

Landal GreenParks

 4 June 2026

 PE-Backed

 COMPANY SNAPSHOT

1 REVENUE & FINANCIALS

Landal GreenParks, as a private entity, does not publicly disclose detailed financial guidance or profitability margins. However, historical revenue figures are available:

2022 Revenue: €646 million gross annual turnover **OUTDATED**.

2021 Revenue: €550 million gross annual turnover.

2020 Revenue: €405 million. This represented a 35% decrease compared to 2019 due to the COVID-19 pandemic. Based on this, 2019 revenue was approximately €623 million.

2 EMPLOYEE COUNT & LOCATIONS

Global Headcount: Following the merger **UNVERIFIED** with Roompot, the combined entity "Landal" employs approximately 5,200 people across its parks and office locations. Some sources still indicate around 3,000 employees.

Key Office Locations: The new central, international headquarters for the merged Landal (Roompot and Landal GreenParks) is in Amsterdam, with staff moving there in March 2025. The transformation of this office began in November 2024. Specific departments, such as Guest Service and Logistics, continue to operate from Goes, while the Shared Service Centre for the Finance Department and Home Owner Relations is based in Zwolle. Other offices are located in Trier (Germany) and Varde (Denmark). Landal operates over 300 holiday parks in 11 countries **UNVERIFIED**, including the Netherlands, Belgium, Luxembourg, Germany, Denmark, Britain, Austria, Switzerland, the Czech Republic, France, and Spain.

India Presence/GCC: There is no public information indicating a presence in India or the GCC region.

3 RECENT NEWS & EVENTS (LAST 90 DAYS – APPROXIMATELY MARCH 4, 2026, TO JUNE 4, 2026)

May 22, 2026: Landal published its "Landal Persmap 2026" (Landal Press Kit 2026).

May 7, 2026: Landal shared travel inspiration regarding "Culinair genieten aan de Nederlandse kust" (Culinary delights on the Dutch coast).

April 30, 2026: News was reported about a "Fire near Weerterbergen," one of Landal's parks.

April 20, 2026: Landal promoted "May Half Term Escapes: Super Staycations with Spring Savings **INFERRED**."

Official Headquarters Handover/Move: While the official key handover for the new international headquarters in Amsterdam occurred in November 2024, the process of staff moving and the establishment of the new office is ongoing, with a significant move planned for March 2025.

4 M&A ACTIVITY (LAST 2 YEARS – APPROXIMATELY JUNE 2024 TO JUNE 2026)

The most significant M&A activity impacting Landal GreenParks was its merger with Roompot.

Merger Approval (April 2023): The Dutch Authority for Consumers and Markets (ACM) and European competition authorities approved the acquisition of Landal GreenParks by Roompot.

Divestiture Condition (April 2023): As a condition for the merger's approval, the combined company was required to divest 30 holiday parks **UNVERIFIED** and two brand names (Hogenboom and Largo) to Dormio Group. This transaction made Dormio Group a significant competitor in the Dutch holiday park market.

No other major acquisitions or divestitures directly involving Landal GreenParks have been publicly announced within the last two years (June 2024 - June 2026).

5 OWNERSHIP STRUCTURE

Ownership Status: Landal GreenParks is a private company **ASSUMED**.

Parent Company: Roompot **UNVERIFIED**.

Private Equity Ownership: The combined entity (Landal, following the merger with Roompot) is owned by the American investment fund KKR & Co. **OUTDATED** (Kohlberg Kravis Roberts & Co.).

Previous Ownership: Prior to the merger, Landal GreenParks was owned by Platinum Equity, which had acquired it from Wyndham Worldwide in 2018.

6

KEY COMPETITORS

Landal operates in a competitive European holiday park market. Key direct competitors include:

Center Parcs: A well-known operator of large-scale holiday villages across Europe, often compared to Landal for family holidays.

Dormio Group: This company significantly expanded its presence in the Netherlands by acquiring 30 parks and two brand names from Landal/Roompot as a condition of their merger, making it a strong competitor.

EuroParcs: Another prominent European holiday park brand, particularly in the Netherlands, Belgium, and Germany, offering various types of accommodations and facilities.

Pierre & Vacances: A major player in the European holiday accommodation market, managing a wide portfolio of holiday residences and villages.

Park Holidays UK: A private equity-backed company operating holiday parks primarily in the United Kingdom.

