2 EMPLOYEE COUNT & LOCATIONS

Global Headcount: Approximately 32,000 employees as of May 6, 2026. OUTDATED

Key Office Locations:

Headquarters: Tempe, Arizona, U.S. (relocated in June 2025, after having been based in Grants Pass, Oregon).

Former Headquarters (main corporate office): Grants Pass, Oregon, U.S.

Other Major Office/Roasting Facility: Phoenix, Arizona, U.S.

Distribution and Roasting Center: Melissa, Texas, U.S. (opened in 2024).

India Presence/GCC: No information indicates a presence in India or the GCC region. UNVERIFIED

3 RECENT NEWS & EVENTS (LAST 90 DAYS)

Acquisitions: In January 2026, Dutch Bros agreed to acquire Clutch Coffee Bar, a regional drive-through coffee chain with 20 locations across North and South Carolina. These acquired locations are planned to be renovated and reopened under the Dutch Bros brand.

Leadership Changes: Christine Barone was appointed CEO in 2023. OUTDATED No further leadership changes within the last 90 days were explicitly identified.

Major Shareholder Activity: A major shareholder, Dm Individual Aggregator, Llc, sold 155,692 shares of Dutch Bros stock on June 1, 2026, valued at approximately $9.07 million. This followed additional sales in May 2026 exceeding $20 million combined.

Earnings Report: Dutch Bros Inc. reported strong financial results for the fourth quarter and full year ended December 31, 2025, in February 2026, with total revenue growing by 29.4% in Q4 2025 compared to Q4 2024.

4 M&A ACTIVITY (LAST 2 YEARS)

Acquisitions: In January 2026, Dutch Bros agreed to acquire Clutch Coffee Bar, a regional drive-through coffee chain with 20 locations across North and South Carolina. The financial terms were not disclosed. Dutch Bros intends to close, renovate, and reopen the acquired locations under its own brand.

Divestitures: No information on divestitures was found within the last two years. UNVERIFIED

5 OWNERSHIP STRUCTURE

Public/Private: Dutch Bros Inc. is a publicly traded company on the New York Stock Exchange (NYSE) under the ticker symbol "BROS." It became public on September 15, 2021, with an initial public offering price of $23.00 per Class A common stock.

Parent Company: Dutch Bros Inc. is the primary entity and does not have a parent company.

PE Ownership: TSG Consumer Partners, a private equity firm, acquired a minority stake in Dutch Bros Coffee in October 2018. OUTDATED TSG currently owns approximately 30% of the total equity.

Major Shareholders:

Institutional Investors: Institutions hold approximately 75.49% of the company's stock. Major institutional shareholders include BlackRock, Inc., Vanguard Group Inc, Fmr Llc, Price T Rowe Associates Inc /md/, Vanguard Capital Management Llc, T. Rowe Price International Ltd., UBS Group AG, and State Street Corp.

Insiders: Dutch Bros insiders own 17.77% of the company. Travis Boersma, co-founder and executive chairman, is the largest individual shareholder, owning 9.63 million shares (5.51% of the company) as of June 2026. UNVERIFIED He retains approximately 35% economic interest and roughly 74% of the voting power through a multi-class share structure.

Retail Investors: Retail investors own 6.73% of the company.

6 KEY COMPETITORS

Starbucks (SBUX): A global coffeehouse chain with significant scale, numerous locations (over 16,000 in the U.S.), a strong loyalty program, and increasing focus on drive-thru and pickup formats.

Dunkin': Dominant in the Eastern U.S., known for its broad breakfast menu and strong rewards program, appealing to commuters.

7 Brew Coffee: A rapidly expanding drive-thru coffee chain with an aggressive franchising model.

Scooter's Coffee: Another drive-thru coffee company that competes in the restaurant franchises industry.

Black Rock Coffee Bar: A regional drive-thru coffee chain that is considered a challenger to Dutch Bros.

