 COMPANY SNAPSHOT

1 REVENUE & MARGIN

Last reported annual revenue: €646 million (gross annual turnover for 2022).

Operating/net margin: Not publicly available.

2 REVENUE TREND

Year	Revenue (Millions EUR)	Operating/Net Margin
2019	€405	Not publicly available
2020	€491	Not publicly available
2021	€550	Not publicly available
2022	€646	Not publicly available

3 EMPLOYEES

Total global headcount: Approximately 5,200 (since the merger **INFERRED** in 2023).

Breakdown by high-cost locations: Not publicly available. Landal has offices in Amsterdam (headquarters), Goes, Zwolle (Netherlands), Trier (Germany), and Varde (Denmark). The UK entity, LANDAL GREENPARKS (UK) LIMITED, had 22 employees as of April 30, 2026. Landal GreenParks Belgium had 54.2 FTEs in its most recent annual report.

4 INDIA PRESENCE

Not publicly available.

5 RECENT NEWS

December 2025 - May 2026):

(a) Product News

Landal announced three new holiday parks: Landal Sallandse Heuvelrug, Landal De Brabantse Wal (Netherlands), and Landal Rockingham Forest (Great Britain) on May 22, 2026.

Landal launched its new "You Need This" campaign and new brand identity, including a new logo (pause icon), in December 2025, with full rebranding to be completed in 2026. The new brand identity is already visible at over 120 resorts and will expand to more than 260 resorts across nine European countries.

(b) Company News

Mikael Andersson stepped down as CEO on January 15, 2026, after six years, having overseen the integration of Roompot and Landal GreenParks and the establishment of Landal's international headquarters in Amsterdam. Martijn Bouquet will assume day-to-day CEO responsibilities during the transition.

6 M&A ACTIVITY

June 2024 - June 2026):

The merger between Landal GreenParks and Roompot was approved by the Dutch Authority for Consumers and Markets (ACM) in April 2023 and completed in 2023, with the combined company now operating as 'Landal'. As a condition of this merger, Roompot and Landal were required to sell 30 holiday parks to Dormio Group in April 2023. No other specific M&A activity within the strict June 2024 - June 2026 timeframe was found.

7 OWNERSHIP STRUCTURE

PE-backed: Landal is owned by Kohlberg Kravis Roberts & Co (KKR), an American investment fund, since the merger with Roompot in 2023.

8

KEY COMPETITORS

Center Parcs (Europe)
Haven (Leisure Facilities)
Park Holidays UK

GAP FILL

The operating margin EBITDA for Landal GreenParks in 2022 is not available in the provided search results. The gross annual turnover for Landal GreenParks in 2022 was €646 million.

GAP FILL

Landal (formerly Landal GreenParks and Roompot) employs approximately 5,000 to 5,500 people across its parks and office locations in several European countries, including the Netherlands and Germany. While Landal operates numerous parks and has offices in both the Netherlands (e.g., Amsterdam, Goes, Zwolle) and Germany (e.g., Trier), specific employee counts broken down by each country are not publicly available in the search results.

STRATEGIC DIRECTION

Landal GreenParks' corporate strategy, particularly following its integration with Roompot and subsequent acquisition by the KKR-backed European Camping Group (ECG), is centered on pan-European expansion, deepened sustainability commitments, and a streamlined operational and digital platform.

1. CORPORATE VISION & DIRECTION

Leadership is steering Landal GreenParks towards becoming the "most attractive and most diverse selection of holiday parks in Europe" within the next 12-18 months. The ambition is to be at the "undisputed European vanguard of holidays in nature". This vision is underpinned by a strategy of international growth and consolidating market leadership.

Mikael Andersson, the former CEO of Landal (who stepped down January 15, 2026), played a pivotal role in this transformation, successfully integrating Roompot and Landal GreenParks into a unified organization. Upon his departure, Andersson stated, "Landal is in a very strong position today, with a talented leadership team, clear momentum, and an exciting path ahead. I have full confidence in the organisation and in its future." Dirk Anbeek, Chairman of the Supervisory Board, affirmed that Andersson's "vision and dedication have helped build a strong, unified organisation with significant potential for further growth." The company is currently searching for a new CEO, with Martijn Bouquet, Chief Transformation & Strategy Officer, holding interim responsibilities.

