 COMPANY SNAPSHOT

1 REVENUE & MARGIN

Last reported annual revenue and operating/net margin (with year)

Marriott International, Inc.'s last reported annual revenue for fiscal year 2025 was \$26.19 billion. The operating margin for 2025 was 15.81%, and the net margin was 9.93%.

2 REVENUE TREND

Revenue and margin for last 3-5 years (table format)

Year	Revenue (B USD)	Operating Income (B USD)	Net Income (B USD)	Operating Margin (%)	Net Margin (%)
2025	26.19	4.14	2.60	15.81	9.93
2024	25.10	3.77	2.38	15.01	9.46
2023	23.71	3.86	3.08	16.29	13.00
2022	20.77	3.46	2.36	16.67	11.35
2021	13.86	1.75	1.10	12.63	7.93

3 EMPLOYEES

Total global headcount. Break down by high-cost locations (US, UK, Germany, Australia, Canada) if available.

Marriott International had 414,000 employees as of December 31, 2025. As of 2024, the company had 418,000 employees.

A detailed breakdown of employee headcount by high-cost locations such as the US, UK, Germany, Australia, and Canada is not publicly available. The company's highest headcount locations are in Bethesda, MD (2,972 employees) and Dallas, TX (2,701 employees).

4 INDIA PRESENCE

India GCC, delivery center, or R&D center? If yes, headcount and location.

Marriott International has a significant presence in India through a brand expansion rather than a traditional GCC, delivery center, or R&D center. As of May 2026, Marriott International, in collaboration with Concept Hospitality Private Limited (CHPL), announced 75 signed hotels and 50 opened properties under "The Fern Hotels & Resorts, Series by Marriott" in India. This initiative has added over 3,556 rooms across 43 Indian cities. Specific headcount for a GCC, delivery, or R&D center is not publicly available.

5 RECENT NEWS

Last 6 months. Split: (a) Product News (b) Company News.

(a) Product News (December 2025 - May 2026):

Marriott International significantly expanded "The Fern Hotels & Resorts, Series by Marriott" in India, with 75 hotels signed and 50 already open, adding over 3,556 rooms across 43 cities since its November 2025 debut.

The new "Series by Marriott" brand launched in Europe, with six hotels signed in Italy and five in the UK.

Marriott International announced a joint venture with the Leali family to add luxury wellness brand Lefay to Marriott's portfolio, marking its first brand dedicated exclusively to luxury wellness, expected to appear in the portfolio later in 2026.

W Hotels continued its Italian expansion with the debut of W Sardinia - Poltu Quatu in April 2026.

In May 2026, Marriott International launched the Marriott Bonvoy Design Shop, offering at-home access to W and Westin room products.

(b) Company News (December 2025 - May 2026):

Marriott International reported "excellent" first-quarter 2026 results, with reported diluted EPS of \$2.43 and Adjusted diluted EPS of \$2.72.

First-quarter 2026 reported net income was \$648 million, and Adjusted net income was \$726 million.

Worldwide Revenue Per Available Room (RevPAR) rose 4.2% in Q1 2026.

Adjusted EBITDA for Q1 2026 was \$1,398 million, a 15% increase.

The company added approximately 15,900 net rooms in Q1 2026, and its development pipeline reached a record of 4,107 properties or approximately 618,000 rooms.

Marriott repurchased 2.1 million shares for \$0.7 billion in Q1 2026 and returned over \$1.2 billion year-to-date through April 29.

Marriott International declared an increase in its quarterly cash dividend to \$0.73 per share, payable June 30, 2026, to shareholders of record as of May 22, 2026.

In May 2026, Portman Hospitality Fund I, LP acquired the Westin Peachtree Plaza in Atlanta from Marriott, with the hotel remaining in Marriott's portfolio under a long-term management agreement.

A landmark all-inclusive resort in Riviera Maya, Mexico, was announced with Grupo Satli and Aimbridge Hospitality in May 2026.

Marriott International's Executive Vice President and Chief Financial Officer is scheduled to speak at the Morgan Stanley Travel & Leisure Conference on June 1, 2026.

6

M&A ACTIVITY

Acquisitions, mergers, divestitures or investment rounds in last 2 years.

Acquisitions: In April 2025, Marriott International acquired citizenM, an operator of affordable luxury boutique hotels, for an undisclosed price.

Mergers: No explicit merger announcements within the last two years (June 2024 - June 2026) were found.

Divestitures: In May 2026, Portman Hospitality Fund I, LP acquired the Westin Peachtree Plaza from Marriott; however, the hotel will continue to be managed by Marriott under a long-term agreement, indicating a sale of the asset rather than a full divestiture of the operation or brand.

Investment Rounds: Not publicly available within the last two years.