GAP FILL

Landal GreenParks reported a gross annual turnover of €646 million in 2022 and €550 million in 2021. Prior to this, the company's turnover was €405 million in 2020. Landal GreenParks merged with Roompot in April 2023. For the full year 2024, the combined entity (operating under the Landal brand) is projected to achieve a revenue of approximately €920 million to €930 million.

STRATEGIC DIRECTION

1 CORPORATE VISION & PRIORITIES

Landal's overarching purpose is "We give everyone the freedom to find their happy place". The company aims to be the undisputed European market leader in nature-based holidays. This vision is supported by four core values: "Feel at home," "Together as one," "Discover your nature," and "Focus on what matters". These values guide both the company's culture and brand, fostering a safe and trusted environment where curiosity is encouraged, and a sustainable future and personal happiness are prioritized.

A major corporate priority has been the successful integration of Roompot and Landal GreenParks into a single unified organization. This transformation, led by former CEO Mikael Andersson, included establishing a single international headquarters in Amsterdam by 2025 and aligning their operating model and commercial platform. The full rebranding to the UNVERIFIED new "Landal" identity, visible across over 120 resorts, is slated for completion in 2026 and will expand to over 260 resorts across nine European countries. As of January 2026, Mikael Andersson stepped down as CEO, with Martijn Bouquet, Chief Transformation and Strategy Officer, assuming interim CEO responsibilities to ensure continuity in operations and strategic agenda.

2 MAJOR STRATEGIC INITIATIVES

Post-Merger Integration & Rebranding: The most significant ongoing initiative is the integration of Roompot and Landal GreenParks, a process approved by the Dutch Consumer and Market Authority (ACM) in April 2023. This has resulted in a combined entity offering holidays at 305 destinations in 11 European countries. The establishment of a central, international headquarters in Amsterdam by 2025 is a key part of professionalizing the organization and fostering collaboration. The full rebranding of over 260 resorts to the new Landal brand is expected to be completed in 2026.

Sustainable Investment & Operations: Landal is committed to an active sustainability policy, with all its parks being Green Key certified. The company has allocated €300 million for investment over the coming years, with a portion dedicated to making existing parks more sustainable. A notable example is the construction of 74 zero-energy holiday homes at Mont Royal (Germany) and the second phase of De Reeuwijkse Plassen OUTDATED in the Netherlands, recognized as the most sustainable recreational park in the country. Landal's ambitious goal is for its operations to become completely climate-neutral by 2030.

Digital Transformation for Enhanced Guest Experience: Landal is actively pursuing digital transformation to improve the guest experience and operational efficiency. A key program is the "Seamless Arrival" feature, developed with Salto Systems, which allows guests to open their bungalows directly with the Landal app, bypassing reception check-in. This utilizes Salto's cloud-based access control solution, "Salto KS," and API integration for digital keys. In the UK, Landal GreenParks UK has partnered with Elite Dynamics to implement their EliteParks park management system as the preferred IT business solution for its customers, aiming for shared availability, dynamic pricing, reservations, and bookings.

3 TECHNOLOGY STRATEGY

Landal's technology strategy is geared towards leveraging cloud solutions, automation, and integrated systems to enhance operations and guest services:

Cloud Adoption: The "Seamless Arrival" feature relies on Salto's cloud-based access control solution, "Salto KS," demonstrating a clear adoption of cloud technology for critical guest-facing services.

API Integration & Automation: The integration of Salto KS via API to deliver digital keys through the Landal app highlights their focus on seamless technological integration and automation of guest processes. The partnership with Elite Dynamics also emphasizes integration for sharing availability and bookings across park management systems in the UK.

Cybersecurity Investments: Landal has partnered with ReliaQuest for their GreyMatter platform to unify and enhance cybersecurity operations. This initiative, critical for a company undergoing rapid transformation and mergers, involved deploying 30 automated response playbooks within two months and integrating 14 tools on day one, resulting in an 85% reduction in mean time to respond (MTTR) and 91% MITRE ATT&CK coverage. This indicates a strong investment in automation and robust security technology.

ERP/PLM/Supply Chain Modernization: While specific details on a broader ERP modernization plan across the entire merged entity are not explicitly named with dollar amounts or timelines, the adoption of EliteParks as a preferred park management system in the UK by Landal GreenParks UK signifies a move towards modernizing and standardizing core operational systems. The industry trend suggests that AI and ML are increasingly being integrated into ERP systems to enhance functionalities like forecasting, automation, and decision support, particularly in supply chain management. Landal's general focus on digital transformation and efficiency suggests an awareness and potential future moves in this direction.

