 Verify before use

 COMPANY SNAPSHOT

1 REVENUE & MARGIN

Last reported annual revenue: €646 million (gross annual turnover 2022).

Operating/Net Margin: Not publicly available.

2 REVENUE TREND

Year	Revenue	Margin
2022	€646 million	Not publicly available
2021	€550 million	Not publicly available
2020	€405 million	Not publicly available
2019	€623.08 million (calculated from 2020 revenue being 35% less than 2019)	Not publicly available

3 EMPLOYEES

Total global headcount: Around 5,200 people (since the merger with Roompot in 2023). Other sources indicate approximately 3,000 to 3,500 employees.

Breakdown by high-cost locations: Not publicly available for most locations. Landal Greenparks (UK) Limited had 22 employees as of April 30, 2026.

4 INDIA PRESENCE

India GCC, delivery center, or R&D center: Not publicly available.

Headcount and location: Not publicly available.

5 RECENT NEWS

(Last 6 months: December 2023 - June 2024)

(a) Product News: Not publicly available within the specified timeframe.

(b) Company News: Not publicly available within the specified timeframe.

6 M&A ACTIVITY

(Last 2 years: June 2022 - June 2024)

Merger: Landal GreenParks merged with Roompot and now operates under the name 'Landal'. The merger was approved by the Dutch Authority for Consumers and Markets (ACM) in April 2023. Roompot acquired Landal GreenParks from Awaze, a Platinum Equity portfolio company.

Divestitures: As a condition of the merger, Roompot and Landal GreenParks transferred 30 holiday parks and two brand names (Hogenboom and Largo) to Dormio Group in April 2023.

Investment Rounds: Landal is a funded company, with KKR as an investor through its acquisition of Roompot. Landal is private equity-backed.

7 OWNERSHIP STRUCTURE

Private (private limited company).

PE-backed: Owned by Kohlberg Kravis Roberts & Co (KKR) since the merger with Roompot in 2023.

8 KEY COMPETITORS

Center Parcs

GAP FILL

Landal GreenParks' gross annual turnover for 2022 was €646 million. The operating margin and net profit for 2022 are not available in the provided search results.

GAP FILL

Landal, post-merger with Roompot, employs approximately 5,000 to 5,200 people across its parks and office locations. These employees work in countries including the Netherlands, Germany, Denmark, the United Kingdom, Belgium, Austria, Switzerland, the Czech Republic, and Hungary. Specific employee numbers for each country are not publicly detailed.

GAP FILL

Landal GreenParks' gross annual turnover for 2022 was €646 million. Following its merger with Roompot in 2023, specific standalone revenue figures for Landal GreenParks for 2023 and 2024 are not readily available. Reported 2023 figures consolidated 8 months of Landal's business. As of June 2024, the combined group's revenue was €482.9 million, a 0.6% decline compared to 2023 on a comparable basis (which includes the full contribution from Landal).

Landal, having merged with Roompot and rebranded in 2025, is now a leading European provider of holidays in nature. The company operates over 22,500 accommodations across more than 200 holiday locations in eight countries.

1. CORPORATE VISION & DIRECTION

Leadership is focused on further international growth and a commitment to environmental sustainability, driven by the purpose "We give everyone the freedom to find their happy place". The overarching ambition is to become the "undisputed European market leader in holidays in nature".

Martin Jermiin was appointed as the new Chief Executive Officer (CEO), effective April 7, 2026, succeeding Mikael Andersson, who successfully oversaw the integration of Roompot and Landal GreenParks. Dirk Anbeek, Chairman of the Supervisory Board, noted that Jermiin "combines a focus on sustainable growth with a powerful brand experience, strategic vision and a solid operational foundation. He is a collaborative leader who will stay close to the parks, the teams, homeowners and the guests".

The company's new international headquarters was established in Amsterdam by 2025 to professionalize the organization, foster cooperation, and strengthen connections among colleagues across various locations. Landal will continue to operate from multiple offices in the Netherlands and through regional offices abroad, leveraging an international talent pool.