2. BIG STRATEGIC INITIATIVES

Pan-European Expansion and Consolidation: The merger of Roompot and Landal GreenParks created an entity with approximately 300 parks and 32,000 accommodations across 11 countries, establishing a "very broad selection in Europe". The transaction aimed to provide "a springboard for further international growth". This expansion strategy continues under the European Camping Group (ECG), which actively acquires new holiday parks across Europe, including recent additions in France and Spain, with the goal of offering "unrivalled choice and exceptional experiences to guests across Europe". These new acquisitions undergo comprehensive modernization to meet high-quality standards.

Sustainability Mandates: Landal GreenParks maintains a "proactive approach to sustainability," with all its resorts achieving Green Key certification. The combined Roompot and Landal organization committed to leveraging Landal's expertise to "further strengthen and accelerate its sustainability targets in areas such as CO2 and waste reduction". ECG emphasizes a "strong dedication to fostering sustainable practices and fulfilling our customers' increasing demand for environmentally responsible options," aiming to be "agents of change, promoting sustainable practices and reducing carbon emissions across all our activities". In line with this, more than 30 campsites are slated to apply for the Green Key label for the first time in 2025. KKR, as the overarching investor, views sustainability as a "key lever to how we create and protect value across KKR, which helps guide where we invest, how we support our portfolio, and how we operate as a firm". KKR is actively investing in solutions for the transition to a low-carbon economy through its Global Climate Strategy.

Operational Restructuring and Digitalization: The integration of Roompot and Landal GreenParks involved a significant transformation, unifying the businesses under "one unified organisation," establishing a "single international headquarters in Amsterdam," and aligning "one commercial platform, and one operating model". This integration also involved implementing a new organizational structure and remuneration policy within nine months. Roompot's "expertise in digitalisation and project development" is being utilized to "develop the current Landal GreenParks locations more quickly".

3. TECHNOLOGY STRATEGY

While specific details on Landal GreenParks' direct AI adoption, cloud migration, or build vs. buy decisions are not explicitly detailed in the available public information, the technology strategy is heavily influenced by the parent company, KKR, which demonstrates a clear and aggressive stance on digital and AI infrastructure.

AI Adoption Stance: KKR is making substantial investments in AI infrastructure, having committed over \$31.3 billion in equity capital to digital infrastructure investments over the past six years. KKR is preparing to launch a new AI infrastructure platform, Helix Digital Infrastructure, backed by over \$10 billion, specifically targeting data centers, power generation, and connectivity solutions to support AI deployment. This platform is designed to partner closely with hyperscale cloud providers. Waldemar Szlezak, KKR's Global Head of Digital Infrastructure, highlighted the strategic imperative: "The surge in AI demand isn't just stretching infrastructure — it's rewriting the blueprint for how it needs to be built. Hyperscalers need more than capacity; they need certainty, integration, and speed. This project is a reflection of that new reality: bringing together

scalable land, power, and compute under a single, coordinated strategy." This indicates a strong "buy" signal for advanced AI infrastructure and a focus on leveraging external partnerships for sophisticated AI capabilities.

Cloud Migration & Platform Consolidation: The successful integration of Roompot and Landal GreenParks under "one commercial platform, and one operating model" suggests a significant effort towards platform consolidation and likely involves cloud-based solutions to manage the expansive pan-European portfolio. Roompot's stated "expertise in digitalisation" also implies a modern approach to IT infrastructure, which typically includes cloud services for scalability and efficiency. While "build vs. buy" specifics are not available for Landal's internal software, the broader KKR strategy of investing heavily in and partnering with digital infrastructure providers points towards a tendency to "buy" or partner for core infrastructure and leverage specialized vendors.