4

GEOGRAPHIC EXPANSION

Landal is committed to further international growth. Following the merger, the company now operates at over 300 holiday destinations in 11 European countries, offering more than 23,000 accommodations.

European Market Expansion: Landal has historically expanded by adding parks each year in countries like the Netherlands, Belgium, Germany, and Austria. The markets in which Landal operates saw an average growth in revenues of 12% in the past year, with Germany leading at +17%.

United Kingdom Strategy: Landal GreenParks UK is undergoing a period of significant expansion, adding a further nine parks to its portfolio over a 12-month period. Investments have also been made in its latest resort, Gwel an Mor in Cornwall, Great Britain.

Specific Investments: The company is making €300 million available for investment over the coming years, which will be used for new building projects and expansion at existing parks, including new resorts. In 2018, Landal GreenParks was building four new resorts: Kaatsheuvel and Volendam in the Netherlands, Bad Boltenhagen on the German Baltic Sea coast, and the luxurious Maria-Alm winter sports resort in Austria. Investments were also planned for its five Danish parks.

No specific India strategy or nearshore/offshore plans were identified in the search results.

 LEADERSHIP & ORG

Mikael Andersson

FORMER CEO

In role: Until January 2026

Led corporate transformation at Landal.

Martijn Bouquet

CHIEF TRANSFORMATION AND STRATEGY OFFICER / INTERIM CEO

In role: Since January 2026

Took over CEO responsibilities during transition.

Martin Jermiin

CEO

In role: Appointed April 7, 2026

Former CEO of Flying Tiger Copenhagen.

Douwe Snel

CFO

In role: Starting May 2026

Former Finance Director at Plus.

Cees van Vliet

COO

In role: Joined August 1, 2024

Previously held positions at Gamma Nederland, Jumbo, and Albert Heijn.

Tjalling Smit

CCO

In role: Started August 1, 2024

Former CCO at Nederlandse Spoorwegen.

Carla Milovanov

CIO

In role: Started June 1, 2024

Led global hotel and client technology teams at Accor.

Alrik Boonstra

CHRO

In role: Joined Roompot's management board in December 2022

Extensive HR background including global roles.

BUYING SIGNALS

1

FINANCIAL TRIGGERS

Landal GreenParks is navigating significant financial shifts due to its 2023 merger with Roompot, which continues to impact its financial structure and operational costs. The company's capital expenditure for the full-year 2024 is projected to be in the range of €50 million to €60 million.

A recent S&P Global Ratings report from December 4, 2024, indicates that Landal's revenue for the full-year 2024 is expected to remain "flatish" compared to €913 million in 2023. As of June 2024, the group's revenue was €482.9 million, marking a 0.6% decline year-on-year on a comparable basis. This period also saw a 1.6% decline in occupancy rate, although this was partially offset by a 2.8% increase in the average daily rate (ADR).

Higher-than-expected integration costs in 2024, primarily due to headquarters reorganization and IT migration INFERRED, are anticipated to lead to a deterioration in the S&P Global Ratings-adjusted EBITDA margin to 17.0%-18.0% in 2024, down from 22.2% in 2023. Free Operating Cash Flow (FOCF) after leases is expected to remain negative, around €30 million to €40 million in 2024. These expenses are partly financed through a €125 million revolving line. The company has also shifted its focus to park partnerships due to high interest rates, slowing down direct park development activities. However, FOCF after leases is forecast to turn positive, ranging from €10 million to €30 million in 2025, driven by a material reduction in integration expenses and the realization of synergies. Inflation is expected to remain elevated at 2.6% in the Netherlands in 2025, and revenue is projected to marginally increase by 3%-4% into 2025.

2

TECHNOLOGY TRIGGERS

Landal is undergoing a significant digital transformation, indicating several technology-related pain points and buying signals. The company's previous software system lacked multi-language and multi-currency support, hindering international expansion and leading to an outdated user interface that slowed employee onboarding and time-to-market. This clearly points to challenges with legacy systems.

In response, Landal has been actively seeking and implementing new solutions. As of June 12, 2024, Landal selected Maxxton for its cloud-based architecture and multi-currency/multi-language capabilities, gradually implementing its platform for comprehensive management features like bookings, check-ins, inventory, and reservations. Axel Wiertz, Landal's Information Architect, stated that Maxxton was "at least two years ahead of its time" compared to competing software systems.