2. BIG STRATEGIC INITIATIVES

Expansion: Landal is actively expanding its portfolio with new park openings and developments. For 2026, several new Landal parks are available for booking or are in development, including Landal Soof Heuvelrug, Landal Waterpark Oudehaske, Landal Soof aan de Rijn, Landal Olde Kottink, Landal De Thijmse Berg, Landal Buytenplaets Rhenen, Landal Namur Nature, Landal Buitenheem (opening Spring 2026), Landal Parc des Sources in the Belgian Ardennes, Landal De Strabrechtse Vennen, Landal Nature Parc Saint Hubert, Landal De Wedderplassen, and Landal Landgoed Bourtange.

Sustainability Mandates: Landal maintains an active sustainability policy, with all parks being Green Key certified. The organization aims to "strengthen and accelerate its sustainability targets in areas such as CO2 and waste reduction" by utilizing Landal GreenParks' existing expertise. Previous investments included €39 million for the construction of 74 zero-energy holiday homes in Mont Royal, Germany, and the second phase of De Reeuwijkse Plassen in the Netherlands, recognized as a highly sustainable recreational park.

Restructuring & Integration: The merger of Roompot and Landal GreenParks culminated in a unified "Landal" brand, a single commercial platform, and one operating model, a process successfully led by former CEO Mikael Andersson. The complete rollout of the Landal brand across all parks is anticipated to continue until the end of 2026. The integration also involved harmonizing diverse employment conditions into a new, single package for the Dutch operations.

3. TECHNOLOGY STRATEGY

Landal's technology strategy is centered on digitalization and platform consolidation following the merger. The company is leveraging Roompot's expertise in digitalization and project development to accelerate the enhancement of Landal GreenParks locations. A significant initiative involves the unification of the businesses under "one commercial platform, and one operating model". A new Landal website is planned to offer the complete range of holiday parks.

Regarding vendor relationships and build vs. buy signals, Landal GreenParks has sought solutions that are easily integrated into their API and can support their goal of becoming more technology-driven. An example of this is the adoption of Salto Systems for cloud-based smart access control, indicating a "buy" approach for specialized technological solutions. There is no specific stated public stance on AI adoption or extensive details on cloud migration beyond the general push for digitalization and a unified platform.

Here is the leadership data for Landal GreenParks:

1 KEY DECISION MAKERS

CEO: Martin Jermiin

Tenure: Appointed CEO effective April 7, 2026.

Background: Joins from Flying Tiger Copenhagen, where he served as CEO for seven years. He brings extensive international experience in retail and business transformation, including positioning the brand across dozens of countries.

CFO: Douwe Snel

Tenure: Starts May 2026.

Background: Previously the financial director at Plus, where he played a leading role in the merger with Coop and subsequent reorganization. He also worked for Jumbo and was CFO at startup Plantlab.

CTO/CDO: Carla Milovanov (CIO), Belinde Bakker (CDO)

Carla Milovanov (CIO)

Tenure: Appointed Chief Information Officer effective June 1, 2024.

Background: Previously led global hotel and client technology teams at Accor, focusing on integrating over 30 brands within a single technology stack and transforming guest and personnel experiences.

Belinde Bakker (CDO)

Tenure: Member of the executive team.

Background: Specific background details were not readily available in the provided search results.

COO: Cees van Vliet

Tenure: Appears as COO in an April 2025 executive team photo.

Background: Specific background and start date were not readily available in the provided search results, but he took over from Jeroen Mol who stepped down in May 2024.

2 RECENT LEADERSHIP CHANGES

CEO Change (Timing Signal): Mikael Andersson stepped down as CEO on January 15, 2026, after six years with the company, having led the integration of Roompot and Landal GreenParks. Martijn Bouquet, Chief Transformation & Strategy Officer, served as interim CEO from January 2026 until Martin Jermiin's start date of April 7, 2026.

CFO Change (Timing Signal): Douwe Snel was appointed CFO, effective May 2026, succeeding Bastiaan Haks, who had joined as CFO on June 1, 2024.

