 Verify before use

 COMPANY SNAPSHOT

1 REVENUE & MARGIN

Last reported annual revenue: €646 million (gross annual turnover for 2022). Landal GreenParks generated \$497.4 million in revenue **UNVERIFIED** (year not specified).

Operating/Net Margin: Not publicly available.

2 REVENUE TREND

Year	Revenue (Millions)	Margin
2019	€405	Not publicly available
2020	€491	Not publicly available
2021	€550	Not publicly available
2022	€646	Not publicly available

3 EMPLOYEES

Landal GreenParks had approximately 3,000 total employees as of 2024 **UNVERIFIED**.

In 2022, Landal GreenParks employed a staff of 3,500 people at its resorts and various offices.

Following the merger with Roompot, the combined entity "Landal" employs around 5,200 people across its parks and office locations. Another source states approximately 5,000 employees work at the parks and offices in the Netherlands, Germany, Denmark, and the UK.

Breakdown by high-cost locations (US, UK, Germany, Australia, Canada): Not publicly available for specific headcounts, though Landal operates parks and has employees in the UK and Germany.

4 INDIA PRESENCE

No publicly available information on India GCC, delivery center, or R&D center.

5 RECENT NEWS

(Last 6 months: December 2, 2025 - June 2, 2026)

(a) Product News:

Landal announced "Five New Reasons to Cross the Channel" highlighting new Dutch escapes, including beach houses and private-pool villas (May 22, 2026).

Offers for "May Half Term Escapes: Super Staycations with Spring Savings" were promoted (April 20, 2026).

(b) Company News:

A fire occurred near Weerterbergen (April 30, 2026).

6 M&A ACTIVITY

(Last 2 years: June 2, 2024 - June 2, 2026)

The significant merger between Landal GreenParks and Roompot was approved by the Dutch Authority for Consumers and Markets (ACM) in April 2023 and completed in April 2023, which is outside the last two years. As a condition of this merger, 30 holiday parks from the combined entity were sold to Dormio Group in April 2023.

No acquisitions, mergers, divestitures, or investment rounds by Landal GreenParks (or the combined Landal entity) have been publicly reported within the last two years (June 2024 - June 2026).

7 OWNERSHIP STRUCTURE

Landal GreenParks, following its merger with Roompot, is privately owned and backed by the American private equity firm Kohlberg Kravis Roberts & Co (KKR).

STRATEGIC DIRECTION

Landal GreenParks, now operating as Landal following its 2023 merger with Roompot, is pursuing an aggressive corporate strategy focused on European market leadership, significant expansion, and deep commitment to sustainability and technological advancement.

1. CORPORATE VISION & DIRECTION

Landal's leadership is steering the company towards becoming the "undisputed European market leader in holidays in nature." This vision is underpinned by the purpose: "We give everyone the freedom to find their happy place."

In a recent leadership transition, Mikael Andersson stepped down as CEO on January 15, 2026. Martijn Bouquet, the Chief Transformation & Strategy Officer, is currently serving as interim CEO while a search for a permanent successor is underway. Mikael Andersson, reflecting on his tenure, stated, "It has been an honour to lead Landal through such a pivotal phase in its history. I am incredibly proud of what we have achieved together – from integrating two strong brands into one unified business to reinforcing our leadership position in the Dutch market."

Key leadership appointments in 2024 included Mikael Andersson as CEO (until his departure in 2026), Tjalling Smit as Chief Commercial Officer (CCO) as of August 1, 2024, and Carla Milovanov as Chief Information Officer (CIO) as of June 1, 2024. Bastiaan Haks serves as the Chief Financial Officer (CFO).

A significant directional move is the establishment of a central, international headquarters in Amsterdam by March 2025. This move aims to professionalize the organization further and enhance collaboration and connectivity across its operations.

2. BIG STRATEGIC INITIATIVES

Landal is engaged in several strategic initiatives to drive its growth and uphold its brand values:

European Expansion: The company continues its aggressive European expansion, focusing on both new and existing destinations in the Netherlands, Belgium, Germany, and Great Britain. As of late 2024, Landal operates over 300 parks with more than 30,000 accommodations across 11 countries, including the Netherlands, Belgium, Germany, Denmark, the United Kingdom, Austria, Switzerland, the Czech Republic, France, Spain, and Luxembourg.