7

OWNERSHIP STRUCTURE

Public (ticker+exchange), Private, PE-backed, or Family-owned.

Marriott International, Inc. is a publicly traded company.

Ticker: MAR

Exchange: NasdaqGS

The company's shareholder base includes a mix of founding family ownership (such as John Willard Marriott Jr. and Richard E. Marriott) and large institutional investors.

8

KEY COMPETITORS

Top 3-5 direct competitors.

Marriott International's top direct competitors include:

Hilton Worldwide

InterContinental Hotels Group (IHG)

Hyatt Hotels Corporation

Accor

Wyndham Hotels & Resorts

[GAP FILL] Marriott International's revenue for:

2021 was \$13.86 billion.

2022 was \$20.77 billion.

2023 was \$23.71 billion.

2024 was \$25.10 billion.

STRATEGIC DIRECTION

Marriott International, Inc. is focused on deepening engagement within its Marriott Bonvoy loyalty program, accelerating net room growth globally, and undergoing a significant digital and technology transformation.

1 CORPORATE VISION & DIRECTION

Marriott International's leadership, under President and CEO Anthony Capuano, is steering the company towards becoming a global travel platform, emphasizing two core pillars: strengthening the Marriott Bonvoy loyalty program and expanding its global room portfolio. Capuano stated, "We're aiming to be at the center of how people dream, plan, and ultimately experience travel". The company's strategy for the next 12-18 months (2025-2026) is characterized by aggressive global expansion, enhanced guest experiences through a diversified brand portfolio, and substantial investments in technology. Marriott anticipates global RevPAR growth between 1.5% and 3.5% for 2025 and expects net rooms growth to reach nearly 5%.

Key aspects of their vision include:

Deepening Loyalty Program Engagement: Marriott Bonvoy is being transformed into a lifestyle platform, moving beyond traditional points and upgrades to offer experiential luxury and aspirational value. The program surpassed 210 million members globally by mid-2024, with a focus on strengthening digital engagement, personalization, and strategic partnerships.

Accelerating Global Net Room Growth: Marriott achieved 6.8% net room growth in 2024, with plans for continued aggressive expansion. The company ended 2024 with over 577,000 rooms in its development pipeline. A record 1,200 new hotel deals were signed in 2024, adding 162,000 rooms to the global pipeline. The company aims to add between 230,000 and 270,000 net rooms between year-end 2022 and 2025, expanding its global portfolio to nearly 1.8 million rooms.

Balancing Stakeholder Value: Capuano emphasized focusing on decisions that balance associates, guests, and especially owners who are rebuilding asset value post-pandemic. The company's asset-light business model, focusing on management and franchise fees, is central to its expansion and financial stability.

2 BIG STRATEGIC INITIATIVES

Marriott has several strategic initiatives underway:

Global Expansion and Brand Diversification:

Luxury Segment: Marriott is significantly expanding its luxury footprint globally, with over 260 luxury hotels and resorts in the development pipeline and more than 30 luxury properties slated to open in 2025. The luxury portfolio comprises seven brands, with 658 hotels, resorts, and branded residential properties across 74 countries as of early 2025.

Midscale Segment: The company is strengthening its presence in the affordable midscale segment with brands like City Express by Marriott, which is expanding into Latin America (Nicaragua, Bolivia, Argentina, Peru, Brazil) and debuted in the U.S. and Canada in October 2024. StudioRes, an extended-stay midscale brand in the U.S. and Canada, celebrated its first groundbreaking in early 2024 and anticipates its first opening later that year. In 2025, Marriott introduced "Series by Marriott," a global collection brand for the midscale and upscale lodging segments, opening 37 properties in India and signing 13 agreements for the U.S. and Canada.

Nontraditional Offerings: Marriott is bolstering its nontraditional accommodations, including the acquisition of the Postcard Cabins brand (formerly Getaway Outposts) and an agreement with Trailborn to launch an outdoor-focused collection in 2025. They also entered a licensing agreement with Sonder Holdings in August 2024, adding over 9,000 rooms to their portfolio.

Geographic Focus: Marriott is prioritizing expansion in high-growth regions, particularly Asia Pacific excluding China (APEC), where it signed a record 109 deals in 2024, representing 21,439 rooms. Europe, Middle East & Africa (EMEA) also saw exceptional growth in 2025, with over 230 organic signings representing over 31,000 rooms.

Cost Transformation and Restructuring: Marriott announced plans in Q3 2024 to enhance effectiveness and efficiency across the company, expecting to yield \$80-90 million in annual pre-tax general and administrative (G&A) cost reductions starting in 2025. This initiative also aims to deliver cost savings to hotel owners and franchisees. As part of this, Marriott

underwent a company-wide restructuring in late 2024, resulting in layoffs for corporate employees, largely expected to be in place by Q1 2025. CEO Anthony Capuano stated these efforts are designed to "further empower our teams closest to our market's guests, owners and franchisees to operate even more nimbly" and "drive increased profitability and enhanced value".