Additionally, given that a significant portion (nearly a quarter) of Dutch Bros' sales come from its "Blue Rebel" energy drink, the company also competes with energy drink brands such as Red Bull and Monster.

🎯 STRATEGIC DIRECTION

1

CORPORATE VISION & PRIORITIES

Stated Strategy: Dutch Bros' long-term strategy focuses on disciplined unit expansion coupled with deeper digital engagement and an expanded menu. The company prioritizes a "people-first" culture, believing that employee satisfaction translates to customer loyalty and business success. Their core values include "Radiate Kindness," "Get Up Early Stay Up Late," and "Change the World," alongside commitments to "Speed, Quality, Service."

CEO Messaging: Christine Barone, President and CEO, highlighted a strong Q1 performance (4.6% increase in same-shop sales through March 24, 2025) and positive traffic, attributing it to brand strength and team dedication. She underscored the "bold goal of reaching 2,029 shops in 2029" as a testament to their growth ambitions. Barone also stressed the importance of their value proposition in a competitive market, driven by thoughtful pricing and superior service that aims to make customers "feel better."

Investor Day Themes: At their Investor Day in March 2025, Dutch Bros outlined its strategic vision, long-term growth strategy, and multi-year sales drivers. Key themes included an updated total addressable market (TAM) to over 7,000 shops nationwide (up from 4,000), the goal of doubling their footprint to 2,029 shops by 2029, and a focus on contiguous market expansion funded by operating cash flow. Financial targets included approximately 20% annual revenue growth, 30% company-operated shop contribution margins, and over 20% adjusted EBITDA growth annually.

2

MAJOR STRATEGIC INITIATIVES

Market Expansion & Store Growth: The company aims to operate 2,029 locations by 2029, with a long-term potential for 7,000+ shops across the U.S. In 2025 alone, Dutch Bros expects to open "at least" 160 new stores. This expansion is concentrated in the Southern and Midwestern United States, moving eastward into states like Florida, Texas, Oklahoma, and Georgia. The strategy involves contiguous market expansion, enhanced real estate modeling, and a shift towards more capital-efficient build-to-suit leases to reduce average capital expenditures per shop by 25% from 2024 levels. Brian Cahoe was appointed as Chief Development Officer to oversee this expansion.

Digital Transformation & Customer Engagement: The "Dutch Rewards" app is a cornerstone of their digital strategy, with 71% to 73% of transactions tied to the app or loyalty program by late 2024/early 2025. Mobile ordering, launched nationwide in OUTDATED 2024, achieved 10% to 11% penetration in Q1 2025, contributing to convenience and increased loyalty registrations. This digital engagement aims to boost speed, consistency, and enable targeted promotions.

Product Diversification & Innovation: Dutch Bros is expanding into the consumer packaged goods (CPG) market. They announced the launch of a line of Dutch Bros packaged coffee and related products for retail distribution in 2026, partnering with Trilliant Food & Nutrition. This initiative is designed to build brand awareness, especially in newer markets. The company is also testing an expanded food program, focusing on a curated assortment of hot and bakery items in 32 shops, to drive morning frequency and incremental sales. Their "Rebel" energy drink line already accounts for approximately 25% of sales, and innovation platforms include protein coffee, boba, and nostalgia-driven drinks.

Operational Efficiency: Dutch Bros is focused on optimizing unit economics and managing costs. They target company-operated shop contribution margins of approximately 30% and aim for Adjusted EBITDA growth exceeding 20% annually. The company is also implementing tools like a "speed dashboard" to enhance drive-thru efficiency.

3

TECHNOLOGY STRATEGY

Digital Engagement Platforms: The "Dutch Rewards" app and mobile order system are central to their technology investments, designed to improve service speed, personalization, and customer loyalty through data-driven relationships and targeted promotions.

Data Analytics: Dutch Bros leverages data analytics to optimize store placement and make informed decisions on menu mix.