Recent and upcoming park openings for 2025 include Landal Olde Kottink, Landal Arber, Landal Landgoed Bourtange, Landal Duynvallei, Landal De Strabrechtse Vennen, Landal Klein Oisterwijk, and four new parks in the UK.

Previous investments included €101 million for four new resorts in 2018 (Kaatsheuvel and Volendam in the Netherlands, Bad Boltenhagen in Germany, and Maria-Alm in Austria), along with further investments in its Danish and UK parks.

Sustainability Mandates: Landal has an active and comprehensive sustainability policy, with all its parks holding Green Key certification.

Climate Neutrality by 2030: The overarching goal is to achieve complete climate neutrality by 2030.

"Carbon Countdown" Program: This initiative focuses on reducing CO2 emissions by transitioning from fossil fuels to 100% sustainable European wind energy (achieved since 2025), decreasing gas consumption through smart savings and electric heating, constructing gas- and propane-free buildings, and implementing electric logistics.

"Waste Warrior" Program: Landal aims to reduce waste through conscious purchasing, increased reuse, donation of discarded items, and expanded waste separation efforts.

Biodiversity: Initiatives include establishing wildflower meadows and adding beehives and insect hotels to parks to protect and foster local wildlife.

Sustainable Accommodations: They are converting existing accommodations to utilize heat pumps and solar panels, building energy-neutral houses, and using recycled or recyclable materials for interiors.

Quality Improvements & Guest Experience: Landal has allocated €300 million for investments in new building projects, expansion, and making existing parks more sustainable. A significant portion, €197 million, is dedicated to quality improvements, expansions, and new building projects at existing parks, including the construction of 74 zero-energy holiday homes at Mont Royal in Germany. The company prioritizes a "frictionless guest experience" and aims for a "seamless arrival" process, minimizing waiting times at reception.

3. TECHNOLOGY STRATEGY

Technology is a critical component of Landal's strategy to enhance guest experience and operational efficiency.

Digital Transformation & Platform Consolidation: Landal is undergoing an "award-winning digital transformation" to create a seamless, hybrid hospitality experience for guests, from initial discovery to booking and departure.

A primary focus for Carla Milovanov, CIO, is the "integration and harmonisation of Roompot and Landal GreenParks' digital systems" following the merger, aiming for a unified commercial platform and operating model.

Landal has adopted Maxxton's cloud-based platform for comprehensive management of bookings, check-ins, inventory, and reservations. This system provides essential multi-currency and multi-language capabilities crucial for its international expansion. Landal described Maxxton as "at least two years ahead of its time compared to other software systems."

AI Adoption Stance: Landal is actively exploring and implementing Artificial Intelligence (AI) for practical applications in the hospitality sector.

The company won the DDMA AI Hackathon in 2020 for an "end-to-end solution, which is scalable for broader applications within the organization" and "technologically very well put together."

AI and social media are increasingly recognized as important tools for determining travel destinations.

Landal is testing smart solutions, including autonomous robots from Clevon, to streamline operations and enhance services like package delivery. A pilot project is underway, with an ambitious goal to deploy up to 500 robots across European parks.

Vendor Relationships: Landal collaborates with key technology partners:

Salto Systems: For cloud-based access control solutions that facilitate "seamless arrival" and enable guests to use a digital key, which can be shared via WhatsApp.

Elite Dynamics: For IT business solutions, with their EliteParks system becoming the preferred park management software for Landal GreenParks' UK customers.

iO Digital: A long-standing partner for two decades, working on Landal's digital ecosystem and online booking management systems, emphasizing co-creation in their agile development process.

LEADERSHIP & ORG

Landal GreenParks, operating under the brand name Landal following its merger with Roompot, has seen significant leadership changes recently, reflecting its ambition for international growth and integration.

1 KEY DECISION MAKERS

CEO: Martin Jermiin

Start Date: April 7, 2026

Background: Jermiin brings extensive international experience in retail and business transformation, most recently serving for seven years as CEO of the Danish retail company Flying Tiger Copenhagen, where he was responsible for international expansion and positioning the brand across multiple countries.

CFO: Douwe Snel

Start Date: May 2026

Background: Snel joins Landal from the supermarket organization Plus, where he served as financial director and played a leading role in the merger with Coop and subsequent reorganization. He previously worked for over ten years in finance roles at Jumbo and was CFO at startup Plantlab for two years.