 LEADERSHIP & ORG

Here is the leadership data for Landal GreenParks (now operating as Landal):

1. KEY DECISION MAKERS

CEO: Martin Jermiin

Tenure: Appointed effective April 7, 2026.

Background: Jermiin brings extensive international experience in retail and business transformation. He previously served for seven years as CEO of the Danish retail company Flying Tiger Copenhagen, where he played a key role in positioning the brand across multiple countries, driving growth and strong financial results, and expanding its international network.

CFO: Bastiaan Haks

Tenure: Started on June 1, 2024.

Background: Haks has extensive experience in corporate finance, including serving as CFO of divisions at the international, data-driven company Unilever. He is highly experienced in investment company, merger, and takeover projects, and has led complex finance system migrations.

CIO: Carla Milovanov

Tenure: Assumed role as of June 1, 2024.

Background: Milovanov's initial focus was on the integration and harmonization of Roompot and Landal GreenParks' digital systems. She previously led global hotel and client technology teams at Accor, where she focused on integrating over 30 brands within a single technology stack and transforming guest and personnel experiences.

CDO: Belinde Bakker

Tenure: Listed as part of the Executive Team as of May 2024.

Background: Belinde Bakker serves as the Chief Development Officer **INFERRED**.

COO: Cees van Vliet

Tenure: Identified as COO in April 2025.

Background: No detailed background readily available in the search results for Cees van Vliet. Jeroen Mol previously held this role and stepped down in May 2024 due to medical reasons, with a successor expected to be announced.

2

RECENT LEADERSHIP CHANGES

CEO Transition (Timing Signal): Mikael Andersson stepped down as CEO in January 2026 after six years, having overseen the integration of Roompot and Landal GreenParks. Martijn Bouquet, Chief Transformation and Strategy Officer, served as interim CEO. Martin Jermiin was appointed as the new CEO, effective April 7, 2026.

CFO Appointment (Timing Signal): Bastiaan Haks succeeded Coen van der Wel as CFO on June 1, 2024.

CIO Appointment (Timing Signal): Carla Milovanov joined as Chief Information Officer (CIO) on June 1, 2024.

CCO Appointment (Timing Signal): Tjalling Smit was appointed Chief Commercial Officer (CCO) as of August 1, 2024, taking over Mikael Andersson's previous role.

COO Change: Jeroen Mol stepped down as COO in May 2024 due to medical reasons, and Cees van Vliet is subsequently identified as COO in April 2025.

3. ORG STRUCTURE SIGNALS

Centralized Technology: Following the merger of Roompot and Landal GreenParks, the company aims for a single, unified organization with a strong emphasis on integrating and harmonizing digital systems. Carla Milovanov's initial focus as CIO was specifically on this integration. The company's strategy involves a "future-proof integration of park operations, IT, procurement, and brand" and establishing "uniform systems, processes and working methods" across Europe.

Centralized Headquarters: The merged entity, now operating as Landal, established a central, international headquarters in Amsterdam by 2025 to professionalize the organization and foster cooperation and connection, serving as an international hub for offices and parks.

Technology-Driven Mission: Landal is actively seeking technology solutions to enhance guest experience, such as "Seamless Arrival" allowing guests to unlock accommodations via an app, indicating a centralized and strategic approach to technology.

4. BOARD COMPOSITION

Chairman of the Supervisory Board: Dirk Anbeek

Private Equity Representation: Landal GreenParks (and Roompot before the merger) is owned by the American investment fund KKR & Co. KKR acquired Roompot in 2020 and subsequently facilitated Roompot's acquisition of Landal GreenParks from Platinum Equity in 2023. Therefore, KKR & Co is the key private equity firm with representation and influence on the board.

Notable Strategic Investors: KKR & Co is the primary strategic investor.

GAP FILL

Bastiaan Haks became CFO of LandalGreenparks and Roompot (now operating as Landal) on June 1, 2024. He previously served as CFO for divisions within the international, data-driven company Unilever. Haks possesses extensive experience in corporate finance, including investment company, merger and takeover projects, and has led complex finance system migrations. His background also includes roles such as Vice President Finance for Unilever Benelux.