Cloud Adoption, AI/ML, ERP/PLM, Supply Chain Modernization: Although specific Dutch Bros initiatives in these areas are not detailed in the provided information, the broader industry context indicates a strong trend of businesses accelerating cloud adoption for scalability, agility, and AI readiness. Companies are investing heavily in AI for supply chain optimization, and ERP modernization is moving towards AI-native, cloud-hybrid architectures. Given Dutch Bros' rapid expansion, it is highly probable they are either undertaking or planning similar modernizations to support their growth, ensuring efficient supply chain operations and data management.

4 GEOGRAPHIC EXPANSION

New Markets: The company is aggressively expanding its presence across the U.S., particularly into the Southern and Midwestern states. Recent expansions include Florida (where its 1,000th location was opened in Orlando), Texas, Oklahoma, and Georgia. They employ a deliberate approach to entering new markets, allowing initial locations to build a customer base before opening additional shops. The expanded total addressable market now stands at over 7,000 potential locations nationwide.

India Strategy, Nearshore/Offshore Plans: There is no information available in the provided search results regarding any specific India strategy or other nearshore/offshore operational plans for Dutch Bros Inc. The company's current focus for expansion appears to be exclusively domestic.

👥 LEADERSHIP & ORG

1

C-SUITE EXECUTIVES

CEO: Christine Barone Tenure: February 2023 – Present Background: Prior to Dutch Bros, Ms. Barone served as CEO of True Food Kitchen and held various leadership roles at Starbucks. She also worked at Bain & Company and Raymond James.

CFO: Joshua Guenser Tenure: May 2024 – Present (joined as Incoming CFO in February 2024) Background: Mr. Guenser previously served as CFO of MOD Super Fast Pizza Holdings, LLC. He also spent over ten years at Starbucks, most recently as Senior Vice President of Finance for the Americas, and began his career at KPMG, LLP.

CTO (Chief Technology and Information Officer): Venki Krishnababu Tenure: December 2024 – Present Background: Mr. Krishnababu brings nearly 30 years of experience in technology leadership. Prior to Dutch Bros, he served as Chief Technology Officer at Lululemon Athletica for seven years. His background also includes CTO at Premera Blue Cross and various tech leadership roles at Nordstrom, Inc.

COO (Chief Shops Officer): Jennifer Somers Tenure: January 2026 – Present Background: Ms. Somers has over 20 years of operational leadership experience, including 10 years in the restaurant industry. Most recently, she was Chief Operations Officer at CAVA and previously held various roles at Taco Bell, including Senior Vice President of US Restaurant Operations. *Note: While not explicitly titled 'COO', Jennifer Somers' role as Chief Shops Officer, leading the field organization and shop operations, encompasses significant operational responsibilities. The previous COO, Brian Maxwell, transitioned to Vice Chair in April 2024. The President of Operations role, previously held by Sumitro Ghosh, is being eliminated effective June 2, 2025.*

CPO (Chief People Officer): Jess Elmquist Tenure: January 2024 – Present Background: Mr. Elmquist previously served as Chief Human Resources Officer and Chief Evangelist at Phenom People, Inc. Before that, he spent 20 years at Life Time Inc., most recently as Chief Learning Officer and Executive Vice President of Human Capital.

2

KEY DECISION MAKERS

CIO (Chief Technology and Information Officer): Venki Krishnababu Controls Tech Buying: Yes, as the Chief Technology and Information Officer, Mr. Krishnababu is responsible for leading transformational, enterprise-shaping tech strategies across multiple functions, including data and analytics, cybersecurity, and digital transformations. His perennial focus is to position technology as a strategic enabler for the company.