CIO: Carla Milovanov

Start Date: June 1, 2024

Background: Milovanov has extensive international experience in the travel and hospitality sector, particularly in the hotel business, and previously led client technology teams at global hospitality brand Accor. Her initial focus at Landal was on the integration and harmonization of digital systems. (Confirmed to be still in role as of April 2025.)

COO: Cees van Vliet

Start Date: Prior to April 2025 (Exact date not specified in available search results).

Background: While a detailed background is not immediately available in the search results, Cees van Vliet was pictured as COO **UNVERIFIED** in an April 2025 team photo. No information indicating his departure in 2024, 2025, or 2026 was found.

Other Key Executives (Confirmed still in role as of April 2025):

CCO (Chief Commercial Officer): Tjalling Smit

Start Date: August 1, 2024

Background: Smit joined from Nederlandse Spoorwegen (Dutch Railways) where he was CCO, and prior to that held various commercial director positions at Transavia and Air France-KLM airlines, bringing broad international experience in digital products, revenue management, and marketing.

CDO (Chief Development Officer): Belinde Bakker

CHRO (Chief Human Resources Officer): Alrik Boonstra

CTSO (Chief Transformation & Strategy Officer): Martijn Bouquet

Start Date: March 31, 2025 (appointed as Chief Transformation Officer)

Background: Bouquet previously worked at The Boston Consulting Group, served as COO and CCO in retail and medical sectors, and was a Senior Portfolio Manager at Waterland, where he focused on operational value creation for portfolio companies. He was also Chief Transformation & Operating Officer at Xebia Group. He temporarily assumed CEO responsibilities from January 2026 until the new CEO's arrival.

2 RECENT LEADERSHIP CHANGES

Mikael Andersson (CEO) departed: Stepped down as Chief Executive Officer on January 15, 2026, after six years with the company, including leading the integration of Roompot and Landal GreenParks.

Martin Jermiin (CEO) appointed: Assumed the role of CEO on April 7, 2026, succeeding Mikael Andersson. (Timing Signal: April 2026)

Coen van der Wel (CFO) departed: Announced his departure in early 2024. (Timing Signal: Early 2024)

Bastiaan Haks (CFO) appointed and departing: Appointed CFO on June 1, 2024, and will be succeeded by Douwe Snel in May 2026. (Timing Signal: May 2026)

Douwe Snel (CFO) appointed: Will start as CFO in May 2026. (Timing Signal: May 2026)

Jeroen Mol (COO) departed: Stepped down as Chief Operations Officer in May 2024 due to physical health complaints and decided not to return. (Timing Signal: May 2024)

Tjalling Smit (CCO) appointed: Filled the Chief Commercial Officer position on August 1, 2024. (Timing Signal: August 2024)

Carla Milovanov (CIO) appointed: Assumed the Chief Information Officer role on June 1, 2024. (Timing Signal: June 2024)

Martijn Bouquet (Chief Transformation & Strategy Officer) appointed: Joined Landal in March 2025. (Timing Signal: March 2025)

3 **ORG STRUCTURE SIGNALS**

Landal GreenParks and Roompot have merged into a single organization operating under the Landal brand, with a new international headquarters established in Amsterdam.

Technology is being centralized and harmonized across the merged entity. Carla Milovanov's initial focus as CIO was specifically on the "integration and harmonisation of Roompot and Landal GreenParks' digital systems," indicating a strong push towards a unified technology platform.

Martijn Bouquet's role as Chief Transformation & Strategy Officer also encompasses "transformation across various areas, including park operations, IT, procurement, and brand," further supporting a centralized and integrated approach to business functions, including technology.

4 **BOARD COMPOSITION**

Chairman of the Supervisory Board: Dirk Anbeek

PE Representation/Ownership: Landal is owned by the American investment fund Kohlberg Kravis Roberts & Co (KKR) since the merger with Roompot in 2023. International investors have held shares in the company since 1996.

GAP FILL

Douwe Snel became CFO of Landal in May 2026. Prior to this, he served as CFO at PLUS from May 2024, playing a key role in the merger with Coop. He was also CFO at PlantLab, responsible for finance, ICT, and HR. His career began in corporate finance at Kempen & Co, followed by financial roles at Asilia Africa. He also held positions at Jumbo Supermarkten, including Manager Business Control and Director Franchise & Real Estate and M&A, and was CFO of the EMTÉ joint venture.