Sustainability Mandates: Marriott has committed to reducing single-use plastics across all properties, expanding energy-efficient buildings, and offering carbon tracking tools for corporate clients. The company's 2023 annual report highlights its commitment to innovation and sustainability, with measures aimed at minimizing its environmental footprint and improving operational efficiencies. In late 2024, Good Travel by Marriott Bonvoy® relaunched, offering guests opportunities to create a positive impact on local communities and environments.

3 TECHNOLOGY STRATEGY

Marriott is undergoing an ambitious multi-year digital and technology transformation, committing substantial investments to upgrade its core systems and leverage advanced technologies.

Investment: Marriott plans capital expenditures of \$1.0 billion to \$1.1 billion for 2025. They committed \$1.1 billion in investment spending in 2026, with over one-third directed toward digital and technology transformation.

Cloud Migration and Platform Consolidation:

Cloud-Native Backbone: Marriott is building a cloud-native backbone to support AI agents, media monetization, retail-style personalization, and standardized food and beverage technology across its global portfolio.

Core Systems Replatforming: The company is focused on replatforming three core systems: its property management system, central reservations infrastructure, and loyalty platform. These have moved from development into deployment, with rollouts planned at a "meaningful number" of hotels in 2026. Marriott expects to begin rolling out its new cloud-based systems to properties in 2025.

Unified Guest Data: A key aspect of this architectural shift is moving core platforms to cloud-native environments designed around unified guest data, API-first integrations, and real-time analytics pipelines. The ongoing loyalty replatforming aims to support faster innovation and advanced personalization by consolidating identity, transactional, and behavioral data within cloud-native architecture. Marriott's digital transformation in APAC also focuses on consolidating websites, apps, and guest data into a single ecosystem.

Vendor Relationships: Marriott went live with CXone in March 2023, consolidating 11 vendor solutions for its customer engagement centers, which serve over 6,500 global agents across 20 centers. In 2023, Marriott signed a Master Service Agreement with Shiji to expand the deployment of Infrasy's Cloud POS and selected SevenRooms as its preferred restaurant technology partner. Xorcom became an approved vendor for Marriott in December 2023, providing advanced hotel phone system solutions. Marriott has also partnered with Oracle to modernize its full technology footprint, including Fusion Apps, Oracle Cloud Infrastructure (OCI), database, and industry applications.

AI Adoption Stance:

"Agentic Mesh" Concept: Marriott is building an "agentic mesh," a shared intelligence layer intended to support AI agents across marketing, operations, customer service, and revenue optimization. This concept signals an ambition to move beyond isolated pilots toward enterprise-wide intelligence. Marriott CIO Naveen Manga explained that while 2025 was a year of experimentation, learning, and piloting, "2026 is a year for scale" for AI adoption.

Strategic Opportunity: CEO Anthony Capuano views AI as a long-term opportunity that could reshape how hotels acquire, serve, and retain guests, stating, "We see AI as an opportunity to potentially redefine the customer acquisition paradigm that has governed our industry for the past several decades". Drew Pinto, EVP and Chief Revenue and Technology Officer, highlights that Marriott does not treat technology as a support function but ties it directly to top-line performance and long-term differentiation.

Use Cases: Early pilots include generative AI for SEO, call center support, and workflow automation. Marriott is developing platforms for owners to provide streamlined insights into hotel operations, and evaluating tools to help front desk associates serve guests better. They are also experimenting with a conversational AI-powered trip planning tool for Homes and Villas by Marriott Bonvoy.

Build vs. Buy Signals: Marriott's approach includes both building internal capabilities (e.g., cloud-native backbone, AI studio for experimentation) and leveraging strategic partnerships with technology vendors. The company aims to "build for differentiation, buy for commodity".

Cautionary Approach: While ambitious, Marriott is proceeding with "ambition and caution" in its AI deployment, focusing on building a model-agnostic AI chassis that powers use cases across guest, associate, and owner personas. They emphasize security, governance, and scalability to ensure responsible deployment, with guardrails built into the safety and security of data conversations.

LEADERSHIP & ORG

CEO: Anthony "Tony" Capuano.

Tenure: Appointed CEO in February 2021. He joined Marriott in 1995.

Background: Capuano previously served as Group President, Global Development, Design and Operations Services, where he was instrumental in Marriott's growth, including the integration of Starwood Hotels & Resorts. He leads the world's largest hospitality company.

CFO: Jennifer C. Mason.