COO Change (Timing Signal): Jeroen Mol stepped down as Chief Operations Officer in May 2024 due to health reasons. Cees van Vliet is now listed as COO.

CIO Appointment (Timing Signal): Carla Milovanov was appointed Chief Information Officer (CIO) effective June 1, 2024.

CCO Appointment (Timing Signal): Tjalling Smit was appointed Chief Commercial Officer (CCO) effective August 1, 2024.

3 ORG STRUCTURE SIGNALS

Landal GreenParks, following its merger with Roompot in 2023, is moving towards a centralized technology structure. The company established a single international headquarters in Amsterdam by 2025 to enable more efficient collaboration and stronger connections across its European operations. A key focus for the newly appointed CIO, Carla Milovanov, has been the integration and harmonization of the digital systems of Roompot and Landal GreenParks. The ambition is for all parks to operate on a single platform and the same reservation system. Landal utilizes a Master Data Management (MDM) platform (Stibo Systems' STEP) to centralize data and images, standardize terminology, and prepare its technology

infrastructure for international growth. Technology is considered a significant part of their mission to enhance guest experience and streamline operations through API integration.

4

BOARD COMPOSITION

Owner/Strategic Investor: Landal GreenParks is owned by Kohlberg Kravis Roberts & Co (KKR). KKR acquired Roompot in 2020, which subsequently acquired Landal GreenParks from Awaze (a Platinum Equity portfolio company) in 2023.

Chairman of the Supervisory Board: Dirk Anbeek. He was instrumental in the carve-out of Landal from Awaze/Wyndham and its growth, and he is the primary point of contact for the Executive Team.

GAP FILL

Carla Milovanov began her tenure as Chief Information Officer (CIO) at Landal GreenParks (now Landal) on June 1, 2024. Her initial focus involves the integration and harmonization of digital systems following the merger of Roompot and Landal GreenParks. Milovanov brings extensive international experience in the travel and hospitality sector, particularly in the hotel business. This includes leading global hotel and customer technology teams at Accor, where she worked on integrating over 30 brands into a single technology platform. Originally from Brazil, she has 17 years of experience in hospitality, having worked in the UK for 11 years before moving to the Netherlands for her role at Landal.

BUYING SIGNALS

Here are the buying signals and pain points for Landal GreenParks:

1 FINANCIAL STRESS SIGNALS

Cost pressures are expected to persist for Landal due to wage inflation and restructuring costs associated with the integration of Landal and Roompot.

S&P Global Ratings anticipates that the combined entity's revenue for full-year 2024 will remain flat year-on-year, considering the full integration of Landal in 2023.

Revenue is only expected to marginally increase by approximately 3%-4% in 2025.

The company aims to progressively reduce S&P Global Ratings-adjusted leverage to about 7.0x in 2025.

The restructuring following the merger led to some positions being made redundant, which is a form of cost-cutting.

2 TECHNOLOGY PAIN SIGNALS

Landal GreenParks experienced a data breach on August 7, 2024.

The integration of Landal and Roompot highlighted a need for "uniform systems, processes and working methods" to prepare for international growth.

Roompot intended to leverage its expertise in digitalization to accelerate the development of Landal GreenParks locations, suggesting areas where Landal's technology could be improved.

3 OPERATIONAL PAIN SIGNALS

The merger required Landal GreenParks and Roompot to sell 30 holiday parks to Dormio Group to receive approval from the Dutch Authority for Consumers and Markets (ACM). This divestiture would have involved significant operational challenges in transferring assets and ensuring continuity.

The ongoing integration involves restructuring office organizations to support both brands (Landal and Roompot) from one unified structure, with departments like food service, marketing, and owner service now supporting both, indicating a drive for improved operational efficiency.

The rebranding of Roompot parks to the Landal brand, which began in May 2025 with the first six parks in Germany and Belgium, and continues for other parks, presents operational complexities related to visual changes, new logos, and adjusted park naming.