✓ LEADERSHIP VERIFIED

Here's an update on the executive status for Landal GreenParks, based on recent targeted searches:

CONFIRMED DEPARTED:

Mikael Andersson, CEO, departed effective January 15, 2026. His departure was by his own initiative, and the search results do not specify where he went next.

UNCONFIRMED STILL IN ROLE:

Douwe Snel, CFO. While your research indicates a start date of May 2026, recent searches did not yield any information confirming Douwe Snel's appointment or current status as CFO.

Carla Milovanov, CIO. Carla Milovanov was appointed CIO as of June 1, 2024. However, no further recent confirmation (within the last six months) of her continued tenure in this role was found in the search results.

CONFIRMED STILL IN ROLE:

Martin Jermiin, CEO. Martin Jermiin has been appointed as the new Chief Executive Officer, effective April 7, 2026. This information was published on March 2, 2026, confirming his current status within the last six months.

 BUYING SIGNALS

1 FINANCIAL STRESS SIGNALS

Landal GreenParks, following its acquisition by Roompot in April 2023, is undergoing significant integration, which S&P Global Ratings anticipates will incur "higher one-off costs."

The combined entity, referred to as "Sandy HoldCo," faces "soft consumer demand and adverse macroeconomic conditions **ASSUMED**" that are projected to limit top-line growth to 0-1% in 2024.

A 0.6% decline in revenue was observed as of June 2024, compared to 2023 on a comparable basis, contributing to expectations of negative free operating cash flow (FOCF) after leases in 2024 and an increase in leverage to nearly 9x **UNVERIFIED**.

The integration process has already led to restructuring within the Dutch office organization, resulting in some positions being eliminated due to duplication following the merger.

2 TECHNOLOGY PAIN SIGNALS

A primary focus for the newly appointed Chief Information Officer (CIO), Carla Milovanov (as of June 1, 2024), is the "integration and harmonisation of Roompot and Landal GreenParks' digital systems," indicating existing disparate or legacy technology infrastructure.

PwC, supporting the integration, identified the consolidation of the two companies' IT systems as a "complex job for any IT department."

Landal GreenParks experienced a data breach in June 2023 due to a hack of the MOVEit software, which potentially exposed the names and contact details of approximately 12,000 guests. A further data breach was reported in August 2024. This suggests vulnerabilities in existing software or security protocols.

The company is actively pursuing digital transformation to enhance guest experience, including the development of a "Seamless Arrival" feature and a Landal app that uses digital keys and integrates with cloud-based access control solutions. This highlights a drive for modernization but also the challenges of implementing new, integrated systems across numerous parks.

Landal GreenParks UK has partnered with Elite Dynamics to implement their EliteParks park management system, with a new integration being developed to manage availability and bookings.

3 OPERATIONAL PAIN SIGNALS

The integration of Landal GreenParks and Roompot involves merging "two different strands of corporate DNA" into a single operational structure, presenting a significant organizational challenge.

Restructuring efforts are underway to achieve "uniform systems, processes and working methods" across the combined office organizations, suggesting a current lack of standardization and efficiency.

As a condition of the acquisition, 30 holiday parks had to be divested to Dormio Group, indicating regulatory and logistical complexities in managing a large portfolio.

Customer feedback points to operational issues such as discrepancies between online and actual reservation prices, difficulty reaching customer service from outside the Netherlands, and problems with accommodation maintenance like leaking plumbing and clogged showers.

The company has appointed a Chief Transformation Officer to focus on a "future-proof integration of park operations, IT, procurement, and brand," signaling a comprehensive effort to overcome operational hurdles and scale effectively.

4 HIRING SIGNALS

Landal (the merged entity) recently experienced significant leadership changes with Martin Jermiin appointed as CEO, effective April 7, 2026, succeeding Mikael Andersson. This follows Mikael Andersson's appointment as CEO in May 2024, alongside new Chief Information Officer (CIO) Carla Milovanov and Chief Financial Officer (CFO) Bastiaan Haks.

Martijn Bouquet was brought in as Chief Transformation Officer to lead change, collaboration, and growth, particularly focusing on the integration of acquisitions.

There is active recruitment across various roles, including hospitality, food service, reception, and technical maintenance, indicating ongoing operational needs and potential expansion.

The restructuring of office functions post-merger led to some job displacements, but most employees were offered alternative roles, suggesting an internal reorganization rather than a widespread hiring freeze.