Tenure: Appointed Executive Vice President and Chief Financial Officer, effective March 31, 2026, following Kathleen K. Oberg's retirement. She joined Marriott in 1992.

Background: A 33-year Marriott veteran, Mason previously served as Global Officer, Treasurer and Risk Management. Her experience includes roles in Internal Audit, Corporate Financial Planning & Analysis, Lodging Finance, and Business Development, as well as CFO for the U.S. and Canada.

CTO/CDO: Naveen Manga (Global Chief Technology Officer).

Tenure: Global Chief Technology Officer since August 2021.

Background: Manga is responsible for global technology strategy, innovation, and transformation to support growth and drive long-term business value. He has over 20 years of business technology leadership experience across various industries. (Note: Drew Pinto is EVP and Chief Revenue & Technology Officer, leading sales, revenue management, distribution channels, digital, and information technology.)

COO: Erika Alexander (Chief Global Officer, Global Operations).

Tenure: Information on exact start date in this specific role is not specified in the provided snippets, but she is identified in the current organizational chart.

Background: As Chief Global Officer, Global Operations, Alexander oversees global operational aspects of the company. (Note: Marriott also has regional COOs, such as Sandeep Walia for Middle East & Africa, Luxury, EMEA.)

The following changes are effective as of March 2026 or June 2026, placing them within the last 12 months (current date June 2026).

CFO Transition (Timing Signal): Kathleen K. Oberg, formerly Chief Financial Officer and Executive Vice President, Development, retired effective March 31, 2026. Jennifer C. Mason succeeded her as Executive Vice President and Chief Financial Officer, effective upon Oberg's departure. This transition was announced in July 2025.

Regional Leadership Restructuring (Timing Signal):

Liam Brown (Group President, U.S. and Canada) and Brian King (President, Enterprise Transformation & Caribbean and Latin America) stepped down from their roles at the end of March 2026 and will retire from the company at the end of June 2026.

Satya Anand (formerly President, Europe, Middle East and Africa - EMEA) assumed the role of Group President, U.S., Canada and Caribbean and Latin America (CALA), effective March 28, 2026.

Neal Jones (formerly COO for Europe and Africa and Global Leader, Design Hotels) became President, EMEA, effective March 28, 2026.

Federico "Fede" Greppi (formerly COO for CALA) became President of CALA, effective March 28, 2026.

Marriott International's technology is primarily centralized globally. The company's organizational structure includes "functional divisions" where "Corporate leaders oversee finance, operations, marketing, HR, and technology to maintain consistency worldwide." Additionally, dedicated functional departments like "Technology" provide support to hotels and resorts globally. The Global Chief Technology Officer, Naveen Manga, is

responsible for global technology strategy, innovation, and transformation. Drew Pinto's role as Chief Revenue & Technology Officer also consolidates leadership over IT and digital strategies on a global scale.

4

BOARD COMPOSITION

Key Board Members:

David S. Marriott: Chairman of the Board.

Anthony G. Capuano: President and Chief Executive Officer.

J.W. Marriott Jr.: Chairman Emeritus.

Other notable independent directors include Isabella D. (Bella) Goren, Frederick A. "Fritz" Henderson, Lauren R. Hobart, Debra L. (Debi) Lee, Aylwin B. Lewis, Margaret M. (Meg) McCarthy, Grant F. Reid, Horacio D. Rozanski, and Susan C. Schwab. Sean C. Tresvant was appointed as an Independent Director, effective February 12, 2025.

PE Representation / Notable Strategic Investors:

Marriott International's ownership is predominantly shaped by institutional investors, who collectively hold approximately 59% to 65% of the company's shares.

Top Institutional Shareholders (as of various recent reports) include Vanguard Group Inc. (7.70-7.84%), BlackRock, Inc. (5.84-5.87%), State Street Corp. (3.52-3.55%), Wellington Management Group LLP (3.19-3.42%), Fidelity Investments (FMR) (2.50-1.93%), Geode Capital Management, LLC (1.95-2.01%), Morgan Stanley (1.79%), Massachusetts Financial Services CO /ma (1.74-1.62%), JPMorgan Chase & CO (1.68%), and Invesco Ltd. (1.65-2.12%).

Marriott family members (e.g., John W. Marriott Jr., Richard E. Marriott) are also significant insider shareholders.

Recent hedge fund activity (as of December 2025) shows firms like Millennium Management, Gotham Asset Management, Adage Capital Partners, and DE Shaw increasing their positions in Marriott.

While there is no explicit mention of direct "Private Equity representation" on the Board, the substantial holdings by large institutional investors and hedge funds indicate significant investment from the financial sector.