Landal GreenParks UK also partnered with Elite Dynamics for its EliteParks park management system to support expansion in the UK, aiming for shared availability, dynamic pricing, reservations, and bookings. Robbie Davies, UK Development Director, emphasized the necessity of a quality software solution for park owners to "take their resorts to the next level."

The company also successfully integrated Salto's cloud-based access control solution, "Salto KS," to provide a "Seamless arrival" feature, eliminating guest waiting times at reception. The digital key developed with Salto Systems is now used by 75% of guests. This successful digitalization of guest experience earned Landal a Dutch Interactive Award in June 2023. However, the ongoing IT migration is contributing to higher-than-expected integration costs in 2024, signaling continued complexity in merging disparate systems.

A notable cybersecurity incident occurred with a data breach by "CL0P" affecting landal.nl, discovered on August 7, 2024. This indicates a critical pain point in data security.

3

OPERATIONAL TRIGGERS

The merger of Landal GreenParks and Roompot, approved in April 2023, has led to substantial operational restructuring. This included the divestiture of 30 holiday parks to Dormio Group to gain regulatory approval. The combined entity now operates across 305 holiday destinations in 11 European countries.

ESG and sustainability are major operational drivers for Landal. The company aims for its operations to become entirely climate-neutral by 2030, with all its parks holding Green Key certification. Landal has an ESG policy structured around six programs, including "Carbon Countdown" for emissions reduction, "Waste Warrior" for waste reduction, and "Nature Nurture" for nature protection. The company is also actively incorporating new information related to the Corporate Sustainability Reporting Directive (CSRD), which will apply to them starting in 2026, and plans a new double materiality exercise in 2025. These initiatives highlight an ongoing need for sustainable products, services, and consulting.

4 HIRING SIGNALS

While specific recent job postings (within the last 6 months) for technology or transformation roles are not explicitly detailed in the provided search results, the overarching strategic direction strongly implies a need for such hires. The ongoing digital transformation initiatives, the significant IT migration costs associated with the merger, and the move to a new international headquarters by March 2025 with the aim to "further professionalise the organisation" and attract talent all suggest active recruitment for roles that support these changes. The formation of a "Team Happy Place" at the new headquarters also indicates a focus on organizational culture and potentially HR transformation.

5 TIMING TRIGGERS

The merger and its subsequent integration form a critical timing trigger. The approval of the Landal GreenParks and Roompot merger in April 2023 initiated a multi-year integration process. The full rebranding to the new "Landal" brand is expected to be completed in 2026, with the new brand identity already visible at over 120 resorts and expanding to over 260 across nine European countries.

A significant upcoming event is the relocation to a new central, international headquarters in Amsterdam. The transformation of this office space began on November 1, 2024, and permanent Dutch office staff are scheduled to move in March 2025. This move represents a major opportunity for service providers in office fit-out, IT infrastructure, and relocation support.

Landal's fiscal year appears to align with the calendar year, with S&P Global Ratings reporting on "full-year 2024" and "first-half 2024 results."

Looking ahead, the Corporate Sustainability Reporting Directive (CSRD) will become applicable to Landal in 2026, with a new double materiality exercise planned for 2025. This provides a clear timeline for compliance and sustainability-related services. While park development was slowed in 2024 due to high interest rates, news from April 16, 2026, indicates the opening of Landal De Wielsche Dreef in July 2026, suggesting ongoing, albeit selective, expansion.

GAP FILL

Landal, formed from the 2023 merger of Roompot and Landal GreenParks, is implementing Maxxton's cloud-based platform for comprehensive management, including bookings, check-ins, inventory, and reservations. This system was chosen for its scalability, multi-currency, and multi-language capabilities to support international growth. For guest experience, Landal utilizes a proprietary app with digital key functionality developed with Salto Systems, integrating with the Salto KS cloud-based access control solution. Additionally, Landal partners with Elite Dynamics, using their EliteParks management system as the preferred IT business solution for its UK parks. Landal also employs ReliaQuest GreyMatter for cybersecurity operations, which integrates with their existing Microsoft security stack.