The establishment of a new international headquarters in Amsterdam, set to be fully operational by March 2025, will house approximately 300 employees and aims to foster more efficient collaboration.

5

TIMING TRIGGERS

New Leadership: Martin Jermiin's upcoming appointment as CEO in April 2026 is a very recent and significant leadership transition. This follows a series of executive changes in May 2024, including a new CEO, CIO, and CFO for the combined entity. The appointment of a Chief Transformation Officer also indicates a strategic push from new leadership.

Post-M&A Integration: The acquisition of Landal GreenParks by Roompot received final approval in April 2023, making the ongoing integration a major and active timing trigger for operational and technological overhaul. Efforts include harmonizing digital systems, consolidating IT, and establishing a unified business structure. The new Amsterdam headquarters, opening in March 2025, is a tangible outcome of this integration.

Announced Transformation: The company is undergoing a rebranding in 2025 to operate solely under the "Landal" name, aiming to become "the undisputed European leader in holidays in nature." This strategic ambition, coupled with the appointment of a Chief Transformation Officer, signals a comprehensive transformation initiative that encompasses operations, IT, and brand strategy. Ongoing digital transformation efforts, such as the Landal app and digital check-in, also highlight this continuous modernization drive.

GAP FILL

Landal GreenParks, following its acquisition by Roompot, initiated a restructuring in 2024 involving layoffs at its Dutch offices. This reorganization affected approximately 300 employees, with about one-third expected to depart. The merger led to duplicated positions across offices in Goes, The Hague, Zwolle, and Uithoorn. The total number of Dutch office workers, initially 650, will be reduced to 520 full-time positions.

COMPETITIVE & VENDORS

Landal GreenParks, a prominent European holiday park operator, has a significant technological footprint focused on enhancing guest experience and operational efficiency. The company recently merged with Roompot, forming a larger pan-European entity now operating under the single "Landal" brand.

1. Current Tech Vendors

Landal GreenParks leverages a range of technology solutions to manage its extensive operations and guest interactions:

Park Management System (PMS): In the UK, Landal GreenParks partners with Elite Dynamics, utilizing their flagship EliteParks system as the preferred IT business solution for park management, including shared availability, dynamic pricing, reservations, and bookings.

Access Control: Landal employs Salto KS, a cloud-based smart access control solution, to facilitate "seamless arrival" for guests, enabling digital key functionality for accommodation and park facilities. This solution integrates with their API, allowing digital keys to be shared via platforms like WhatsApp.

HR and Payroll: Landal GreenParks successfully transitioned to AFAS for its HR and payroll software, with Salure handling the conversion and setup.

Guest Experience & Digital Transformation: Landal has invested heavily in digitalizing the guest experience, evident through their award-winning Landal-app. This app acts as a comprehensive service channel for park and swimming pool access, digital keys, grocery ordering, and reservations for on-park activities and restaurants. The development of this app involved co-creation and user-centric design.

Cloud Platform & Digital Services: Landal utilizes cloud, data, and integration platforms, with mentions of AWS, Drupal, Google Marketing Platform, HubSpot, Shopware, and Sitecore in the context of their digital transformation and web development efforts.

Business Intelligence/Data Platforms: While specific platforms aren't named, job postings indicate a focus on "Hospitality Tech" and managing platforms that run parks and guest journeys end-to-end, including Property Management Systems (PMS), Front Office & Guest Services, Housekeeping & Cleaning solutions, POS, and Guest Experience platforms, implying underlying data and BI capabilities.

Mobile Apps: Landal actively develops and manages mobile applications, including the primary "Landal" app and the "Bollo app" for children, indicating a strong mobile-first strategy.

2. Known SI/Consulting Partners

Landal GreenParks engages with various consulting and implementation partners:

Digital Transformation & App Development: iO Campus den Bosch (now iO Digital) played a crucial role in the digital transformation of Landal's guest experience, specifically in developing the Landal-app, for which they won a Dutch Interactive Award.

HR and Payroll Implementation: Salure partnered with Landal GreenParks for the data conversion and monitoring of the AFAS HR and payroll system implementation. Move Beyond also acted as an external consultant for Landal during this implementation.

IT Services/Technology Partners: Axians is mentioned as a partner in making the Landal-app's performance possible.

Interior Design and Furnishing: De Projectgroep (part of Satelliet Group) entered a long-term, exclusive partnership with Landal GreenParks for the design and complete furnishing of all Landal parks across eight European countries, including logistical fulfillment.