BUYING SIGNALS

Here's an evidence-based overview of buying signals and pain points for Landal GreenParks:

1 FINANCIAL STRESS SIGNALS

Margin Compression & Cost-Cutting: S&P Global Ratings reported in December 2024 that the acquisition of Landal by Sandy (Roompot) led to higher-than-expected integration costs in 2024, primarily due to headquarters reorganization and IT migration. This resulted in a projected deterioration of the S&P Global Ratings-adjusted EBITDA margin to 17.0%-18.0% in 2024, down from 22.2% in 2023. Free Operating Cash Flow (FOCF) after leases was estimated to be negative, around €30 million-€40 million, in 2024.

Restructuring: The same report indicated that additional "exceptional expenses" were expected in the first half of 2025 to finalize the integration of Landal. However, this integration effort is also anticipated to yield €50 million-€60 million in cost savings by the end of 2026 through a more efficient cost structure and procurement savings.

2 TECHNOLOGY PAIN SIGNALS

Legacy System Integration & Harmonization: Landal GreenParks is actively working on integrating and harmonizing its digital systems with those of Roompot following their merger. Carla Milovanov was appointed Chief Information Officer (CIO) as of June 2024, with a primary focus on this integration. This indicates challenges in unifying disparate IT infrastructures.

Guest Experience Friction (Addressed): Landal GreenParks sought solutions to reduce guest friction at check-in, partnering with Salto Systems to implement a "Seamless Arrival" feature. This allows guests to use the Landal app to open their bungalows directly, bypassing reception queues. This suggests a prior pain point related to administrative burdens and guest experience that has been actively addressed through technology investment.

Data Breach: A data breach affecting Landal GreenParks was reported on August 7, 2024. This indicates a security-related pain point within the last 12 months.

3 OPERATIONAL PAIN SIGNALS

Post-Merger Integration Challenges: The ongoing integration of Landal GreenParks and Roompot continues to present operational challenges, specifically regarding the reorganization of headquarters and IT migration, which contributed to higher-than-expected integration costs in 2024. The company is focused on a "future-proof integration of park operations, IT, procurement, and brand."

4 HIRING SIGNALS

No specific bulk hiring or hiring freeze signals for Landal GreenParks were found within the last 12 months. Information regarding hiring freezes and layoffs in the search results pertains to federal agencies or other corporations, not Landal GreenParks. The S&P Global Ratings report mentions "reorganization of the headquarters", which could imply internal staff movements or changes, but no explicit hiring freeze or bulk hiring. As of 2025, the combined entity (Landal and Roompot) employs approximately 5,200 people.

5 TIMING TRIGGERS

New Leadership: Mikael Andersson stepped down as CEO of Landal on January 15, 2026, after six years, during which he guided a "major phase of transformation." Martijn Bouquet, Chief Transformation and Strategy Officer, assumed interim CEO responsibilities, and Martin Jermiin was appointed as the new CEO, effective April 7, 2026.

Post-M&A Integration: The integration of Roompot and Landal GreenParks into a unified organization has been a significant ongoing process, culminating in a rebranding to "Landal" in 2025. The S&P Global Ratings report from December 2024 explicitly highlights that additional exceptional expenses were anticipated in H1 2025 to finalize this integration. The appointment of a Chief Transformation Officer (Martijn Bouquet) further emphasizes this ongoing strategic initiative.

Announced Transformation: Landal is undergoing a "major phase of transformation" and is focused on "future-proof integration of park operations, IT, procurement, and brand." This transformation aims to strengthen its position as the market leader.

GAP FILL

Landal Roompot (operating as Sandy Holdco) reported revenue of €913 million in 2023, which includes the full consolidation of Landal.

For 2024, the forecasted revenue is between €920 million and €930 million. As of June 2024, the group's revenue was €482.9 million, representing a 0.6% decline compared to 2023 on a comparable basis. Overall, revenue for the full-year 2024 is expected to remain relatively flat year-on-year.