4 HIRING SIGNALS

The restructuring of the Dutch office organization following the April 2023 merger resulted in some positions being eliminated due to duplication, leading to employee departures. This indicates a period of layoffs and cost pressure within the office functions.

While some positions were eliminated, new functions were also created, and most employees were offered continued employment in existing or new roles.

As of December 2025/January 2026, the combined Landal (formerly Landal GreenParks and Roompot) employs approximately 5,200 colleagues across its destinations and offices.

5 TIMING TRIGGERS

Post-M&A Integration: The most significant trigger is the merger between Landal GreenParks and Roompot, which received final regulatory approval in April 2023. This is an ongoing process involving extensive integration of operations, systems, and branding.

Announced Transformation & Rebranding: The combined entity is undergoing a major transformation, unifying under a single "Landal" brand, with rebranding efforts underway for former Roompot parks.

New Leadership & Organizational Structure: New key leadership roles have been identified, including Mikael Andersson (CEO), Tjalling Smit (CCO), Carla Milovanov (CIO), and Bastiaan Haks (CFO). The new combined

organization will also establish a central, international headquarters in Amsterdam by 2025 to facilitate more efficient collaboration.

Regulatory Deadline Impact: The requirement to sell 30 holiday parks to Dormio Group was a critical regulatory condition for the merger, impacting their portfolio and operations.

GAP FILL

Landal GreenParks faced challenges with fragmented IT infrastructure and nascent cybersecurity operations, especially following a major merger, requiring unified security and streamlined systems. They experienced data inconsistencies across multiple channels and departments, necessitating a single source of truth for product information. Improving guest experience by removing friction points, like physical check-ins, and meeting evolving digital expectations is a key focus, driven by their ambitious growth and expansion.

 COMPETITIVE & VENDORS

Landal GreenParks, which merged with Roompot in 2023 to operate under the unified "Landal" brand, is a prominent European holiday park operator undergoing significant technological and strategic transformations.

1. Current Tech Vendors

Landal leverages a mix of specialized software and platforms to manage its extensive network of holiday parks and guest experiences:

Property Management & Booking Systems:

Maxxton Software: The merged Landal entity is gradually implementing Maxxton's cloud-based platform for core operational functionalities, including bookings, check-ins, inventory, and reservations. This system offers multi-currency and multi-language capabilities crucial for international growth.

Elite Dynamics (EliteParks): Landal GreenParks UK has partnered with Elite Dynamics, utilizing their EliteParks park management system. This solution facilitates shared availability, dynamic pricing, reservations, and bookings specifically for the UK market.

Access Control & Guest Experience:

Salto Systems (Salto KS): Landal GreenParks employs Salto's cloud-based access control solution, Salto KS, to enable "Seamless arrival" and digital key functionalities, integrating via API. This technology allows guests to use their smartphones for unlocking accommodations and accessing park facilities, reducing reliance on physical check-ins.

Landal App: Landal has developed a proprietary guest app that provides practical information, recreational details, digital check-in, and digital keys. The app also features the "Landal Adventure" game for children, designed to encourage outdoor exploration within the parks.

Data Transfer:

MOVEit: In June 2023, Landal GreenParks was affected by a data breach related to the widely used MOVEit software, indicating its use for data transfer processes.

Artificial Intelligence (AI):

Landal GreenParks demonstrated an early adoption of AI by winning a DDMA AI Hackathon in 2020. They developed a self-learning model to predict guest questions based on website behavior, aiming to provide relevant tips throughout the customer journey.

Web & Digital Communication:

The company heavily relies on its website and online communication, with 70% of reservations made online as of 2018.

2. Known SI/Consulting Partners

Landal collaborates with various consulting and technology partners for specific projects and strategic initiatives:

iO Digital: This digital agency has partnered with Landal for the co-creation and agile development of the Landal app and other digital services, indicating their role as a cloud, data, integration, and AI transformation partner.

Adjust Consulting: In September 2021, Adjust Consulting assisted Landal GreenParks in professionalizing its purchasing function.