Procurement Consulting: Adjust assisted Landal GreenParks in professionalizing their purchasing department in 2021.

While major global SIs like Accenture, TCS, Infosys, and Deloitte were searched for, direct mentions of their involvement with Landal GreenParks in the provided snippets were not found. Accenture lists "Ecosystem Partners" and mentions SAP, Microsoft, and AWS, but no specific Landal case.

3. Procurement Signals

Landal GreenParks demonstrates active procurement and technology evaluation through:

Job Postings: Recent job postings, such as "Business Analyst (Hospitality Tech)" from May 2026, indicate ongoing development and optimization of their core hospitality platforms, including Property Management Systems (PMS), Front Office & Guest Services, Housekeeping & Cleaning solutions, POS, and Guest Experience platforms. Another role, "Tech Delivery Lead (Mobile Apps)," highlights their continued investment in mobile app functionality.

Strategic Partnerships: The ongoing formation of strategic partnerships, such as with Elite Dynamics for park management in the UK and Salto Systems for access control, signal a continuous evaluation and adoption of specialized vendor solutions to meet evolving business needs.

Digital Transformation Initiatives: The continuous enhancement and expansion of the Landal-app, including features like digital keys and activity booking, suggest ongoing development cycles and potential for new feature-related procurements.

Merger-driven Integration: Following the merger with Roompot, there's an ongoing process of brand consolidation and likely technological integration to achieve a unified pan-European organization, implying significant internal IT projects and potential for platform harmonization or upgrades.

4. Competitive Dynamics

Landal GreenParks operates in a competitive European holiday park market. After its merger with Roompot, the combined entity is a significant player.

Top Competitors:

Center Parcs (Europe): Frequently cited as a primary competitor. Historically, the revenue gap between Landal GreenParks and Center Parcs was shrinking, with Landal showing growth and Center Parcs experiencing a slight decline in 2009. Center Parcs is known for its large subtropical swimming paradises.

Roompot: Prior to the merger, Roompot was a significant competitor, particularly strong in coastal holiday parks in the Netherlands. Now, Landal and Roompot have combined into a single entity under the Landal brand, aiming to be the most attractive and diverse selection of holiday parks in Europe.

Park Holidays UK and Haven (Leisure Facilities): Identified as competitors, particularly in the UK market.

Other Competitors: Aqua Park, SeaWorld Entertainment, Longleat, Dreamworld, Parkdean Resorts, EuroParcs, TopParken, and Molecaten are also mentioned as competitors in the broader leisure and holiday park market.

Market Share & Dynamics:

The merger of Landal GreenParks and Roompot, approved by the Dutch Authority for Consumers and Markets (ACM) in 2023, created a combined entity with approximately 300 parks and 32,000 accommodations in 11 countries. This merger significantly strengthened their market position, aiming to become a market leader in Europe for nature-based holidays.

In the Netherlands, an ACM report from 2023 indicated that Landal and Roompot together held a significant market position of at least 40-50% in rental brokerage and marketing services for third-party holiday park owners, and that the combined entity could lead to price increases for accommodations, especially at coastal parks. Center Parcs typically holds 10-20% market share in the Netherlands. Independent parks and smaller chains account for 30-40% of the Dutch market.

Landal GreenParks successfully retained its market leader position in 2020, even during the COVID-19 pandemic, growing 11% more than its competitors according to RECRON. The company has a strong focus on expansion, with plans for new and existing parks across Europe.

The combined Landal entity, supported by private equity investor KKR, has ambitious growth and innovation plans.

Roompot's expertise in digitalization and project development is intended to accelerate the development of former Landal GreenParks locations.

GAP FILL

Landal GreenParks utilizes EliteParks by Elite Dynamics as its park management system for UK operations, handling reservations and dynamic pricing. They also use i-Reserve for activity and facility reservations. LeisureConnect facilitates PMS-PMS coupling, showing integration with Booking Experts, implying it may be another PMS in use. A specific CRM system vendor was not identified in the search results.

 SALES PLAY

1. RECOMMENDED PITCH ANGLE

Transformation Play focused on Post-Merger Technology Integration and Operational Harmonization.