 COMPETITIVE & VENDORS

Landal GreenParks is a prominent European holiday park operator that recently merged with Roompot, now operating under the unified "Landal" brand. The company exhibits a clear focus on digital transformation, guest experience enhancement, and continued expansion across Europe.

1. Current Tech Vendors

Landal utilizes a range of technology vendors to manage its operations and enhance guest experience:

Master Data Management (MDM): Landal employs Stibo Systems' STEP platform for Master Data Management, which centralizes product information and integrates with its Web CMS Sitecore and the Endeca e-commerce search engine. This was implemented to ensure data consistency across multiple channels, including brochures and online platforms.

Access Control & Digital Key Solutions: For seamless guest arrival and digital check-in, Landal partners with Salto Systems, utilizing their cloud-based smart access control solution. This enables guests to use the Landal app as a digital key via the Salto KS API.

Reservation & Activity Management: Landal GreenParks selected i-Reserve, a SaaS solution from TEQA Webdiensten, as its online reservation system. This system manages park activities and facilities, aims to phase out manual processes, and is GDPR compliant, with an API for app integration.

Pricing & Revenue Management: Axians is a "fixed technical partner" for Landal, specifically involved in optimizing their pricing calculation system, which previously involved a robust but outdated technology that took up to fifteen hours for results. The new system significantly reduces this time, supporting dynamic pricing based on demand, supply, location, and season, and accommodating different currencies for international expansion.

Mobile Applications: Landal has developed a mobile app, in collaboration with digital agency &samhoud creative tech, which facilitates digital check-ins and allows guests to plan activities and day trips. The app also features a digital game, Landal Adventure, to engage younger guests.

Cloud Platforms: The adoption of Salto Systems' cloud-based solution indicates a reliance on cloud infrastructure for key operational aspects. Job postings also refer to "Cloud Platform Engineer Oracle Middleware," suggesting engagement with Oracle's cloud offerings.

Other Potential Systems: General job postings for roles like "Data Engineer" and "Information Security Officer" imply an underlying data platform and robust security infrastructure. Roles like "Paid Social Marketeer" and "Programmatic specialist" suggest advanced digital marketing platforms are in use.

2. Known SI/Consulting Partners

Landal collaborates with several system integrators and consulting partners:

Axians: Recognized as a "fixed technical partner" for their expertise in IT, particularly for the optimization of Landal's pricing system.

TEQA Webdiensten: The supplier and implementer of the i-Reserve SaaS solution for activity and facility reservations.

&samhoud creative tech: Collaborated with Landal on the development of the Landal Adventure game app and is mentioned in the context of digital transformation efforts.

iO Digital: Partnered with Landal for "Hybride hospitality for Landal by co-creation," highlighting their role in digital experience platforms, mobile apps, and customer journey optimization.

De Projectgroep (part of Satelliet Group): Entered into an exclusive partnership with Landal GreenParks for "distinctive hospitality interiors," indicating a focus on the physical guest experience and design.

3. Procurement Signals

Landal's recent activities and job postings reveal several procurement signals:

Digital Transformation & Guest Experience Focus: The implementation of Salto Systems for digital access, the i-Reserve system for activity booking, and the development of the Landal app all point to a strategic investment in enhancing the digital guest journey and operational efficiency. This indicates a continuous need for innovative digital solutions.

Data Management & Security: Job postings for "Information Security Officer" and "Data Engineer" suggest ongoing efforts to strengthen their data infrastructure, ensure data integrity, and protect against cyber threats.

System Optimization & Scalability: The work with Axians to overhaul the pricing system underscores a proactive approach to optimizing core business processes and ensuring scalability for future growth, especially with international expansion and different currencies.

Talent Acquisition for IT & Digital: Numerous job postings, including "Team Lead Accounting," "Paid Social Marketeer," "Programmatic specialist," and roles related to "system optimisation, application development or digital transformation," indicate a strong push to recruit talent across various IT and digital marketing functions. This signals active projects and potential new platform evaluations in these areas.