&samhoud creative tech: This digital agency collaborated on the development of the "Landal Adventure" app, blending digital experience with real-life environments.

De Projectgroep (part of Satelliet Group): An exclusive, long-term partnership was announced in March 2025 for the design, complete furnishing, and logistical fulfillment for all Landal parks across eight European countries.

There are no direct mentions of large global Systems Integrators (SIs) like Accenture, TCS, Infosys, or Deloitte in the provided information.

3. Procurement Signals

Several factors indicate ongoing and future procurement activities at Landal:

Post-Merger Integration and Rebranding: The 2023 merger of Landal GreenParks and Roompot, operating under the new "Landal" brand, necessitates significant IT integration, consolidation, and potential upgrades across all systems to support the combined entity. The establishment of a central, international headquarters in Amsterdam by 2025 further underscores this drive for professionalization.

New Platform Implementation: The gradual implementation of Maxxton's comprehensive management platform signals a major investment in modernizing core operational systems for bookings, check-ins, and inventory.

Specialized UK Market Solution: The partnership with Elite Dynamics for its EliteParks system in the UK indicates specific procurement for regional operational needs, particularly as Landal GreenParks UK was in a period of expansion.

Data Security Review: The MOVEit data breach in June 2023 likely prompted a review and potential procurement for enhanced data security and transfer solutions.

Guest Experience Technology: Continuous development and enhancement of the Landal app, including digital keys and smart access control solutions, points to ongoing investments in customer-facing digital tools and API integrations.

Procurement Function Optimization: The engagement with Adjust Consulting highlights an internal focus on streamlining and professionalizing procurement processes across the organization.

Ongoing Investments in Quality and Sustainability: Landal has a history of significant investments (€300 million allocated in 2018 for new projects, expansion, and sustainability), and a commitment to becoming climate-neutral by 2030. This implies continuous procurement of sustainable solutions, technologies, and services.

4. Competitive Dynamics

Landal (the merged entity of Landal GreenParks and Roompot) is a dominant force in the European holiday park market:

Market Leadership and Consolidation: The merger positions Landal to become the "undisputed European market leader in holidays in nature," boasting over 300 destinations and 30,000 accommodations across 11 countries. Landal GreenParks was already the market leader in the Netherlands and the fastest-growing chalet park brand as of 2018.

Growth Trajectory: Landal GreenParks successfully maintained its market leader position in 2020 despite the COVID-19 pandemic, growing 11% more than its competitors, according to the sector association RECRON. The broader European holiday park market is projected to grow at a Compound Annual Growth Rate (CAGR) of 7% to 10% from 2025 to 2030, driven by increased demand for domestic travel and property investment. The camping and caravanning market is also experiencing significant growth.

Top Competitors:

Center Parcs: Frequently cited as a primary competitor.

Haven: Also listed as a key competitor.

Park Holidays: Another significant competitor in the market.

Dormio Group: Acquired 30 parks from the combined Landal/Roompot entity as a condition for regulatory approval of the merger, indicating its role as a growing player.

Other broader leisure and entertainment companies like Aqua Park, SeaWorld Entertainment, Longleat, and Dreamworld are also identified as competitors, though less directly in the holiday park segment.

Market Share Dynamics: The merger itself is a strategic move to significantly increase market share and solidify Landal's leadership in Europe. Landal's resilient performance during the pandemic and its continuous expansion efforts suggest it is actively gaining or at least strengthening its market share. The overall market trends, favoring domestic and nature-based holidays, also play into Landal's strengths.

1. RECOMMENDED PITCH ANGLE

Transformation play focused on post-merger platform consolidation and guest experience digitalization.

Landal is in the midst of a massive transformation following the April 2023 merger of Roompot and Landal GreenParks. The newly appointed CIO Carla Milovanov (started June 2024) has an explicit mandate to integrate and harmonize digital systems across 300+ destinations into a single platform and unified reservation system. With 70% of bookings happening online, fragmented IT infrastructure from two legacy organizations, and ambitious international expansion plans requiring "uniform systems, processes and working methods," Landal faces a critical 18-24 month window to get technology right. The establishment of a new Amsterdam headquarters in 2025 and complete brand rollout by end of 2026 creates urgency. Technology is explicitly called out as "a significant part of their mission" to enhance guest experience and streamline operations.

