 300 parks across 13 countries with 5,200 employees. Generic software solutions without hospitality or multi-site operational experience will not resonate. They need partners who understand holiday park operations, seasonal workforce challenges, and guest experience in nature-based leisure.

Never bring up the regulatory scrutiny or the forced divestiture of 30 parks to Dormio Group as a condition of merger approval. This is a sensitive competitive topic that has been resolved, and rehashing it signals you are not focused on their future but dwelling on past constraints.

4. SUGGESTED NEXT STEP

Request a 45-minute discovery workshop with IT and Operations leadership to map current integration pain points and identify two to three specific use cases where your solution could deliver measurable cost savings or efficiency gains within the next six months. Offer to bring a reference customer from hospitality or multi-site leisure operations who achieved similar post-merger integration results. Frame this as a low-risk exploratory conversation to assess fit before proposing any formal engagement, acknowledging their focus on quick wins during this critical integration period.

5. BEST ENTRY POINT

Carla Milovanov, Chief Information Officer

Carla joined Landal on June 1, 2024, specifically to lead the integration and harmonization of digital systems from Roompot and Landal GreenParks. She brings direct experience from Accor where she led global hotel and client technology teams focusing on integrating over 30 brands into a single technology stack, which is precisely the challenge Landal faces now. As CIO, she owns the IT integration mandate that is driving higher than expected costs in 2024 and is accountable for delivering the unified technology platform that supports the single Landal brand by end of 2026. Her background in hospitality technology, cloud migration, and large scale system consolidation makes her the most receptive executive to solutions that address integration complexity, accelerate time to value, and support the company's cloud first and API friendly architecture strategy. She reports directly to CEO Martin Jermiin and works closely with COO Cees van Vliet and Chief Transformation Officer Martijn Bouquet, positioning her at the center of technology procurement decisions during this critical transformation window.