[GAP FILL] Jennifer Mason will become Executive Vice President and Chief Financial Officer of Marriott International effective March 31, 2026. She joined Marriott in 1992 and currently serves as Global Officer, Treasurer and Risk Management. Her prior roles at Marriott include CFO for the U.S. & Canada division (2016-2022), Senior Vice President of IT Business Partnership & Planning, and Senior Vice President of Sales & Marketing Planning Support. Mason's background also encompasses positions in Internal Audit, Corporate Financial Planning & Analysis, Lodging Finance, and Business Development. She holds a Bachelor of Science in Commerce from the University of Virginia and an MBA from The Wharton School, University of Pennsylvania.

BUYING SIGNALS

1 FINANCIAL STRESS SIGNALS

Marriott International has demonstrated strong financial performance over the last 12 months, reporting increased revenue per available room (RevPAR) and fee growth. For instance, Q1 2026 results exceeded expectations with a 4.2 percent rise in global RevPAR. Q4 2025 also showed strong results with record pipeline growth and robust fee revenue. The company's worldwide managed hotels experienced an increase in profit margins of 110 basis points in Q4 2024 and 40 basis points for the full year, partly due to productivity improvements.

However, the company has actively pursued cost-cutting and efficiency initiatives. General and Administrative (G&A) expenses declined by 12 percent year-over-year in Q4 2024, primarily attributed to lower administrative, bad debt, and litigation expenses. Marriott anticipates a further G&A decline of 8 to 10 percent in 2025, expecting \$80 to \$90 million in above-property savings from an enterprise-wide initiative to enhance effectiveness and efficiency. This ongoing focus on efficiency, while positive for profitability, signals a drive to optimize expenditures.

2 TECHNOLOGY PAIN SIGNALS

Marriott is undergoing a significant "technology transformation" and "digital transformation plan." This multi-year initiative aims to modernize operations by developing a cloud-native infrastructure and exploring AI technologies. The investment in "core technology migration" and "cloud-native platforms" suggests a proactive move away from existing, potentially legacy, systems. The company is also initiating beta launches of new central reservation, property management, and loyalty systems, with a phased rollout planned over 18 months starting around September 2025. A settlement with the Federal Trade Commission regarding past data breaches has also driven Marriott to improve its cybersecurity measures and enhance data privacy and security programs.

3 OPERATIONAL PAIN SIGNALS

While no explicit mentions of widespread supply chain or scaling problems were identified in the recent earnings calls, the company's ongoing efforts to enhance data privacy and security programs stem from past compliance challenges related to data breaches and a settlement with the Federal Trade Commission. The significant growth in Marriott's development pipeline and net rooms, coupled with strategic investments in technology for efficiency and guest experience, implies a proactive approach to managing and optimizing operations at scale.

4 HIRING SIGNALS

Marriott's consistent reporting of "robust development" and "net rooms growth" (e.g., 4.5 percent over the trailing twelve months through March 2026, and an expected 4.5 percent to 5 percent for full-year 2026) indicates a "build signal" rather than a hiring freeze. The company added approximately 73,600 net rooms in 2025 and has a record development pipeline of nearly 610,000 rooms. Marriott emphasizes collaboration with its 800,000 associates in the development of new technologies. While G&A expenses are targeted for reduction through efficiency, the overall expansion suggests continued hiring for new property operations and technology implementation roles.

5 TIMING TRIGGERS

Several timing triggers have occurred or are in motion:

New Leadership: Jennifer Mason assumed the role of Chief Financial Officer in Q1 2026, following Leeny Oberg's planned retirement. Additionally, in January 2026, Marriott announced the retirement of two long-time leaders, Liam Brown and Brian King, by June 2026. This led to a "strategic realignment across key regions" and new leadership appointments effective March 28, 2026, for Group President, US, Canada and CALA (Satya Anand), President, EMEA (Neal Jones), and President, CALA (Federico Greppi).

Post-M&A Integration: In 2024, Marriott raised its full-year net rooms growth guidance after signing a multi-unit conversion deal with Sonder. Q1 2024 also saw the addition of approximately 37,000 rooms from an agreement with MGM Resorts International.

Regulatory Deadline: A past settlement with the Federal Trade Commission mandates Marriott to enhance its data privacy and security programs, serving as an ongoing regulatory trigger for cybersecurity investments.

Announced Transformation: Marriott has clearly articulated a "multi-year digital transformation initiative" focusing on AI and cloud technologies, including the rollout of new core systems. The company is committing over \$1 billion in investment spending in 2026, with a substantial portion dedicated to this technology overhaul. This initiative, with its phased rollout, presents a significant timing trigger for technology solution providers.

[GAP FILL] Marriott's General & Administrative (G&A) expenses were:

- 2024: \$945 million.
- 2025: \$870 million.

This figure reflects an expected \$80 million to \$90 million in annual pre-tax G&A cost reductions starting in 2025.