GAP FILL

Landal GreenParks continues to prioritize digital transformation and technology investment, particularly in enhancing the guest experience. While specific budget figures for 2024, 2025, and 2026 are not publicly disclosed, the company has actively implemented digital solutions such as a guest app for bookings, payments, and digital keys. This focus on digitalization, including partnerships with companies like Salto Systems for "Seamless Arrival" features, aims to improve efficiency and guest satisfaction. Following its 2023 merger with Roompot, the new Landal brand is consolidating its operations with a new international headquarters by 2025, indicating further strategic investments to support its goal of becoming a European market leader. The full rebranding is expected to be completed in 2026.

GAP FILL

The CL0P ransomware group published data belonging to thousands of Landal GreenParks guests in June 2023 **OUTDATED**. This data breach resulted from unauthorized access to Landal GreenParks' MOVEit Transfer system. Stolen information included names, addresses, dates of birth, email addresses, and reservation details, primarily affecting Belgian, German, and Dutch customers. The full size of the data leak was not publicly disclosed.

COMPETITIVE & VENDORS

SALES PLAY

1 RECOMMENDED PITCH ANGLE

POST-MERGER IT INTEGRATION & HARMONIZATION PLAY

Landal is navigating complex digital integration following the 2023 Roompot merger, with IT migration costs exceeding expectations and EBITDA margins dropping from 22.2% to 17-18% in 2024. The company is implementing Maxxton cloud platform, EliteParks UK system, and Salto access control while consolidating to Amsterdam HQ by March 2025. ITC Infotech's CIO 360 service line—specifically App Modernization and AI-RunOps—can accelerate system harmonization, reduce integration costs, and enable the scalable multi-country, multi-currency platform Landal needs to complete its 2026 rebranding across 260+ resorts.

2 CONVERSATION OPENER QUESTIONS

As you consolidate Maxxton, EliteParks, and Salto systems across 11 countries by 2026, how are you ensuring API integration consistency and avoiding the legacy multi-language challenges that slowed your previous platform?

With your EBITDA margin compressed to 17% due to IT migration costs and FOCF negative at €30-40M in 2024, what visibility do you have into when integration expenses will materially decrease as forecasted for 2025?

Following the CL0P breach in June 2023 and your ReliaQuest deployment, how is cybersecurity architecture being standardized across the merged Landal-Roompot infrastructure, especially with CSRD compliance required by 2026?

Your Amsterdam HQ move in March 2025 represents a major organizational milestone—how are you approaching the harmonization of digital systems and processes to support the 'uniform systems and working methods' goal Carla Milovanov is driving?

3 LANDMINES TO AVOID

⚠ Leading with SAP S/4HANA migration

No evidence Landal runs SAP ECC or has ERP modernization as a stated priority. They're focused on hospitality-specific platforms like Maxxton and EliteParks. Pushing SAP will expose you as generic and uninformed.

⚠ Proposing offshore development centers in India

Landal has no India presence and is consolidating European operations to Amsterdam. Suggesting offshore delivery contradicts their centralization strategy and will seem tone-deaf to their post-merger integration focus.

⚠ Overselling AI/ML capabilities without context

While Landal is digitizing guest experience, there's no evidence of AI initiatives beyond standard automation. Leading with AI Act compliance or Digital Twins feels forced for a hospitality operator focused on basic system integration.

4 SUGGESTED NEXT STEP

Request a 45-minute discovery workshop with Carla Milovanov (CIO) and her integration team to review current IT harmonization roadmap, specifically around API standardization, system consolidation timelines, and cost optimization opportunities. Propose bringing ITC's App Modernization lead and a Cloud/Integration architect to map quick-win scenarios that could accelerate the 2025 synergy realization and reduce ongoing integration expenses.

5 BEST ENTRY POINT

Carla Milovanov

CHIEF INFORMATION OFFICER

Milovanov is the definitive entry point—she joined June 2024 specifically to lead 'integration and harmonisation of Roompot and Landal GreenParks' digital systems' and has direct accountability for the IT migration driving cost overruns. Her background integrating 30+ brands into a single tech stack at Accor mirrors Landal's current challenge. Approach by acknowledging her Accor experience with multi-brand platform consolidation and offering tactical support for the 2025-2026 harmonization sprint, focusing on cost reduction and API integration acceleration ahead of the full 2026 rebranding completion.

This report was generated with AI assistance using publicly available sources including company websites, press releases, earnings calls, and news. AI tools can introduce errors — cross-check any data point before use in a conversation. Do not share outside ITC Infotech.