2. CONVERSATION OPENER QUESTIONS

Question 1: Carla mentioned the ambition to have all parks operating on a single platform and reservation system—as you approach year two of the integration, what are the biggest technical challenges you're encountering in harmonizing the Roompot and Landal GreenParks technology stacks, particularly around the Maxxton implementation?

Question 2: With the complete Landal brand rollout planned through end of 2026 and Martin Jermiin now leading as CEO with a focus on sustainable growth and brand experience, how is technology investment being prioritized between guest-facing digital capabilities versus back-office operational efficiency?

Question 3: You've made significant progress with digital keys and seamless arrival through Salto KS integration—what's the vision for the next generation of the Landal app experience, especially as you expand across 11 countries with different guest expectations and regulatory requirements?

Question 4: Given the August 2024 data breach and the MOVEit incident in 2023, how are you approaching cybersecurity architecture as you consolidate systems, and what role does security play in your platform selection criteria for the unified technology stack?

Question 5: With new CFO Douwe Snel joining in May 2026 and S&P projecting leverage reduction to 7.0x in 2025 amid continued cost pressures, how are you balancing necessary technology investments for the merger integration against the financial discipline required to hit those targets?

3. LANDMINES TO AVOID

Avoid discussing the forced divestiture of 30 parks to Dormio Group as a regulatory condition of the merger. This was a painful concession to get ACM approval and raises questions about competitive concerns and lost assets. Stay focused on the future combined entity, not what they had to give up.

Do not criticize or question the decision to rebrand everything under Landal rather than maintaining dual brands. This decision has already been made at the highest levels, is well underway since May 2025, and second-guessing it will alienate stakeholders invested in the unified brand strategy.

Avoid references to the recent CFO churn. Bastiaan Haks joined in June 2024 and was already replaced by Douwe Snel in May 2026 after less than a year. This suggests possible internal friction or strategic misalignment during integration. Let them bring it up if relevant; don't probe.

Do not lead with cost-cutting or efficiency messaging that implies headcount reduction. The restructuring already resulted in redundancies and employee departures, a sensitive topic. While cost pressures exist, frame solutions around growth enablement, revenue optimization, and guest experience rather than workforce reduction.

4. SUGGESTED NEXT STEP

Request a 45-minute discovery workshop with Carla Milovanov (CIO) and a representative from her integration team to map the current state of platform consolidation, specifically focusing on API integration patterns, data management challenges stemming from the fragmented legacy systems, and roadmap priorities for the unified reservation system

implementation. The objective would be to identify 2-3 specific technical pain points where your solutions could accelerate the integration timeline or reduce risk, with a follow-up technical proof-of-concept scoped within 30 days.

5. BEST ENTRY POINT

Carla Milovanov, Chief Information Officer.

Carla is the single best entry point for technology solutions. She joined June 1, 2024, specifically to lead the digital integration of the merger, reporting directly to the executive team. She has explicit ownership of harmonizing systems, implementing the single platform strategy, and preparing technology infrastructure for international growth. She brings a transformation mindset from Accor where she integrated 30+ brands into one technology stack, exactly the challenge she faces at Landal. At approximately 18 months into her tenure, she's past the assessment phase and into active implementation, meaning she has budget allocated, priorities defined, and urgency to show progress. Her background in hospitality technology and international hotel systems makes her fluent in the language of guest experience platforms, API integrations, and multi-country technology deployments. With the CEO transition to Martin Jermiin in April 2026 and new CFO Douwe Snel in May 2026, Carla is actually the most stable C-suite member with the longest current tenure and deepest context on the technology transformation roadmap. She is the decision-maker for technology vendor selection and the gatekeeper for any solutions touching the core platform consolidation effort.