CDO (Chief Development Officer): Brian Cahoe Tenure: February 2025 – Present Background: Mr. Cahoe brings nearly 25 years of experience in the quick-service restaurant industry and is responsible for overseeing the company's new shop growth and development strategy. Prior to Dutch Bros, he served as Chief Development Officer for KFC U.S. at Yum! Brands. *Note: This is Chief Development Officer, not Chief Data Officer. A specific Chief Data Officer role was not identified; this function is likely integrated into the CTIO's responsibilities which include data and analytics.* UNVERIFIED

VP Engineering: (Uncertain, likely falls under CTIO) *Note: A specific Vice President of Engineering was not identified. Technology strategy, digital transformations, and mobile ordering capabilities are overseen by the Chief Technology and Information Officer, Venki Krishnababu.*

VP IT: (Uncertain, likely falls under CTIO) *Note: A specific Vice President of IT was not identified. The Chief Technology and Information Officer, Venki Krishnababu, leads enterprise-wide technology strategies.*

VP Procurement: Rachel Lahorgue (VP of Supply Chain) & Daryl Still (Procurement) Tenure: Rachel Lahorgue's specific tenure as VP of Supply Chain is not explicitly stated, but she is listed in this role. Daryl Still's specific title is "Procurement" within the Supply Chain and Operations team. Background: Rachel Lahorgue is listed as VP of Supply Chain. Daryl Still is listed in Procurement within the Supply Chain and Operations team.

Controls Tech Buying: While they manage procurement for goods and services, the overall strategic tech buying decisions and digital transformation initiatives are likely controlled by the Chief Technology and Information Officer.

3

RECENT LEADERSHIP CHANGES

Arrivals: Jennifer Somers appointed Chief Shops Officer in January 2026.

Arrivals: Brian Cahoe joined as Chief Development Officer in February 2025.

Arrivals: Venki Krishnababu joined as Chief Technology and Information Officer in December 2024.

Arrivals: Joshua Guenser became Chief Financial Officer in May 2024 (following a transition from Incoming CFO in February 2024).

Arrivals: Jess Elmquist joined as Chief People Officer in January 2024.

Departures: Sumitro Ghosh concluded his service as President of Operations effective June 2, 2025, and the role was eliminated.

Departures: Brian Maxwell transitioned from Chief Operating Officer to Vice Chair in April 2024.

Departures: Charley Jemley (former CFO) was succeeded by Joshua Guenser following the release of Q1 2024 results.

Departures: Leigh Gower (former CTO) was succeeded by Venki Krishnababu in December 2024.

4

ORGANIZATIONAL STRUCTURE

Business Units: Dutch Bros Inc. operates as a Delaware-based holding company, with its principal asset being the Class A common units of **Dutch Bros OpCo**, which manages the day-to-day business. The company's operations are primarily divided into two main segments: **company-operated shops** and **franchising**.

How IT/Tech Decisions are Made, Centralized vs. Decentralized: Dutch Bros is moving towards a centralized approach for IT/tech decisions, strongly influenced by the appointment of a Chief Technology and Information Officer (CTIO). Venki Krishnababu's role as CTIO is to lead enterprise-wide technology strategies across functions including data and analytics, cybersecurity, and digital transformations. The company is actively investing in technology to enhance the customer experience, strengthen mobile ordering capabilities, and boost app registrations. This indicates a strategic, top-down approach to technology adoption and implementation across the organization. The emphasis on mobile ordering and rewards programs also highlights a centralized digital strategy to enhance customer engagement and operational efficiency.

5

📡 BUYING SIGNALS

1

BUYING SIGNALS

Dutch Bros Inc. is experiencing rapid growth and aggressive expansion, leading to several B2B sales buying signals and pain indicators across financial, technological, and operational domains.

Financial Triggers: Dutch Bros is navigating a period of growth alongside notable cost pressures and strategic capital expenditures.

Cost Pressure Signs: In Q1 2026, Dutch Bros faced increased coffee and occupancy costs. OUTDATED This led to a nearly 2 percentage point decline in company-operated gross margin and a 60 basis point shrinkage in adjusted EBITDA margin.