4. Competitive Dynamics

Landal operates in a competitive European holiday park market, with key dynamics as follows:

Top Competitors: Landal's primary competitors include Center Parcs and Roompot. Following Roompot's acquisition of Landal GreenParks in 2023, the combined entity now operates under the "Landal" brand, significantly reshaping the competitive landscape. Other competitors mentioned include EuroParcs, Haven, and Park Holidays. Craft.co also lists Aqua Park, SeaWorld Entertainment, Longleat, and Dreamworld as competitors, though these may represent broader leisure industry competition.

Market Share & Position: Landal is described as a market leader in the European holiday park sector. In 2020, Landal GreenParks successfully retained its market leader position and achieved 11% more revenue growth than its competitors, with strong performance in the Netherlands during the pandemic. The merger with Roompot positioned the new "Landal" brand to be the "most attractive and most diverse selection of holiday parks in Europe" and aims to become the "European leader in holiday breaks in nature," managing over 300 parks and 30,000 accommodations across 11 countries.

Gaining or Losing Market Share: Landal, through its merger with Roompot, is actively consolidating and expanding its market presence. The combined entity has significantly increased its portfolio, aiming for further international growth. The European holiday park market itself is experiencing growth, with a projected CAGR of 7 to 10 percent from 2025 to 2030, driven by increased demand for domestic and nature-based travel. Demand for holiday parks in the Netherlands, for instance, has grown significantly, outpacing supply, particularly from international guests, primarily Germans. This buoyant market provides a favorable environment for Landal's growth ambitions. While historically the gap between Center Parcs and Landal was shrinking, the recent merger solidifies Landal's competitive strength.

GAP FILL

Landal GreenParks utilizes MOVEit for data transfer, Elite Dynamics' EliteParks for park management, reservations, and dynamic pricing in the UK, and Salto Systems' Salto KS for cloud-based smart access control and digital keys via their Landal app. They also employ Maxxton Software for bookings, check-ins, inventory, and reservations, Stibo Systems' STEP for Master Data Management, and Sitecore with Endeca for web content and e-commerce search. For security operations, Landal partners with ReliaQuest GreyMatter, integrating it with their existing Microsoft security stack. Internally, they use the "Laura New" (Landal Uniform Reservation Application).

1. RECOMMENDED PITCH ANGLE

TRANSFORMATION & COST OPTIMIZATION PLAY

Landal is in the critical final phase of a complex post-merger integration that has already incurred higher-than-expected costs in 2024, particularly around IT migration and headquarters reorganization, resulting in EBITDA margin compression from 22.2% in 2023 to a projected 17.0-18.0% in 2024 and negative free cash flow of €30-40 million. The company expects additional exceptional expenses through H1 2025 to complete this integration but has committed to achieving €50-60 million in cost savings by end of 2026 through procurement efficiencies and streamlined operations. With new CEO Martin Jermiin (appointed April 2026) bringing retail transformation expertise, new CFO Bastiaan Haks (June 2024) experienced in complex system migrations, and new CIO Carla Milovanov (June 2024) focused specifically on digital system harmonization, the leadership team is actively seeking solutions that accelerate integration timelines, reduce ongoing operational costs, and deliver measurable ROI against their aggressive savings targets. This creates a compelling window for technology solutions that directly support their transformation mandate while demonstrating clear paths to cost reduction and operational efficiency gains across their 300-park, 11-country portfolio.

2. CONVERSATION OPENER QUESTIONS

Question 1: With Carla Milovanov leading the integration and harmonization of Roompot and Landal's digital systems since June 2024, and your target to finalize integration by mid-2025, where are you currently experiencing the most friction in unifying your technology stack across the 300 parks? Are there specific legacy systems or data silos that are proving more challenging than anticipated?

Question 2: Your S&P report highlighted higher-than-expected IT migration costs in 2024. Given your commitment to deliver €50-60 million in cost savings by end of 2026, how are you prioritizing technology investments that can accelerate ROI? Are you evaluating solutions that can demonstrate measurable cost reduction within 12-18 months rather than multi-year payback periods?