 COMPETITIVE & VENDORS

Marriott International, Inc. is a leading global hospitality company undergoing a significant digital and technology transformation to enhance its operations and customer experience.

1. Current Tech Vendors:

Marriott International leverages a diverse technology stack to support its extensive global operations:

ERP (Enterprise Resource Planning): Marriott implemented Oracle PeopleSoft ERP for its financial systems in 2015. The company is also exploring potential future ERP suppliers, including Oracle, Odoo, and SAP, as part of its digital and IT transformation projects.

CRM (Customer Relationship Management): Salesforce powers Marriott's global customer recognition platform, rolled out in 2018. This platform enables continuous interaction with loyalty program members across various guest channels. The Marriott Bonvoy program heavily utilizes CRM and data mining techniques for personalized rewards, tailored communications, and seamless service experiences. Earlier, in 2001, Marriott used Siebel Systems Inc.'s CRM package.

HCM (Human Capital Management): Marriott has implemented Oracle Fusion Cloud Human Capital Management (HCM) to standardize key HR operations, manage global HR data, and support functions like core HR processes, recruiting, payroll, absence management, performance evaluation, compensation, and learning. The CXMpro ATS (Applicant Tracking System) from Hospitality Online was adopted in 2015 for job postings and candidate management.

Cloud & Data Platforms:

Oracle Cloud Infrastructure (OCI): Marriott selected Oracle Hospitality OPERA Cloud Property Management System (PMS) and Sales and Event Management as its hospitality cloud platform, built on OCI, to streamline hotel operations and guest services.

Microsoft Azure: Marriott is expanding its IT capabilities through multi-cloud architectures, utilizing both OCI and Microsoft Azure. The company is also piloting Microsoft Copilot with thousands of associates for tasks like meeting summaries.

Amazon Web Services (AWS): Marriott's data platform was moved to AWS, integrating batch and streaming data into cloud object storage. An AI-backed Travel Assistant is also noted as being AWS-backed.

Snowflake: Since 2019, Marriott has been on a mission to modernize and simplify its data platform using Snowflake as a data warehouse, consolidating batch and streaming data ingestion.

NiCE CXone: Marriott went live with CXone in March 2023, consolidating 11 legacy customer experience (CX) vendor solutions across its 20 global contact centers.

Agilysys: Marriott selected Agilysys as a property management solution provider for its luxury, premium, and select service properties in the United States and Canada.

Shiji: In 2023, Marriott signed a Master Service Agreement with Shiji to expand the deployment of Infrasy's Cloud POS (Point-of-Sale) across its global hotel properties.

AI/ML: Marriott is developing a proprietary "agentic mesh" – a shared orchestration layer in its horizontal AI architecture to reuse AI capabilities across functions. The company is also exploring AI agents for various use cases and has a Generative AI institute.

Past Platforms: Around 2015, Marriott adopted IBM's public cloud technology and analytics software (Big Insights) to manage its core IT systems and applications.

2. Known SI/Consulting Partners:

Accenture: Marriott partnered with Accenture to develop and implement its global HR platform, powered by Oracle Fusion Cloud HCM, which is considered one of the largest Oracle Cloud HCM deployments. Accenture focused on technology enablement for this transformation.

Deloitte: Deloitte is a known partner in Marriott's cybersecurity efforts, utilizing generative AI on AWS to power secure environments and share threat intelligence. Marriott has also collaborated with Deloitte Digital to redesign The Ritz-Carlton's brand and hotel sites to create an enhanced digital experience. Additionally, Deloitte supported Marriott Vacations Worldwide (MVW) in a commercial, product, and operations transformation, leveraging a Salesforce-based system to streamline agent navigation across multiple systems.

Tata Consultancy Services (TCS): In 2020, during the COVID-19 pandemic, Marriott International, along with other hotel chains, planned to reduce outsourcing to technology services companies like TCS (and Cognizant) as part of a move to automate tasks previously done by staff and supported by IT service providers. This indicates a prior relationship with TCS for IT services.

NiCE: NiCE collaborated with Marriott on the implementation of its CXone platform.

3. Procurement Signals:

Marriott International is in the midst of a significant, multi-year digital and technology transformation, signaling ongoing and future procurement activities:

Substantial Investment: The company is making substantial investments in technology, data, and AI, committing \$1.1 billion in investment spending in 2026, with over one-third allocated to digital and technology transformation. Since 2023, Marriott has invested \$1.8 billion in capital and technology expenditures for this transformation.

Core Systems Replatforming: Marriott is actively replatforming its three most critical technology platforms: its central reservation system, property management system (PMS), and loyalty platform. Beta launches of these next-generation cloud-native systems began in late 2025 at six properties, with a phased rollout planned over 18 months.