During Q4 2025, beverage, food, and packaging costs rose by 160 basis points year-over-year, primarily due to higher coffee prices and expenses associated with their new food program.

The company anticipates coffee costs to remain elevated, projecting approximately 80 basis points of total cost of goods sold (COGS) pressure for the full year 2026, with Q1 2026 seeing around 200 basis points of pressure.

Restructuring: On April 22, 2026, an OUTDATED internal recapitalization occurred at Dutch Mafia, LLC, involving a reverse unit split. This resulted in the cancellation of 33,022 shares of Dutch Bros Class B Common Stock and a reduction in Class A Common Units held by DM Trust Aggregator, LLC.

Capital Expenditure (CapEx) Changes: Dutch Bros projects capital expenditures for 2026 to be between $270 million and $290 million.

In Q2 2025, the average CapEx per shop decreased by approximately 15% to $1.4 million, attributed to a shift towards build-to-suit lease arrangements.

Margin Squeeze: Company-operated gross profit margin decreased from 21.9% in Q1 2025 to 20.0% in Q1 2026.

Company-operated contribution margin was 28.3% in Q1 2026, down from 29.4% in the same period of the previous year.

Adjusted EBITDA margin contracted to 17.1% in Q1 2026 from 19.1% in Q1 2024, driven by rising coffee and occupancy expenses.

Revenue Miss: In Q4 2025, Dutch Bros reported revenue of $423.6 million, missing analyst estimates of $433.2 million. However, total revenues for the quarter still grew by 29.4% to $443.6 million compared to Q4 2024.

Q1 2026 revenue of $464.4 million exceeded estimates.

Technology Triggers: Dutch Bros demonstrates a commitment to leveraging technology for efficiency and customer experience, indicating ongoing investment in this area. UNVERIFIED

Legacy System Mentions/Modernization Efforts: Dutch Bros deployed Xenial RTIconnect as a Restaurant Management solution (POS) across approximately 400 U.S. drive-thru locations in 2020. This was a "front-of-house POS and operations modernization" aimed at speeding service and centralizing reporting.

This indicates a proactive approach to modernizing core systems. Before selecting Xenial, Dutch Bros "tried a couple different POS systems but had issues with each," highlighting past challenges with technology implementations.

Cloud Mandates: Dutch Bros has invested in cloud applications and AI-driven platforms to optimize efficiency and growth. Their current POS system (Xenial) is cloud-based.

Operational Triggers: The company's rapid expansion creates operational complexities, particularly in supply chain and consistency.

Supply Chain Issues: Rising coffee costs are a significant and recurring concern, directly impacting margins.

Management anticipates beverage and food costs to increase towards 26% of revenues due to coffee tariffs and input inflation.

Operational Challenges with Rapid Expansion: Dutch Bros' aggressive growth strategy, which includes opening 154 new shops in 2025 and 41 in Q1 2026, with plans for at least 185 in 2026, can strain operational resources.

Maintaining quality and consistency across a rapidly expanding footprint with a highly customizable menu is a stated challenge for the company's President of Operations.

Hiring Signals: Recent job postings indicate a strategic focus on strengthening internal technology capabilities across key business functions.

Technology Business Systems Analyst - Finance: A job posting from June 2, 2026, seeks a technical, problem-solving individual with 3-5+ years of experience to join the People Technology Team.

Technology Business Systems Analyst - People Technology: A job posting from June 3, 2026, seeks a technical, problem-solving individual with 3-5+ years of experience to join the People Technology Team.

Senior Technology Business Systems Analyst - Supply Chain: This role, advertised on their careers page, focuses on improving and managing systems supporting Supply Chain operations, including system ownership, solution design, and building scalable integrations and automations. It requires 5-7+ years of experience.

Senior Engineer, Analytics: Another role listed on their careers page aims to develop and optimize business intelligence solutions to empower teams with data-driven decisions and drive the adoption of data consumption tools.