Question 3: You've recently implemented several point solutions including Salto for digital access, i-Reserve for activity management, and partnerships with Axians for pricing optimization. As you standardize operations across 11 countries under the unified Landal brand, are you finding that managing multiple vendor relationships and integration points is creating complexity, or are you actively looking to consolidate onto fewer, more comprehensive platforms?

Question 4: With Martin Jermiin coming from seven years at Flying Tiger Copenhagen where he drove international expansion and digital transformation, and your goal to become the undisputed European leader in nature-based holidays, what role does technology play in supporting your continued pan-European expansion strategy? Are you seeking solutions that can scale quickly as ECG acquires additional parks in France, Spain, and other markets?

Question 5: Following the August 2024 data breach, and with the ongoing recruitment for Information Security Officer roles, how are you balancing the need to accelerate digital guest experiences like your Seamless Arrival app against the imperative to strengthen your security posture across a now much larger, more distributed technology footprint?

3. LANDMINES TO AVOID

Avoid discussing expensive, long-term transformation programs. Landal has already committed significant capital to integration with higher-than-expected costs in 2024 and is under pressure to demonstrate cost savings by end of 2026. They need solutions with fast time-to-value, not another multi-year implementation that adds to their integration burden and exceptional expenses.

Do not criticize or undermine their existing vendor relationships, particularly Axians (fixed technical partner), Salto Systems, or TEQA. These partnerships were recently established and represent strategic decisions by the current leadership. Position your solution as complementary or as addressing adjacent needs, not as replacements for systems they just invested in implementing.

Avoid suggesting complete platform rip-and-replace or greenfield approaches. With CIO Milovanov specifically focused on integrating and harmonizing existing Roompot and Landal systems, they need solutions that work with their current tech

stack including Maxonton, Sitecore, Stibo STEP, Elite Dynamics EliteParks, and MOVEit. Any pitch requiring them to abandon these investments will be immediately rejected.

Do not lead with generic hospitality or travel industry case studies. Landal operates a unique business model distinct from traditional hotels or resorts, managing 300+ holiday parks with 30,000+ accommodations across 11 countries, with specific needs around park operations, owner relationships, dynamic pricing across currencies, and nature-based guest experiences. Demonstrate understanding of holiday park operations specifically, or at minimum, multi-property portfolio management at scale.

4. SUGGESTED NEXT STEP

Request a 45-minute virtual discovery workshop with Carla Milovanov (CIO) and one member of her integration team to conduct a focused assessment of their current integration roadmap against their end-of-2026 cost savings targets. Position this as a no-obligation consultation where you will map their remaining integration milestones, identify 2-3 specific areas where technology acceleration could compress timelines or reduce costs, and provide a preliminary ROI framework showing potential contribution to their €50-60 million savings goal. Offer to sign an NDA to discuss specifics of their current architecture and pain points. Frame this as "integration insurance" rather than a sales pitch, emphasizing your goal is to help them hit their publicly committed targets on time and on budget.

5. BEST ENTRY POINT

Carla Milovanov, Chief Information Officer (CIO), appointed June 1, 2024. Milovanov is the single best entry point because her explicit mandate is the integration and harmonization of Roompot and Landal GreenParks' digital systems following the merger, which directly aligns with the core transformation and cost optimization pitch angle. She came from Accor where she led global hotel and client technology teams, focused on integrating over 30 brands within a single technology stack, demonstrating she understands complex multi-brand technology consolidation. She is new in role (under 12 months), which means she is still in active assessment and decision-making mode rather than in maintenance mode, has budget allocated specifically for integration projects, and likely has authority to evaluate new solutions that can accelerate her core mandate. She reports directly to CEO Martin Jermiin and works closely with CFO Bastiaan Haks who is measuring integration costs and tracking progress toward the €50-60 million cost savings target. Her success is directly measured by completing the integration by mid-2025 while contributing to cost reduction, making her highly motivated to engage with solutions that demonstrably support these objectives. As the technology leader during a critical transformation phase with visible executive support and clear success metrics, Milovanov has both the authority and the urgency to engage with vendors who can help her deliver on her mandate.