Strong Focus on AI and Generative AI: Marriott is "actively investing" in AI, aiming to improve customer and employee experiences. The company is developing an "agentic mesh" architecture, which is a shared intelligence layer for reusable AI capabilities across various functions like marketing, operations, customer service, and revenue optimization. Marriott is piloting Microsoft Copilot with thousands of associates and exploring AI coaches for call centers and AI-powered trip planning tools for Bonvoy members. The company has a Generative AI institute and is hiring for roles like Vice President, AI Technology.

Multi-Cloud Strategy: Marriott is pursuing a multi-cloud architecture, utilizing both Oracle Cloud Infrastructure (OCI) and Microsoft Azure for its IT capabilities.

Vendor Consolidation: The implementation of NiCE CXone, which replaced 11 other vendor solutions, indicates a strategy to reduce vendor footprint and complexity.

ERP Evaluation: Marriott's propensity to evaluate Oracle, Odoo, or SAP, or new suppliers for future ERP projects, indicates potential future opportunities in this space.

Job Postings: Recent job postings reflect a focus on technology, including roles such as "Senior Manager, Technical Lead Corporate Systems Finance" (referencing PeopleSoft, SaaS, and custom applications), "FLEX Senior Software Engineer – Data and Analytics Technology," "FLEX Senior Software Engineering - Data Platforms – Clean Room Technologies," and "FLEX ServiceNow Senior Developer."

4. Competitive Dynamics:

Marriott International operates in a highly competitive global hospitality market, with key rivals including:

Hilton Worldwide Holdings Inc.: Marriott is significantly larger than Hilton in terms of global scale and brand portfolio. As of 2026, Marriott leads with 30 brands and 9,100 properties, while Hilton follows with 22 brands and over 7,500 hotels. Marriott's operating margins are generally more profitable than Hilton's.

Accor S.A.: Accor is a major international competitor, particularly strong in Europe and Asia, and focuses heavily on lifestyle brands. While Marriott dominates in North America, Accor competes fiercely for global growth. Marriott is larger in terms of properties, with over 7,000 hotels compared to Accor's 5,100 properties (as of Jan 2026). Marriott's global pipeline of approximately 573,000 rooms is more than double Accor's pipeline of 225,000 rooms, indicating continued expansion.

InterContinental Hotels Group (IHG) Hotels & Resorts: IHG is another global giant competing across various segments.

Wyndham Hotels & Resorts, Inc.: Wyndham boasts a high number of properties (over 9,000) but primarily focuses on the economy and midscale franchising segments. Marriott significantly outperformed Wyndham in stock growth over the past 12 months.

Hyatt Hotels Corporation: Hyatt has a smaller global footprint compared to Marriott, operating approximately 844 properties with 222,000 rooms, but is known for a more exclusive and luxurious experience. Marriott is about twice the size of Hyatt in terms of revenue.

Alternative Accommodation Providers: The rise of platforms like Airbnb has fundamentally altered the travel landscape, presenting competition in long-stay and leisure segments.

Market Share Dynamics:

Marriott International is recognized as the largest hotel company in the world by room count, operating over 1.7 million rooms across nearly 9,500 properties in 144 countries as of early 2025. It holds an estimated 6.1% of the total industry revenue in the Hotels & Motels sector in the US, where it is considered an "All Star" due to strong market share, profit, and revenue growth compared to peers. Marriott leads in global presence and the number of properties. The company consistently achieves financial growth internationally and has a large market share. Marriott continues to expand its portfolio with over 500,000 keys currently in development, which is the highest among its competitors, demonstrating a strategy of gaining or maintaining market share. Its growth, driven by higher-end brands, is expected to generate significant fee revenue. While Hilton also shows strong capital efficiency and growth, Marriott's superior scale and broader brand portfolio create a wider competitive moat.

[GAP FILL] Marriott's technology stack for CRM in and around 2025 includes prominent vendors such as Salesforce CRM, utilized for a global customer recognition platform to unify guest data and personalize marketing. Oracle Siebel Sales Software is also employed by Marriott's sales professionals. For food and beverage outlets within Marriott-branded hotels, SevenRooms was selected as a preferred restaurant technology provider with CRM and marketing automation capabilities as of May 2023. Additionally, Marriott uses MICROS OPERA PMS for property management. The company is undergoing a significant technology transformation, moving core platforms to cloud-native environments with unified guest data, which impacts future CRM capabilities.