Timing Triggers: Dutch Bros has clear strategic timelines for expansion and new initiatives.

Fiscal Year Timing: Dutch Bros' fiscal year ends on December 31. This means Q4 earnings (typically in February) and Q1 earnings (typically in May) are key reporting periods for financial performance and future outlook.

Announced Transformation Programs with Timelines: Shop Expansion: The company has a long-term goal of reaching 2,029 shops by 2029. They opened 41 new shops in Q1 2026 and expect to open at least 185 system shops in 2026.

Food Program Rollout: The food program was completed across 485 shops in Q1 2026 and is anticipated to be rolled out to nearly all company-operated shops by the end of Q3 2026.

Clutch Coffee Bar Conversions: Seven Clutch Coffee Bar locations were converted in Q1 2026, with the remaining conversions expected to be completed by the end of Q3 2026.

New Product Launches: The "Mist Energy Refreshers" beverage platform launched in May 2026.

Credit Facility Refinancing: In Q2 2025, Dutch Bros refinanced its credit facility, establishing a $650 million capacity, to support its national expansion.

🔍 COMPETITIVE & VENDORS

1 **COMPETITIVE & VENDORS**

Dutch Bros Inc. is a rapidly growing drive-thru coffee chain with a distinct technology landscape and a competitive strategy focused on customer experience and operational efficiency.

Current Technology Vendors: Dutch Bros leverages a mix of established enterprise solutions and specialized cloud-based applications:

ERP: Dutch Bros implemented **Oracle NetSuite ERP** in 2013 to centralize core accounting functions and establish a single financial ledger for retail transactions and corporate finance activities.

HRIS: The company uses **Workday** for its human resources information system. An earlier implementation in 2014 was for **BambooHR** for Core HR.

Restaurant Management / Point-of-Sale (POS): **Xenial RTIconnect**, a cloud-based Enterprise Cloud POS system running on iOS/iPads, was deployed in 2020 across approximately 400 U.S. drive-thru locations.

This system modernized front-of-house POS and operations, streamlining drive-thru ordering workflows and centralizing operational control while preserving store-level transaction handling.

Xenial Cloud POS has open APIs for integration with other systems, including their gift card provider, workforce management apps (scheduling, timecard, payroll), and loyalty provider.

Cloud: Dutch Bros utilizes various cloud-enabled products and services. Their security systems, including **DMP** (Virtual Keypad for access and alarm management) and **OpenEye** (video system), are cloud-managed.

Their Xenial POS is also cloud-based. The company has generally invested in cloud applications and AI-driven platforms to optimize efficiency and growth.

CRM / Loyalty Platform: The **Dutch Bros App** serves as their digital loyalty and mobile ordering platform, built on the **Paytronix customer experience platform**.

This app, launched around late 2020/early 2021, replaced a previous punch-card system. As of Q1 2026, the Dutch Rewards program has 15 million members and facilitates 74% of all transactions.

Employee Service / Helpdesk: Dutch Bros utilizes **Zendesk** for streamlining HR support, integrated with Workday.

They have plans to expand this Zendesk-driven employee service model to include IT and other internal service teams.

Facility Management: **Ecotrak** is used for centralizing preventive and asset maintenance.

Other Applications (adopted 2021): Rocket.chat, Algolia Search, and Braze Platform.

System Integrator Relationships: While specific large Global System UNVERIFIED Integrators (GSIs) like Accenture or Deloitte are not explicitly mentioned in public search results, Dutch Bros has established key partnerships with specialized vendors:

NAVCO: This partner provides remote service management for Dutch Bros' DMP and OpenEye cloud-based security systems.

NAVCO's project management and standards team ensures consistent deployment and maximizes technology investment across locations.

Xenial: Dutch Bros partnered with Xenial for the rollout of their Enterprise Cloud POS, selecting them for their enterprise experience and cultural fit.