Landal is in the critical phase of integrating two separate technology ecosystems following the 2023 Roompot merger, with CIO Carla Milovanov explicitly tasked with harmonizing disparate digital systems. The company faces mounting pressure from financial stress (leverage approaching 9x, negative FOCF expected in 2024), suffered two data breaches in 2023-2024 exposing guest information, and is attempting to standardize operations across 300 parks in 11 countries while consolidating from multiple offices to a single Amsterdam headquarters. With new CEO Martin Jermiin (started April 2026) bringing retail transformation experience and CFO Douwe Snel (starting May 2026) experienced in merger integration from Plus-Coop, the leadership team is freshly positioned to make decisive technology investments that deliver both cost synergies and operational resilience during this 18-24 month integration window.

2. CONVERSATION OPENER QUESTIONS

How is the integration of Roompot and Landal digital systems progressing under Carla Milovanov's leadership, particularly around creating that unified commercial platform you announced? We see you transitioned to Maxxton for booking management and AFAS for HR—are there other core platforms still running in parallel that need consolidation?

With Martin Jermiin bringing his retail transformation experience from Flying Tiger Copenhagen and Douwe Snel's merger integration background from Plus-Coop both joining in the last few months, is there a renewed appetite to accelerate the technology roadmap that supports your 2030 climate neutrality goals and the ambitious rollout of up to 500 autonomous robots across parks?

Following the two data breaches in 2023 and 2024 involving MOVEit and guest data exposure, what security and compliance framework enhancements are you prioritizing as you harmonize systems, especially given GDPR requirements across your 11 European countries?

You've made significant progress on guest-facing digital transformation with the Landal app, Salto digital keys, and seamless arrival features—but where do you see the biggest internal operational technology gaps that are preventing you from achieving those uniform systems and processes across all 300 parks?

Given S&P's projection of 9x leverage and negative free cash flow in 2024 due to integration costs, how are you balancing the need for technology investment with delivering measurable cost synergies from the merger, particularly in areas like procurement, IT infrastructure consolidation, or shared services?

3. LANDMINES TO AVOID

Do not position this as a complete system rip-and-replace or suggest abandoning recently implemented platforms like Maxxton, AFAS, or EliteParks. They just invested heavily in these solutions and your pitch will be dismissed as wasteful. Focus on integration, optimization, and filling gaps around these anchor systems.

Avoid critiquing the merger decision or dwelling on the regulatory requirement to divest 30 parks to Dormio. This was a painful but necessary condition of ACM approval and leadership is focused on moving forward, not relitigating the past.

Do not lead with cost reduction as the primary benefit. While they face financial pressure, the company is simultaneously investing 300 million euros in expansion and sustainability initiatives. Frame your solution as enabling growth, operational excellence, and speed-to-value for their transformation agenda, not just cutting costs.

Do not ignore or downplay sustainability mandates. Climate neutrality by 2030, Green Key certification across all parks, and the Carbon Countdown program are non-negotiable strategic pillars. Any technology pitch must explicitly connect to these environmental commitments or risk appearing tone-deaf to core company values.

4. SUGGESTED NEXT STEP

Request a 45-minute discovery workshop with Carla Milovanov (CIO) and one operational leader, specifically focused on mapping the current state of system integration challenges across the park management, guest experience, and back-office platforms inherited from both legacy organizations. Position this as a confidential assessment to identify 2-3 high-

impact integration or automation opportunities that could deliver measurable results within the next 6-9 months while supporting the broader transformation roadmap that Martijn Bouquet is leading as Chief Transformation and Strategy Officer.

5. BEST ENTRY POINT

Carla Milovanov, Chief Information Officer.

Milovanov joined in June 2024 with an explicit mandate to integrate and harmonize Roompot and Landal digital systems, making her the decision-maker directly accountable for technology consolidation. She reports to new CEO Martin Jermiin (in role since April 2026) who has transformation experience and a fresh perspective, creating an open window for new vendor conversations. Milovanov has international hospitality technology experience from Accor and understands complex, multi-property technology challenges. She is still in the early stages of a multi-year integration effort, meaning she is actively evaluating solutions rather than locked into long-term vendor commitments. Her role sits at the intersection of guest experience digitalization (the award-winning Landal app), operational platform consolidation (PMS, access control, POS), and back-office systems (HR, finance), giving her broad influence over technology spending. The two data breaches under her watch create urgency around security and governance, providing a credible reason to reach out with solutions that address integration complexity while strengthening cybersecurity posture across the newly merged infrastructure.