1 RECOMMENDED PITCH ANGLE

AI-Powered Cloud Transformation Acceleration

Marriott is in the critical deployment phase of a \$1+ billion multi-year digital transformation, specifically replatforming its three core systems (PMS, central reservations, and loyalty platform) to cloud-native architecture. The company has explicitly stated that 2026 is the year to scale AI adoption after 2025's experimentation phase, and is building an "agentic mesh" shared intelligence layer across marketing, operations, customer service, and revenue optimization. With beta launches of new systems underway at six properties and an 18-month phased rollout planned, Marriott needs partners who can accelerate deployment, ensure integration stability across its massive 9,500-property footprint, and deliver the AI capabilities that will differentiate its guest experience while achieving the targeted \$80-90 million in annual G&A cost reductions. The timing is critical: new CFO Jennifer Mason took office in March 2026, regional leadership was restructured in March 2026, and the company is actively hiring for AI and data platform roles, signaling both budget availability and organizational readiness for transformation partners.

2 CONVERSATION OPENER QUESTIONS

With your core systems replatforming now moving from beta into the 18-month phased rollout across properties, what are the biggest integration challenges you're anticipating as you scale from six pilot hotels to your full global portfolio, particularly around maintaining operational continuity during the transition?

You've articulated a vision for an "agentic mesh" architecture to share AI capabilities across functions. As you move from experimentation in 2025 to scaling AI in 2026, which specific use cases—whether in call center support, revenue optimization, or guest personalization—are proving most valuable in early pilots and are highest priority for enterprise-wide deployment?

Given your multi-cloud strategy leveraging both Oracle Cloud Infrastructure and Microsoft Azure, plus your existing AWS data platform with Snowflake, how are you approaching data orchestration and governance across these environments to enable the unified guest data model that underpins your new cloud-native platforms?

With the recent leadership transition to CFO Jennifer Mason and the regional restructuring in March 2026, how is the prioritization of your \$1.1 billion technology investment evolving, particularly the balance between core systems migration and new AI capability development?

Your partnership with Accenture on Oracle Fusion HCM and collaboration with Deloitte on cybersecurity and digital experience suggests you value strategic SI relationships. As you scale your core systems rollout and AI initiatives, what capabilities or expertise gaps are you looking to fill with technology and implementation partners in 2026 and 2027?

3 LANDMINES TO AVOID

Do not position solutions that require rip-and-replace of Oracle, Salesforce, or Snowflake. Marriott has made substantial investments in these platforms and is actively deploying Oracle OPERA Cloud PMS. Any pitch must demonstrate seamless integration with their chosen cloud-native stack, not compete with it.

Avoid generic hospitality industry pitches or suggesting Marriott is behind competitors technologically. The company is acutely aware of its market leadership position, has the industry's largest development pipeline, and is making bigger technology investments than rivals. Position your solution as accelerating their lead, not catching them up.

Do not underestimate the complexity of their scale or propose solutions that worked for smaller hotel chains. With 9,500 properties across 144 countries, 414,000 employees, and 210 million Bonvoy members, Marriott requires enterprise-grade solutions proven at massive scale with robust change management capabilities.

Steer clear of criticizing their asset-light business model or suggesting technology that doesn't account for their franchise/management structure. Solutions must work for both managed and franchised properties, respecting the owner/operator dynamic that CEO Capuano explicitly prioritizes in decision-making.

4

SUGGESTED NEXT STEP

Request a 45-minute discovery session with representation from both the Global Technology team and the relevant business stakeholder (Revenue, Operations, or Guest Experience, depending on your solution focus) to map your capabilities against their specific phased rollout timeline. Come prepared with a one-page visual that shows how your solution accelerates their stated 18-month deployment timeline, integrates with their confirmed tech stack (Oracle, Salesforce, Snowflake, Azure/OCI), and delivers measurable impact toward their \$80-90 million G&A cost reduction target. Offer to share a reference from a comparable global-scale deployment and request access to their integration architecture documentation under NDA to prepare a specific technical fit assessment for the second meeting.

5

BEST ENTRY POINT

Naveen Manga, Global Chief Technology Officer, is the single best entry point. As the leader responsible for global technology strategy, innovation, and transformation since August 2021, Manga owns the multi-year digital transformation initiative and has explicitly articulated the vision for cloud-native replatforming and the agentic mesh AI architecture. He reports directly to CEO Anthony Capuano and has publicly discussed the 2026 focus on scaling AI after 2025's experimentation year. Given his tenure through the entire transformation planning and early execution phases, plus his recent public statements about moving from pilot to scale, he has both the authority to evaluate strategic technology partners and the immediate need to accelerate deployment success. His role encompasses the exact initiatives your solution would support, and the timing aligns with the critical rollout phase where partner selection decisions are being finalized. Alternative secondary contacts would be Drew Pinto, EVP and Chief Revenue and Technology Officer, who oversees IT and digital strategies and has emphasized that technology directly ties to top-line performance, making him receptive to solutions that demonstrate revenue impact alongside transformation acceleration.