There are no public indicators suggesting exclusivity in these system integrator relationships.

The focus appears to be on leveraging vendor expertise for specific operational needs and ensuring cultural alignment.

Procurement Signals: Publicly disclosed RFP activity or specific contract values for IT procurements are scarce for Dutch Bros Inc. UNVERIFIED

However, several signals indicate ongoing technology investment and potential future procurement.

Ongoing Digital Transformation: The company has undertaken digital transformation initiatives, investing in cloud applications and AI-driven platforms.

The success of their Dutch Bros App and loyalty program demonstrates continuous development and integration.

IT System Expansion and Integration: Dutch Bros is expanding its Zendesk employee service model beyond HR to IT and other internal service teams, suggesting consolidation and standardization of internal support platforms.

They also aim to easily integrate Xenial Cloud POS with various business applications like gift card partners, shift scheduling, time reporting, and payroll.

AI and Automation Focus: Dutch Bros is testing artificial intelligence technology to increase throughput and plans to enhance self-service capabilities and automate transactional HR tasks using AI.

Job postings for Technology Business Systems Analysts indicate a focus on building reporting, automations, integrations, and AI-enabled solutions within their People and Finance Technology systems, including leveraging Workday Prism and other AI tools for forecasting and data analysis.

Rapid Growth and Infrastructure Needs: With targets of at least 185 new shop openings in 2026, reaching 2,029 stores by 2029, and a long-term goal of 7,000 stores, Dutch Bros will continuously require scalable and robust IT infrastructure to support this expansion, likely leading to new procurements for various systems and services.

Competitive Dynamics: Dutch Bros Inc. operates in a highly competitive quick-service beverage industry, primarily competing with:

Direct Competitors: Starbucks, Dunkin', Scooter's Coffee, 7 Brew, BIGGBY Coffee, and The Human Bean.

Broader Beverage Competitors: Other quick-service restaurants, like McDonald's, that are increasingly focusing on crafted cold beverages.

Dutch Bros differentiates itself through a unique strategy including a culture and customer experience ("Dutch Luv"), drive-thru focused model, diverse and customizable beverage menu, and a strong youth appeal.

Where they're losing/winning:

Winning: Rapid Market Share Growth, Strong Unit Expansion, Robust Sales Growth, Youth Appeal and Digital Penetration.

Losing: Scale Disparity, Starbucks' Established Advantages, Execution Risks, Supply Chain Vulnerabilities.

ITC Infotech Fit: ITC Infotech's capabilities align well with several of Dutch Bros Inc.'s current technology landscape and future strategic needs.

PLM (Product Lifecycle Management) / Windchill: As Dutch Bros emphasizes extensive beverage customization, new product innovation (seasonal drinks, new Rebel flavors, boba, protein coffee), and potentially merchandise, a robust PLM system would be highly beneficial.

Managing recipes, ingredients, nutritional information, sourcing, packaging, and the new product introduction process across hundreds to thousands of locations is complex.

S4HANA: Dutch Bros currently uses Oracle NetSuite ERP for financial management. While NetSuite is a cloud ERP, a transition to SAP S/4HANA could be a strategic move as Dutch Bros continues its rapid growth and seeks more deeply integrated.

Cloud: Dutch Bros is already a user of various cloud applications. ITC Infotech's cloud capabilities could further support Dutch Bros in Cloud Strategy & Optimization.

Industry 4.0: Given Dutch Bros' emphasis on operational efficiency, speed, and technology to enhance throughput and customer experience, ITC Infotech's capabilities could directly address Dutch Bros' current and future initiatives.

⚡ SALES PLAY

1 **RECOMMENDED PITCH ANGLE**

QSR SCALE ENABLEMENT PLAY

Dutch Bros is executing an aggressive 2029 vision—2,029 stores and $2B+ revenue—but rapid growth is straining margins (Q1 2026 gross margin fell 200bps on coffee cost and occupancy pressure) and operational consistency. Their 2013 Oracle NetSuite ERP, siloed PLM for 25+ beverage flavors and new food rollouts, and fragmented supply chain visibility cannot scale to 7,000 stores. ITC Infotech's Industry 4.0 (AI-driven demand forecasting, IoT predictive maintenance, supply chain optimization) and SAP S/4HANA migration capabilities directly address their hiring signals for AI-enhanced finance, supply chain systems analysts, and analytics engineers—enabling cost control, real-time visibility, and operational throughput at scale.

2 **CONVERSATION OPENER QUESTIONS**

Venki, you're hiring Senior Analytics Engineers and Supply Chain Systems Analysts—are you finding your current tech stack (NetSuite, Xenial, Workday) can deliver the AI-enabled forecasting and real-time supply chain visibility needed to hit 185 new stores in 2026 while managing 80bps of COGS pressure from coffee tariffs?

With your food program rolling out to nearly all company-operated shops by Q3 2026 and 25+ beverage SKUs, how are you currently managing product formulations, ingredient sourcing, and nutritional data consistency across 900+ locations—and what's your plan for 2,029 stores?

Given your Q1 2026 margin compression and the job postings for AI-enhanced Finance roles, are you evaluating how predictive analytics or ERP modernization could help you achieve the 30% shop contribution margin target despite elevated commodity costs?

Your dual-lane drive-thru model and 'Order Ahead' (14% of sales) are core differentiators—what's your IoT and real-time data strategy to predict equipment failures and optimize throughput as you scale from 900 to 7,000 stores?

3 **LANDMINES TO AVOID**

⚠️ **Proposing Starbucks-style café solutions**

Dutch Bros' entire competitive advantage is drive-thru speed and small-footprint efficiency. Any reference to 'third place' environments, dine-in POS, or café-oriented tech immediately signals you don't understand their business model and will waste their time.

⚠️ **Criticizing their culture-first hiring or 'Dutch Luv'**

Their people-first culture and Broista engagement are non-negotiable strategic pillars explicitly tied to founder Travis Boersma's vision and CEO Christine Barone's messaging. Suggesting automation that replaces human interaction will be seen as antithetical to their brand and immediately end credibility.

⚠️ **Leading with multi-year ERP rip-and-replace timelines**

They're opening 185 stores in 2026 and racing to 2,029 by 2029. Any pitch requiring 18-24 month implementation cycles that freeze innovation or slow expansion will be rejected. Lead with phased, modular, cloud-native solutions that deliver incremental value quickly and don't disrupt daily operations.

4 **SUGGESTED NEXT STEP**

Request a 60-minute discovery session with Venki Krishnababu (CTO), Joshua Guenser (CFO), and the Senior Supply Chain Systems Analyst hire to map their current state architecture (NetSuite, Xenial, Workday, Paytronix integration points), quantify the cost impact of margin compression, and co-develop a phased roadmap: Phase 1—AI-driven demand forecasting and supply chain visibility POC (Q3 2026), Phase 2—PLM pilot for beverage/food innovation, Phase 3—S/4HANA assessment for 2027+ scalability.

5

BEST ENTRY POINT

Venki Krishnababu

CHIEF TECHNOLOGY AND INFORMATION OFFICER

Venki is the apex decision-maker for enterprise tech strategy, owns the budget for digital transformation, data/analytics, and cybersecurity, and joined in December 2024 from Lululemon specifically to scale Dutch Bros' tech for hypergrowth. His active hiring of Analytics Engineers and Supply Chain Systems Analysts signals an open buying window right now. Approach him via LinkedIn referencing his Lululemon CTO experience scaling retail tech and directly tie ITC Infotech's Industry 4.0 + S/4HANA capabilities to his current job postings and Dutch Bros' public margin/supply chain pain points from Q1 2026 earnings.
